FOREWORD

The National Occupational Exposure Survey (NOES) was a two and a half year field study conducted from 1981-1983.

The NOES, like its predecessor, the 1971-1974 National Occupational Hazard Survey (NOHS), was designed to provide data descriptive of health and safety conditions in the work environment of the United States. Specifically, the survey was intended to provide data on management policy and practice with regard to occupational safety and health and the extent and conditions of potential worker exposure to chemical, physical, and biological agents.

In the course of the survey, 4,490 facilities in 98 different geographical areas were surveyed. The survey was designed to be representative of facilities employing eight or more workers in the agricultural services, oil and gas exploration, construction, manufacturing, wholesale/retail trade, services, and health services industries. Specific details on the conduct and statistical design of the survey are available in Volumes I and II of the NOES series.

This volume in the projected NOES series of publications is devoted to analysis of management responses to the questionnaire administered during the survey. The data contained herein is intended to characterize management policy and practice in several areas relating to worker safety and health by both industry type and facility size. The data should be used carefully, recognizing the intent and guidelines of the survey as well as the statistical design features implicit to the conduct of this survey.

ACKNOWLEDGEMENTS

Speical acknowledgements are due the following individuals:

Ms. Mary Carroll and Mr. Randy Young, for their roles in the initial editing process of the data presented in this volume, and their consultation during the conversion from mainframe to microcomputer processing.

Ms. Penny Appelman, for her patience and cooperation in the production of this volume.

Introduction	1

Section I - Survey Background and Explanation

A. Sampling Strategy	3
Table 1. Major Industrial Groups in the NOES	3
Table 2. Standard Industrial Classifications in the NOES	4
B. Survey Data and Analysis	5
1. Survey Data	5
2. Data Editing and Verification	5
3. Estimation Procedures	6
4. Sampling and Nonsampling Error	6
C. Presentation of Survey Results	7
Figure 1. Explanation of Standard Tabular Format	8
D. National Estimates of Industries Included in the NOES	9
Table 3. Questionnaire Items Presented in Analysis of Management Interview Responses	10
Table 4. Estimated Number of Plants and Employees in Plants in the 1981-1983 NOES (MIG)*	13
Table 5. Estimated Number of Plants and Employees in Plants in the 1981-1983 NOES (SIC)**	14

Section II - Facility Characteristics

Questionnaire Item Number 8 - Years of Current Activity at the Current Location	17
Figure II-1 Average Number of Years of Similar Industrial Activity in the Current Facility (MIG)	19
Table II-1 Average Number of Years That Industrial Facilities Have Been Used for Their Current Purpose (MIG)	19
Table II-2 Average Number of Years That Industrial Facilities Have Been Used for Their Current Purpose (SIC)	20
Figure II-2 Average Number of Years of Similar Industrial Activity in the Current Facility (SIC)	22

* (MIG) is by Major Industrial Group. See Table 1.

** (SIC) is by 2-digit Standard Industrial Classification. See Table 2.

Questionnaire Item Numbers 9 and 10 - Number of Shifts Per Facility and Number of Hours Per Shift	23	
Figure II-3	Average Number of Shifts Per Facility (MIG)	25
Table II-3	Average Number of Shifts Per Facility and Hours Per Shift (MIG)	25
Figure II-4	Average Number of Shifts Per Facility (SIC)	26
Figure II-5	Average Number of Hours Per Shift (MIG)	27
Table II-4	Average Number of Shifts Per Facility and Hours Per Shift (SIC)	28
Figure II-6	Average Number of Hours Per Shift (SIC)	30
Questionnaire Item Number 11 - Employees on Payroll for All Shifts	31	
Figure II-7	Proportion of the Workforce Which is Male (MIG)	34
Table II-5	Estimated Number and Percent of Male and Female Workers by Industry and Plant Size (MIG)	34
Figure II-8	Proportion of the Workforce Which is Male (SIC)	35
Table II-6	Estimated Number and Percent of Male and Female Workers by Industry and Plant Size (SIC)	36

INTRODUCTION

The National Occupational Hazard Survey (NOHS) Was conducted during 1972-1974 because of the recognized need for data on occupational health practices in industry and on worker exposure to chemical, physical, or biological agents in the various industries and occupations. While the data from this survey proved to be quite useful, it was obvious by the late 1970's that it had become dated, and did not reflect the substantial changes which had occurred since 1974.

Conduct of the National Occupational Exposure Survey (NOES) from 1981-1983 provided the necessary update of the data on occupational exposure to specific agents and industrial policies in occupational health.

The NOES sample consisted of 4,490 industrial facilities in 98 defined geographical areas. This sample was derived using a stratified multi-stage statistical procedure which considered geographical location, facility type (by Standard Industrial Classification) and facility-specific employment size. Agricultural production, mining, financial, and government activities were excluded from the survey. Volume II of the NOES series details the statistical base of the survey, including sampling, screening, verification, and data projection procedures.

Field work for the NOES was performed by teams of specially trained surveyors. All surveyors were college graduates, and had received 11 weeks of classroom training in industrial hygiene and safety, hazard recognition, survey procedures and guidelines in addition to in-field training prior to independent conduct of facility surveys. Field activity began in November 1981, and continued until May 1983. Volume I of the NOES series provides information on survey background, surveyor training, and the interpretations and guidelines used during the survey.

Each facility survey consisted of two major segments. The first segment involved the administration of a standardized questionnaire to facility management. This interview obtained such facility-specific data as the number of employees (male and female) and profiled management policy and practice with regard to medical services, industrial hygiene/safety programs, and general employee health related recordkeeping. The second segment consisted of a walk-through of the work areas of the facility. During this walk-through, the surveyor listed, by job title, the employees observed to be potentially exposed to workplace agents. In addition to listing the agents, the surveyor recorded the observed exposure controls and exposure durations for each agent as directed by survey guidelines.

