DOCKET OFFICE COPY

Dr J Donald Millar
1600 Clifton Road, SE
Atlanta GA 30333

Dear Dr Millar:

Moldex-Metric Inc is a respirator manufacturer which has a great interest in the rule making process of the proposed 42 CFR 84. Presently, we are hearing much discussion of the possibility that a consensus standard may be an alternative route in finalizing a new Testing and Certification Standard. If a consensus committee is in fact formed to promulgate a consensus standard, Moldex-Metric would respectfully request that someone from our Company be included on such a committee. We believe that as a manufacturer we would be able to make sizable contribution to such a committee. We are committed to serving the public in providing good respiratory protection. We are able to provide the technical expertise necessary to promulgate a standard which would adequately protect the public.

We hope that you will consider our request in the event that a consensus committee is formed.

Sincerely,

Al Mintz
Vice President
Planning & Development
