Subject: Emergency Responder Health Monitoring and Surveillance

First I would like to apologize for making comments in the blind. I have not read the document, as I just found it today, however have a potential suggestion. I do not know whether or not it is addressed in the document. It is my impression from the synopsis that this is intended to address large scale events, and I would suggest that it also cover day to day routine operations/events that all of us deal with throughout the day/week/month/year/career. I would like to see something such as, or exactly the New York Rescue Workers Detoxification Project as a component of this document, as well as for all Emergency service personnel, regardless of participation in a large event. If you have any questions for me feel free to e-mail me or call my cell at 530-368-0176. Thanks for taking the time to review my suggestion.