This volume is devoted to presentation of the data gathered during administration of the management interview questionnaire, and provides analysis of industrial management responses to that questionnaire by industry and plant size. These analyses provide estimates of the numbers of employee and facilities in the U.S. operating under specific management policies in the areas of safety and health. Analysis of potential worker exposure to agents in the workplace will be presented in succeeding publications.

(1981-1983)
Analyses of Management Interview Responses**

Section I - Survey Background and Explanation

- Sampling Strategy**
- Survey Data and Analysis**
- Presentation of Survey Results**
- National Estimates**

A. Sampling Strategy

The 1981-1983 National Occupational Exposure Survey (NOES) consisted of on-site observational surveys in a sample of 4,490 establishments which had been selected to represent most sectors of the American workforce covered by the Occupational Safety and Health Act of 1970. Only those establishments performing business, service, or industrial activities included in a specific set of Standard Industrial Classification (SIC) codes¹ were eligible to be included in the NOES.

Codes for the Major Industrial Groups (MIG) included in the NOES are shown in Table 1, and the 2-digit Standard Industrial Classification (SIC) codes selected within each of the MIG codes are shown in Table 2. Descriptions of the activity in each of these classifications are found in Appendices A and B.

The target population for the NOES was thus defined as those establishments or job sites located in the 50 states, employing eight or more, and with a business or service activity defined as one of the target industrial groups listed in Appendices A and B.

Only those establishments in the target industrial groups with eight or more employees were considered to be in-scope in the NOES to maintain comparability with the earlier National Occupational Hazard Survey² (NOHS) and because accurately surveying establishments with less than eight employees would have greatly enlarged the survey sample while contributing little to coverage of the worker population.

The target population excluded establishments engaged in agricultural production, any mining activity except oil and gas extraction, railroad transportation, private households, finance institutions, and all Federal, State and municipal government facilities.

TABLE 1. MAJOR INDUSTRIAL GROUPS IN THE NOES

Code	Description	Code	Description
07	Agricultural Services	40-49	Transportation
13	Oil and Gas Extraction	50-59	Wholesale/Retail Trade
15-17	Construction	70-79	Services
20-39	Manufacturing	80	Health Services

The NOES used a two-stage sampling strategy for most of the sample. The first stage involved the selection of a defined group of counties comprising the geographical or Primary Sampling Units (PSUs) for the NOES. The second stage, selection of facilities to be surveyed, was done using a systematic procedure within the chosen PSUs.

TABLE 2. STANDARD INDUSTRIAL CLASSIFICATIONS IN THE NOES

Code	Description	Code	Description
07	Agricultural Services	35	Machinery, Except Electrical
13	Oil and Gas Extraction	36	Electrical & Electronic Machinery
15	General Building Contractors	37	Transportation Equipment
16	Construction Other than Building	38	Measuring, Analyzing & Control Instruments
17	Special Trade Contractors	39	Miscellaneous Manufacturing
20	Food and Kindred Products	41	Local & Suburban Transit
21	Tobacco Manufacturers	42	Freight Transportation & Warehousing
22	Textile Mill Products	43	Water Transportation
23	Apparel and Other Finished Products	45	Transportation by Air
24	Lumber and Wood Products Except Furniture	48	Communication
25	Furniture and Fixtures	49	Electric, Gas, & Sanitary Services
26	Paper and Allied Products	50	Wholesale Trade, Durable Goods
27	Printing and Publishing	51	Wholesale Trade, Non-Durable Goods
28	Chemicals and Allied Products	55	Automotive Dealers and Gas Stations
29	Petroleum Refining	72	Personal Services
30	Rubber and Miscellaneous Plastic Products	73	Business Services
31	Leather and Leather Products	75	Automotive Services
32	Stone, Clay, Glass, & Concrete Products	76	Miscellaneous Repair Services
33	Primary Metal Industries	80	Health Services
34	Fabricated Metal Products, etc. Machinery and Transportation Equipment		

Very large establishments (2,500 or more employees) were sampled separately in order to maintain more nearly equal probabilities of selection for all facilities in this size category.

First stage selection of geographical areas was accomplished by random selection from strata defined by geography, number of employees, and concentration of establishments in the target population. Second stage selection of establishments employed systematic sampling from a list of establishments ordered by number of employees and Standard Industrial Classification (SIC). The second stage sample was enlarged by 25 percent, and establishments in this enlarged sample were screened by telephone to determine eligibility for inclusion in the survey.

A list of the 4-digit Standard Industrial Classifications of the 4,490 establishments for which surveys were completed in the NOES is shown in Appendix C. The sampling plan is described in more detail in National Occupational Exposure Survey Sampling Methodology³ and in Appendix D.

B. Survey Data and Analysis

1. Survey Data

The NOES surveyor's manual, National Occupational Exposure Survey Guidelines⁴, was prepared to provide standardized procedures to the personnel participating in the actual field collection of data and as documentation of the interpretations and guidelines under which the survey was conducted. While some portions of that volume, particularly the text dealing with the question intent and interpretation, are present in abbreviated form in this report, the reader is referred to the field guidelines for a complete explanation of the guidelines for the 1981-1983 field phase of the survey.

A complete copy of the 66-question National Occupational Exposure Survey (NOES) Management Interview questionnaire is presented in Appendix E. The administration of the questionnaire, and the resultant collection and analysis of data constituted Part I of the NOES, which is the subject of this volume. Part II consists of occupational exposure data collection and analysis, which will be the subject of future publications.

2. Data Editing and Verification

Part I questionnaire forms received from the field were logged and subjected to a multi-stage evaluation process prior to data entry into a mainframe computer system. Initial receipt of the forms involved manual comparison of the establishment name, address, number of employees, Standard Industrial Classification, and facility identification number with that expected from the sampling plan.

Following initial verification, the actual names and addresses of the surveyed establishments were suppressed and not retained as part of the facility-specific records used during the analysis of the data. This information was thereafter regarded as confidential data. This was to ensure the anonymity of surveyed industrial establishments. Facility-specific records were instead accessed and manipulated for analysis using the facility identification number assigned during the sample selection phase.

Individual questionnaire responses were coded and keypunched for edit in a mainframe computer. Establishment activity was coded using 1972 Standard Industrial Classification codes and questionnaire responses were coded using the codes included on the NOES questionnaire.

The computerized edit was essentially a verification and resolution process. Subject to the directed non-response guidelines (e.g., that no numerical count be found for nurse employment if a previous response indicated no nurse employment), all data fields were checked for expected data. This data was then screened for expected values (e.g., numerical or alphabetic characters) and discrepancies resolved by comparison with the raw questionnaire data, or with establishment personnel. The final edited file contained 4,490 records, one for each facility, which included responses for each of the 66 questions asked on the NOES Part I questionnaire.

3. Estimation Procedures

National estimates of the numbers of employees and number of establishments conducting business in the SIC codes surveyed in the NOES (see Appendix B) are presented in this report. Two stages of ratio estimation were used in this process. Variances of estimates were calculated using the method of replications.

A probability of selection was associated with each of the steps followed in selecting the sample establishments to be interviewed. Inverses of these probabilities define sample weights which indicate how much each establishment's results contribute to estimated totals. Initial estimates of national totals were obtained by multiplying each establishment's totals by its sample weight and summing across establishments. Two stages of ratio estimation were used to improve the precision of the estimate before the final publication estimate was determined. The first stage ratio estimation factor was based on establishment counts by employee size class within SIC. The second stage ratio estimation factor was based on employee counts (or establishment counts for establishments with more than 1000 employees) by employee size class within SIC.

Each estimate has a sample error associated with it. Calculation of the sampling errors was handled using the method of replications. The method requires that the estimation procedures be independently carried out several times (replicated) using subsamples of the original sample.

Use of ratio estimation and the method of replications to make national projections from the NOES sample data is detailed in the National Occupational Exposure Survey Sampling Methodology³ and in Appendix D.

4. Sampling and Nonsampling Error

Sampling errors in any survey may result from the sample design used. Methods of optimizing the sample design for a survey typically involve establishing a cost function for the study, expressing the sampling variance, and solving the equation which will produce the minimum variance for a fixed costs⁵. This approach was an oversimplification of the needs for the NOES because it assumed there was a single estimate whose variance was to be minimized. In the NOES, estimates were needed for both numbers of employees and establishments, and quite different sample designs could have been chosen depending on which estimate was considered to be of greatest importance.

The sample design ultimately developed for the NOES maximized the reliability of estimates of numbers of employees. The sample selection methods used for the NOES resulted in variance estimates that are slightly biased (usually overestimates). Operational constraints also affected sampling error.

Non-sampling errors in the NOES were minimized by the standardized training and manuals available to each surveyor, and by the extensive manual and computerized edit of the questionnaire data. The effect of non-response (which was less than 0.3%) was minimized since the sample design had made provision for a "shadow sample" from which substitute establishments similar those initially selected could be found.

Responses used for calculations were also obtained from management interviews, and may not accurately have reflected in-plant conditions, although these responses were subject to the field verification and interpretation procedures outlined in the guidelines for field activity.

C. Presentation of Survey Results

The NOES Management Interview questionnaire was administered at each of the 4,490 facilities in the NOES sample. The questions are subdivided into four major subject areas. The first of these subject areas consists of general facility information which characterizes sampled facilities by industrial classification, products, age, workforce size, and union presence. The second and third subject areas contain profile information on the provision of medical and industrial hygiene/safety services to employees as a result of management policy. The final portion of the questionnaire addresses the employee health-related recordkeeping practices of the sampled facility. This publication is organized to present analyses grouped according to these four major subject areas.

Most of the items of the NOES are dichotomies indicating whether a facility possessed a given characteristic or not; (e.g., does the facility have designated personnel for emergency health care)? Estimates of the national number, the standard error of the estimated number, and the percentage of facilities in that SIC that are projected to have the characteristic are given for three facility-size classifications within each Major Industrial Group (MIG). Similar estimates for the number and percentage of employees in such facilities in the nation are also given. Both sets of estimates are produced for each Standard Industrial Classification (SIC) as well.

Figure 1 (Explanation of Standard Table Format) contains a generalized description of the most common tabular format employed in the data presentation sections of this volume. Occasionally, as in the tabular presentation of continuous variable data, the standard tabular format was not suitable. However, these tables should be self-explanatory given an understanding of the standard tabular format, since the tabular titles and headings identify the data presented.

FIGURE 1. EXPLANATION OF STANDARD TABULAR FORMAT

NATIONAL OCCUPATIONAL EXPOSURE SURVEY (1981-1983) TABLE NO. III-11

NUMBER AND PERCENT OF PLANTS AND EMPLOYEES IN PLANTS WHICH
HAVE DESIGNATED PERSONNEL FOR EMERGENCY HEALTH CARE

MAJOR GROUP	PLANTS			TOTAL	EMPLOYEES			TOTAL
	SMALL (0-99)	MEDIUM (100-499)	LARGE (≥500)		SMALL (0-99)	MEDIUM (100-499)	LARGE (≥500)	
07	2253* (1028) 40.5%	2253* (1028) 40.0%	32041* (12878) 30.9%	32041* (12878) 28.9%
13	2991* (952) 34.6%	501* (202) 49.7%	46* (32) 100.0%	2538* (1069) 36.8%	58732 (17587) 28.7%	106244* (43807) 61.1%	31383* (352911) 100.0%	196359* (62127) 47.4%

These column headers identify the areas displaying estimates of number of plants or employees in plants by the employment size ranges shown in parenthesis

Major Industrial Group codes- See Table 1 and Appendix A

Standard Industrial Classification codes- See Table 2 and Appendix B

No large plants or employees in large plants in Major Group 07 were observed

The estimated number of workers in medium plants within Major Group 13 for the variable tabulated is equal to 106,244. The asterisk indicates that the standard error of 43,807 is more than 25% of the estimate, and that the estimate may be unreliable. The estimate is equal to 61.1% of the estimated total number of workers in medium size plants in Major Group 13. See Table 3.

The estimated number of large plants in Standard Industrial Classification 35 for the variable tabulated is 784, with a standard error of 79. The estimate of 784 is equal to 100% of the estimated total number of large plants in Standard Industrial Classification 35. See Table 4.

SIC CODE	PLANTS			TOTAL	EMPLOYEES			TOTAL
	SMALL (0-99)	MEDIUM (100-499)	LARGE (≥500)		SMALL (0-99)	MEDIUM (100-499)	LARGE (≥500)	
34	8294 (1059) 44.8%	2707 (164) 65.7%	3184 (84) 91.9%	11319 (1050) 51.5%	300455 (27184) 54.7%	829577 (30343) 66.8%	287700* (30325) 82.0%	3117732 (306637) 74.4%
35	8949 (1158) 39.5%	2991 (199) 67.0%	784 (79) 100.0%	12723 (1219) 67.4%	287906 (30884) 47.4%	590518 (20453) 69.3%	1112833 (147534) 100.0%	1991357 (153948) 83.6%

TABLE NO. III-12 (CONTINUED)

Table 3 (Questionnaire Items Presented in the Analysis of Management Interview Responses) presents a list of the Management Interview questionnaire item responses analyzed in this volume.

Establishments surveyed during the NOES did not represent all possible industrial activities included at the MIG or 2-digit SIC level of classification, and the estimates presented represent only the industrial activities actually surveyed. The industrial activities actually surveyed are listed in Appendix C.

In most cases, tabular data presentations in this volume are accompanied by graphic presentations of the same data. The graphic presentations generally are summaries of the tabular data across facility size ranges, or SICs, or both. Depending on the characteristic being presented, several graphic presentations may accompany a single table.

The decision as to the type and number of graphic presentations accompanying each tabular format was based on anticipation of questions from the professional community. The rationale for the inclusion of the graphic analysis is to aid the reader in interpreting the data displayed in tabular form, and to provide him or her with pointers to specific areas of the tabular data which may be of particular interest.

Space limitations precluded the display of Major Industrial Group (MIG) or Standard Industrial Classification (SIC) titles in the tabular or graphic data presentations in this volume. Accordingly, a Graphics/Tabular Format Guide is included as an insert. This guide contains abbreviated titles for all the MIG groups (detailed in Table 1 of this section and in Appendix A) and SIC codes (detailed in Table 2 of this section and in Appendix B) profiled in this report. This guide was designed to line up with the appropriate MIG or SIC display in graphic or tabular form, and provide an immediate reference to their descriptive titles.

It was our intent to produce an analysis of the NOES Part I data in a convenient reference volume format which would provide answers to most of the anticipated questions from the professional community. However, the Part I data contains more possibilities for analytical presentation than could be contained in this volume. Therefore, the data base assembled from the survey observations, and our analytical procedures, were so designed that specific analyses not presented in this report could be performed upon request.

D. National Estimates of Industries Included in the NOES

Estimates of the total number of employees and facilities in the NOES target SICs are presented in Tables 4 and 5.

The totaled estimates across all categories are not identical in Tables 4 and 5. This is because estimates for certain industrial groups had such a high standard error that they were not considered to be reliable, and thus unsuitable for publication. The estimates were associated with specific industrial groups which were undersampled. Undersampling was determined by use of the coefficient of variation of size ⁵. A cutoff value of .25 for the coefficient was used (see Appendix D).

**TABLE 3. QUESTIONNAIRE ITEMS PRESENTED IN ANALYSIS
OF MANAGEMENT INTERVIEW RESPONSES**

Questionnaire Item Number	Description	Page
8	Years of Current Activity at Current Location	17
9 & 10	Number of Shifts Per Facility and Number of Hours Per Shift	23

64	Unscheduled Absenteeism Rate	653
65	Turnover Rate Among Non-Administrative Permanent Employees	658
66	Industry Maintenance of the OSHA 200 Form	663

Data from industrial groups which were undersampled was useable when combined with results from other groups at the Major Industrial Group level, but was insufficient to present accurate analysis at the 2-digit SIC level. This was true for four 2-digit classifications:

- SIC 40 Railroad Transportation
- SIC 44 Water Transportation
- SIC 46 Pipelines, Except Natural Gas
- SIC 47 Transportation Services

Data from these SICs were incorporated into tables at the Major Industrial Group level only. This results in the slightly higher overall totals displayed in the Major Group tables throughout this volume when compared to the totals in the 2-digit SIC tables.

**NATIONAL OCCUPATIONAL EXPOSURE SURVEY
(1981-1983)**
Analyses of Management Interview Responses

Section II - Facility Characteristics

- years of operation**
- number of shifts**
- hours per shift**
- male/female employment**
- non-administrative workers**
- labor unions**

NOES QUESTIONNAIRE ITEM NO. 8
Years of Current Activity at Current Location

Intent

The intent of this question was to determine the length of time that the current facility had been used for the same type of work.

This item was displayed on the questionnaire as:

8. Approximately how many years has this facility been involved in this activity?

____ Years (if "unknown" code "U K _")

Notes

"Activity," as used in this question, is not limited to a single major industrial activity at the facility, but refers to all current industrial effort(s) at the facility.

The duration of current activity is based on use of the present site for that purpose, and represents the non-administrative industrial activity. For example, if the production area of the facility is 30 years old, but new management offices were built four years ago, the correct response to question 8 is 30.

Since the responses to this question are continuous variables, the data format differs from that of the discrete variables which was explained in the Introduction of this volume. The average number of years for facility size within Major Industrial Group or Standard Industrial Classification categories was calculated along with the standard error of that estimate, and both values displayed in the tabular format. Display of a percentage figure for the estimates is not applicable for continuous variable analysis as presented in this volume..

Analysis

One analysis of the responses to question 8 is presented.

Response 8 - Approximate number of years this facility has been involved in the current activity

The estimates of the average number of years of current industrial activity at the present facilities by size within industrial classification category, and the standard error of those estimates are displayed in Figures II-1 and II-2, and Tables II-1 and II-2.

FIGURE II - 2
AVERAGE NUMBER OF YEARS OF SIMILAR INDUSTRIAL
ACTIVITY IN THE CURRENT FACILITY
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEMS NO. 9 AND 10
Number of Shifts Per Facility and Number of Hours Per Shift

Intent

As part of the effort to precisely enumerate employees of the facility engaged in production activity, these questions were intended to ensure that observations of potential occupational exposure at the facility included all production shifts.

These items were displayed on the questionnaire as:

9. How many shifts do you have at present? _
10. How many hours per shift:
_ _ (If irregular, code "99")

Notes

"Shift" was defined as the working period for employees of the facility, and may have been more or less than eight hours.

Only the number of production shifts was recorded. Work periods routinely devoted only to janitorial or maintenance operations were excluded.

The number of hours per shift was recorded for the facility at the time of survey, providing data across geographical and seasonal fluctuations. All shifts were included in this response. The values displayed for number of shifts and hours per shift are averages, and are rounded to the nearest whole number.

Analysis

Two analyses of the responses to questions 9 and 10 are presented.

(1) Response 9 - Number of shifts per facility

The estimates of the average number of shifts per facility are displayed in Figures II-3 and II-4 and the first four columns of Tables II-3 and II-4.

Figure II-3	Average number of shifts per facility (by major industrial group)
Figure II-4	Average number of shifts per facility (by 2-digit SIC)
Table II-3	Average number of shifts per facility and hours per shift (by major industrial group)
Table II-4	Average number of shifts per facility and hours per shift (by 2-digit SIC)

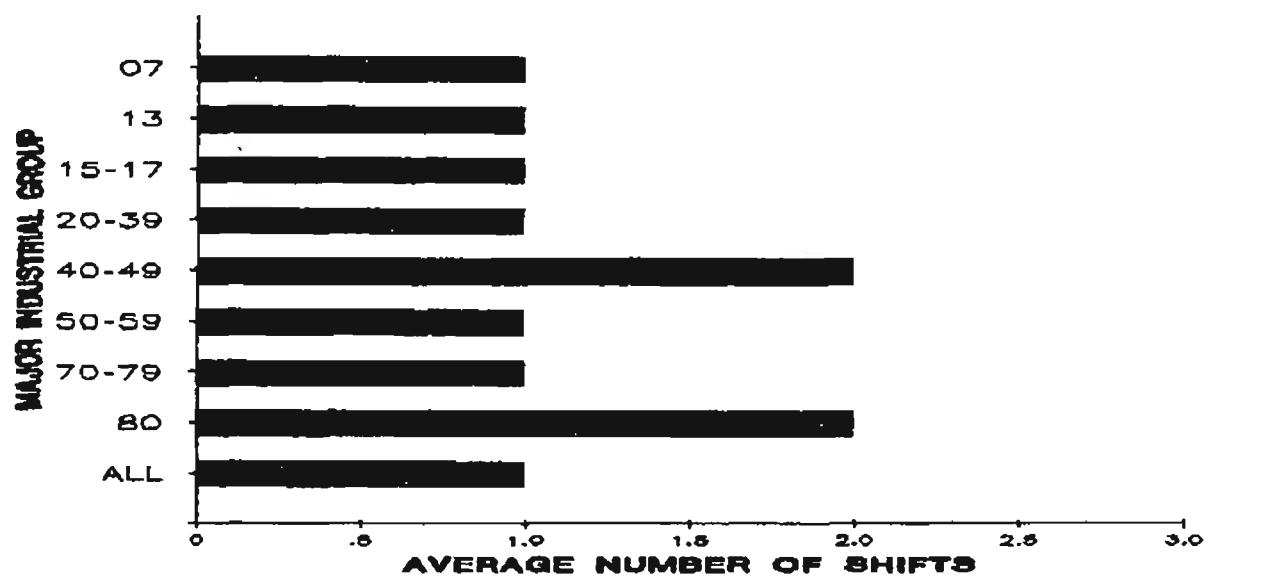

(2) Response 10 - Number of hours per shift

The estimated average hours per shift are displayed in Figures II-5 and II-6, and the second four columns of Tables II-3 and II-4.

**Figure II-5 Average number of hours per shift
(by major industrial group)**

**Figure II-6 Average number of hours per shift
(by 2-digit SIC)**

FIGURE II - 6
AVERAGE NUMBER OF HOURS PER SHIFT
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 11
Employees on Payroll for All Shifts

Intent

The intent of this question was to determine the total number of workers in the facility being surveyed, and to determine the number of male and female employees.

This item was displayed on the questionnaire as:

11. How many people are on your payroll for all shifts at the present time?

Males	-----
Females	-----
Total	-----

Notes

All full-time and part-time personnel paid directly by the facility were included in this response. Maintenance, repair, and janitorial personnel, as well as individual consultants working directly for the facility and personnel working on a commission basis were also included.

In the special case of a construction site survey, this response would have included all persons in the direct employ of the firm being surveyed on the date of the survey. Persons merely making deliveries to the survey site, government inspectors, contract, or sub-contract workers were excluded from the response to question 11.

Analysis

Two analyses of the responses to question 11 are presented.

- (1) Response 11 (male) - Male proportion of the workforce

Estimate of the proportion, by industry sectors, of the total workforce which is male is presented in Figures II-7 and II-8.

Figure II-7 Proportion of the workforce which is male
 (by major industrial group)

Figure II-8 Proportion of the workforce which is male
 (by 2-digit SIC)

- (2) Response 11 (male or female) - Estimated number and percent of male and female employees

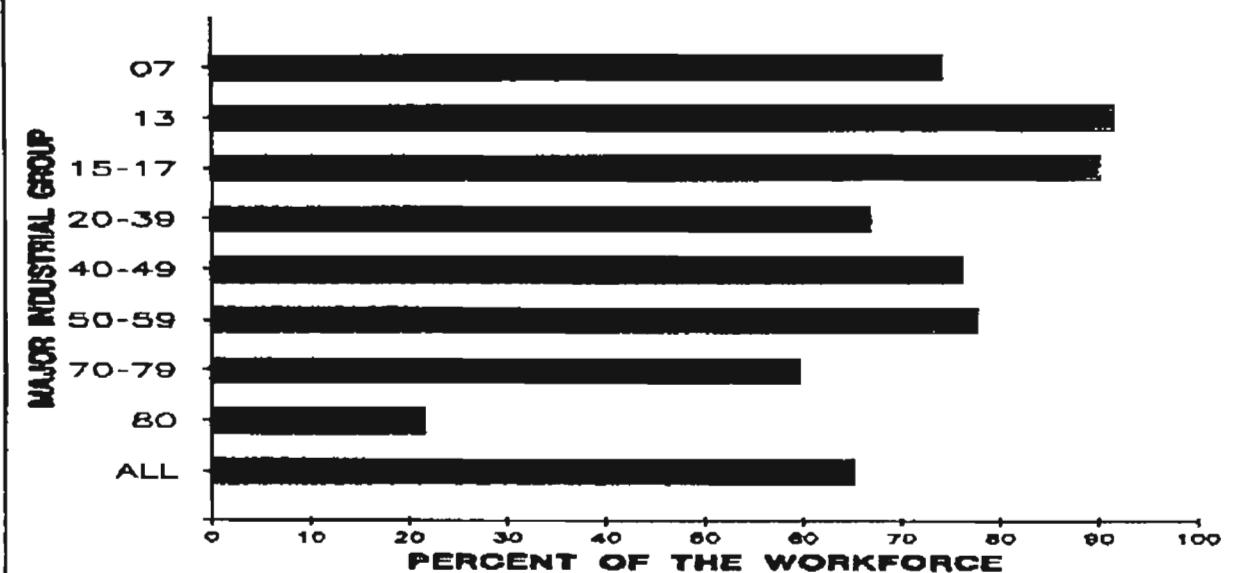

The estimates of the number and percent of male and female employees in the workplace are presented in Figure II-9 and Table II-5 and II-6.

Figure II-9	Male and female proportions of the workforce by plant size
Table II-5	Estimated number and percent of male and female workers by industry and plant size (by major industrial group)
Table II-6	Estimated number and percent of male and female workers by industry and plant size (by 2-digit SIC)

Please note that estimates of the total number of workers and industrial facilities based on NOES survey data were presented as part of the survey documentation in Section I of this volume.

FIGURE II - 9
MALE AND FEMALE PROPORTIONS OF THE
WORKFORCE BY PLANT SIZE
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 12
Workers in Non-Administrative Areas

Intent

The intent of this question was to determine the number of employees in the surveyed facility working in those locations where production or service work is conducted.

This item was displayed on the questionnaire as:

12. Of this total number, how many are normally in the work areas as opposed to the administrative or other areas?
- - - - -

Notes

"Work area" was defined as that location or locations where the production or service activities of the surveyed facility take place.

Personnel located in the work area as a consequence of their job were included in this response even if their tasks did not relate directly to the product(s) or service(s) of the facility.

Personnel normally employed outside the work area, such as administrative or clerical staff, were excluded.

Analysis

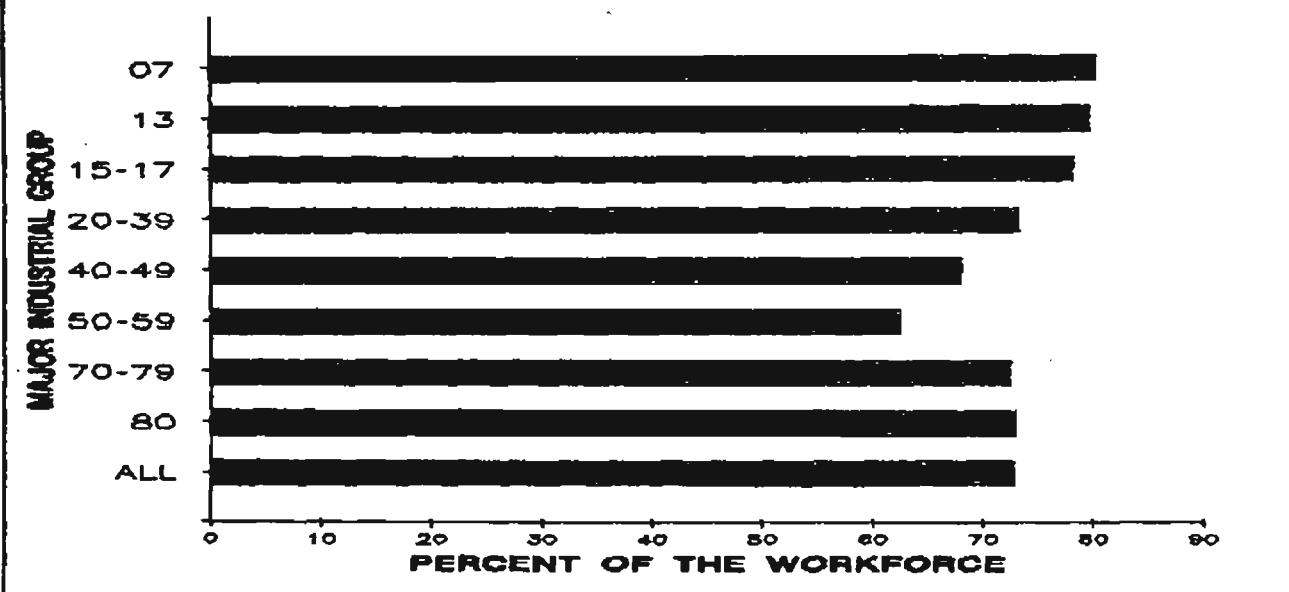

One analysis of the responses to question 12 is presented.

Response 12 - Number of employees in work area

The estimated number and proportion of workers whose normal employment is in the production or service areas of their place of employment are displayed in Figures II-10 and II-11, and Tables II-7 and II-8.

Figure II-10	Workers in non-administrative areas (by major industrial group)

MOES QUESTIONNAIRE ITEM NO. 13
Labor Unions in the Workplace

Intent

The intent of this question was to determine the prevalence of labor unions in the facilities included in the survey population.

This item was displayed on the questionnaire as:

13. Are there any labor unions operating in this facility?

1 No

2 Yes; list complete union names and acronyms (initials)

Notes

A union is any organization in which any of the facility's employees participate as members, which exists for the purpose of negotiating with the employer concerning grievances, wages, working hours, and conditions.

Any organization whose purpose is as defined above which existed in a surveyed facility resulted in a "yes" response and a listing of appropriate organizational names and acronyms.

The existence of organizations such as credit unions, fraternal associations, or social groups composed of facility employees whose purpose was not as defined above did not constitute a positive response, and they were not listed.

Analysis

One analysis of the responses to question 13 is presented.

Response 13.2 - Unions operating in industrial facilities

The estimates of the number and percent of plants, and workers in those plants, where at least one labor union is actively representing some or all of the facility workers are displayed in Figures II-12, II-13, II-14, II-15, II-16, II-17, II-18, II-19, II-20, and II-21, and Tables II-9 and II-10.

- medical record retention

NOES QUESTIONNAIRE ITEM NO. 14
Existence of An On-Site Health Unit

Intent

The intent of this question was to determine whether there was a company policy which resulted in the provision of a health unit. This was defined as a work area or portion of the facility reserved solely for the medical examination and/or treatment of employees, permanently staffed at least part-time by individuals responsible for operation of the unit.

This item was displayed on the questionnaire as:

14. Is there a formally established health unit at this facility?

- 1 Yes, physician in charge
- 2 Yes, registered nurse in charge
- 3 Yes, licensed practical nurse in charge
- 4 Yes, other in charge
- 5 No

Notes

Resting rooms for female employees, rooms used only for the storage of medical supplies, and rooms reserved only for specific purposes other than basic health care (such as audiometric testing) were not considered to be health units.

The lowest-numbered applicable response was coded. For example, if a physician was in charge of the unit during at least part of the work week, and a nurse provided services at all other times, response 14.1 was selected.

Analysis

Three analyses of the responses to question 14 are presented.

(1) Response 14.1 - Health unit with a physician in charge

The estimates of the plants which have on-site health units with a physician in charge, and workers in those plants (by number and proportion of the total) are displayed in Figures III-1 and III-2, and Tables III-1 and III-2.

**Figure III-1 On-site health units with a physician in charge
(by major industrial group)**

**Figure III-2 On-site health units with a physician in charge
(by 2-digit SIC)**

Table III-1	Number and percent of plants and employees in plants which have a health unit with a physician in charge (by major industrial group)
Table III-2	Number and percent of plants and employees in plants which have a health unit with a physician in charge (by 2-digit SIC)

(2) Response 14.2 or 14.3 - Health units with a nurse in charge

The estimates of the plants which have an on-site health unit with a nurse (RN or LPN) in charge, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-3 and III-4, and Tables III-3 and III-4.

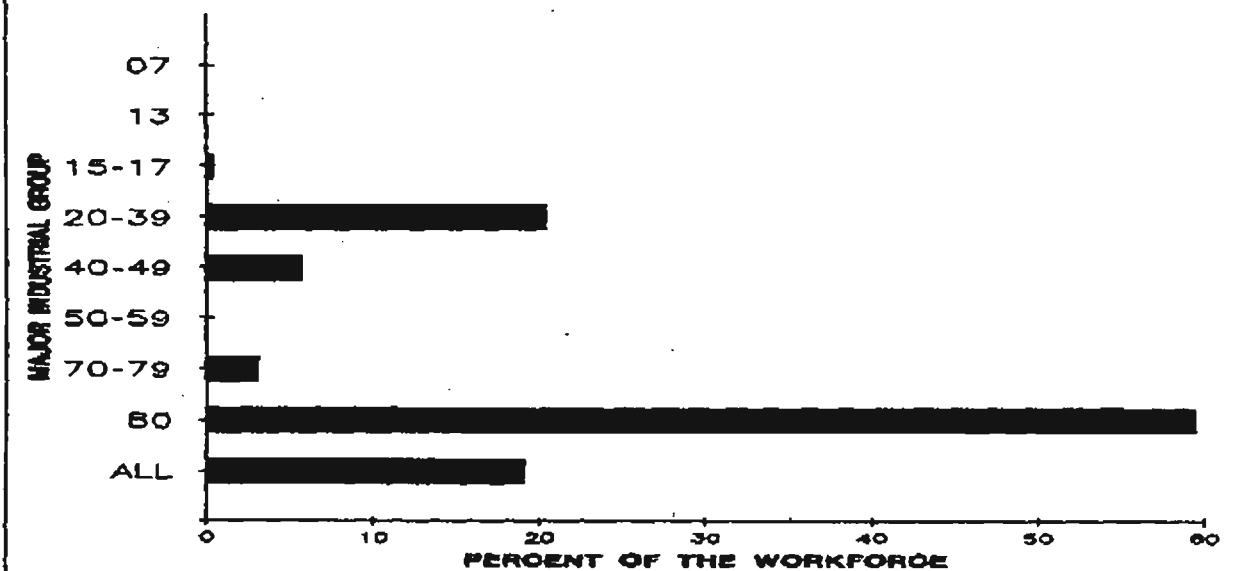

Figure III-3	On-site health units with a nurse in charge (by major industrial group)
Figure III-4	On-site health units with a nurse in charge (by 2-digit SIC)
Table III-3	Number and percent of plants and employees in plants which have a health unit with a nurse in charge (by major industrial group)
Table III-4	Number and percent of plants and employees in plants which have a health unit with a nurse in charge (by 2-digit SIC)

(3) Response 14.1, 14.2, 14.3, or 14.4 - Health units with a designated individual in charge

The estimates of the plants which have an on-site health unit with at least some individual designated to provide care, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-5, III-6, III-7 and Tables III-5 and III-6.

Figure III-5	On-site health units with designated staff in charge (by major industrial group)

FIGURE III - 7
ON-SITE HEALTH UNITS BY PERSONNEL TYPE IN CHARGE
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 15
Presence of a Trained Individual to Provide First Aid

Intent

The intent of this question was to determine if there were individuals, other than doctors or nurses, formally trained in first aid procedures and designated by management to provide on-site emergency medical care.

This item was displayed on the questionnaire as:

15. Do you have an employee at this facility with formal first-aid training, who has been formally designated to provide emergency medical treatment?

- 1 Yes, full-time
- 2 Yes, part-time
- 3 No

Notes

Full-time provision of first-aid means that at least one individual is on duty at any time the facility is in operation, while part-time means that at least one individual has been designated as the provider of first-aid but may not be on duty during all hours of operation.

Physicians, nurses, or any individual not formally designated by management to provide first aid were not included as providers. Informal or "understood" arrangements were not considered positive responses.

Analysis

Three analyses of the responses to question 15 are presented.

- (1) Response 15.1 - provision of trained first aid personnel during all hours of facility operation

The estimates of the plants which provide full-time first aid personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-8 and III-9, and Tables III-7 and III-8.

- | | |
|--------------|---|

which have full-time personnel for emergency health care
(by major industrial group) |
| Table III-8 | Number and percent of plants and employees in plants
which have full-time personnel for emergency health care
(by 2-digit SIC) |

- (2) Response 15.2 - provision of trained first aid personnel during at least some of the hours of facility operation

The estimates of the plants which provide part-time first aid personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-10 and III-11, and Tables III-9 and III-10.

- (3) Response 15.1 or 15.2 - provision of trained first aid personnel on a part or full-time basis

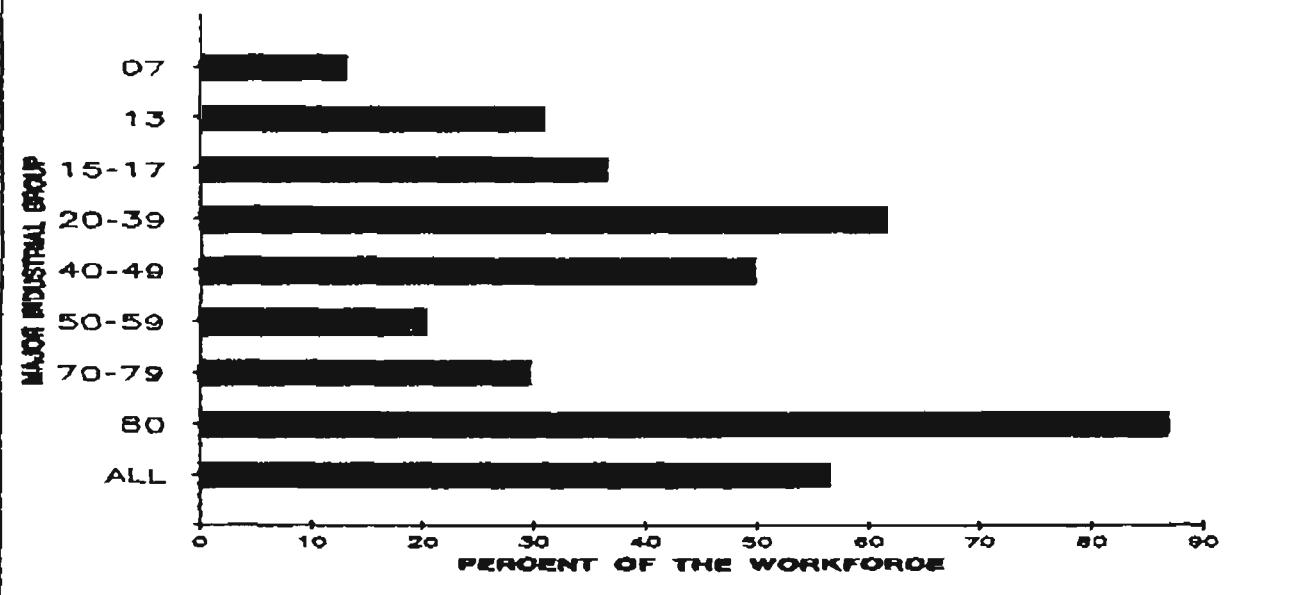

The estimates of the plants which provide emergency health care on-site either part or full-time, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-12, III-13, III-14, and Table III-11 and III-12.

EMERGENCY HEALTH CARE PERSONNEL ON-SITE
(NOEs 1981-1983)

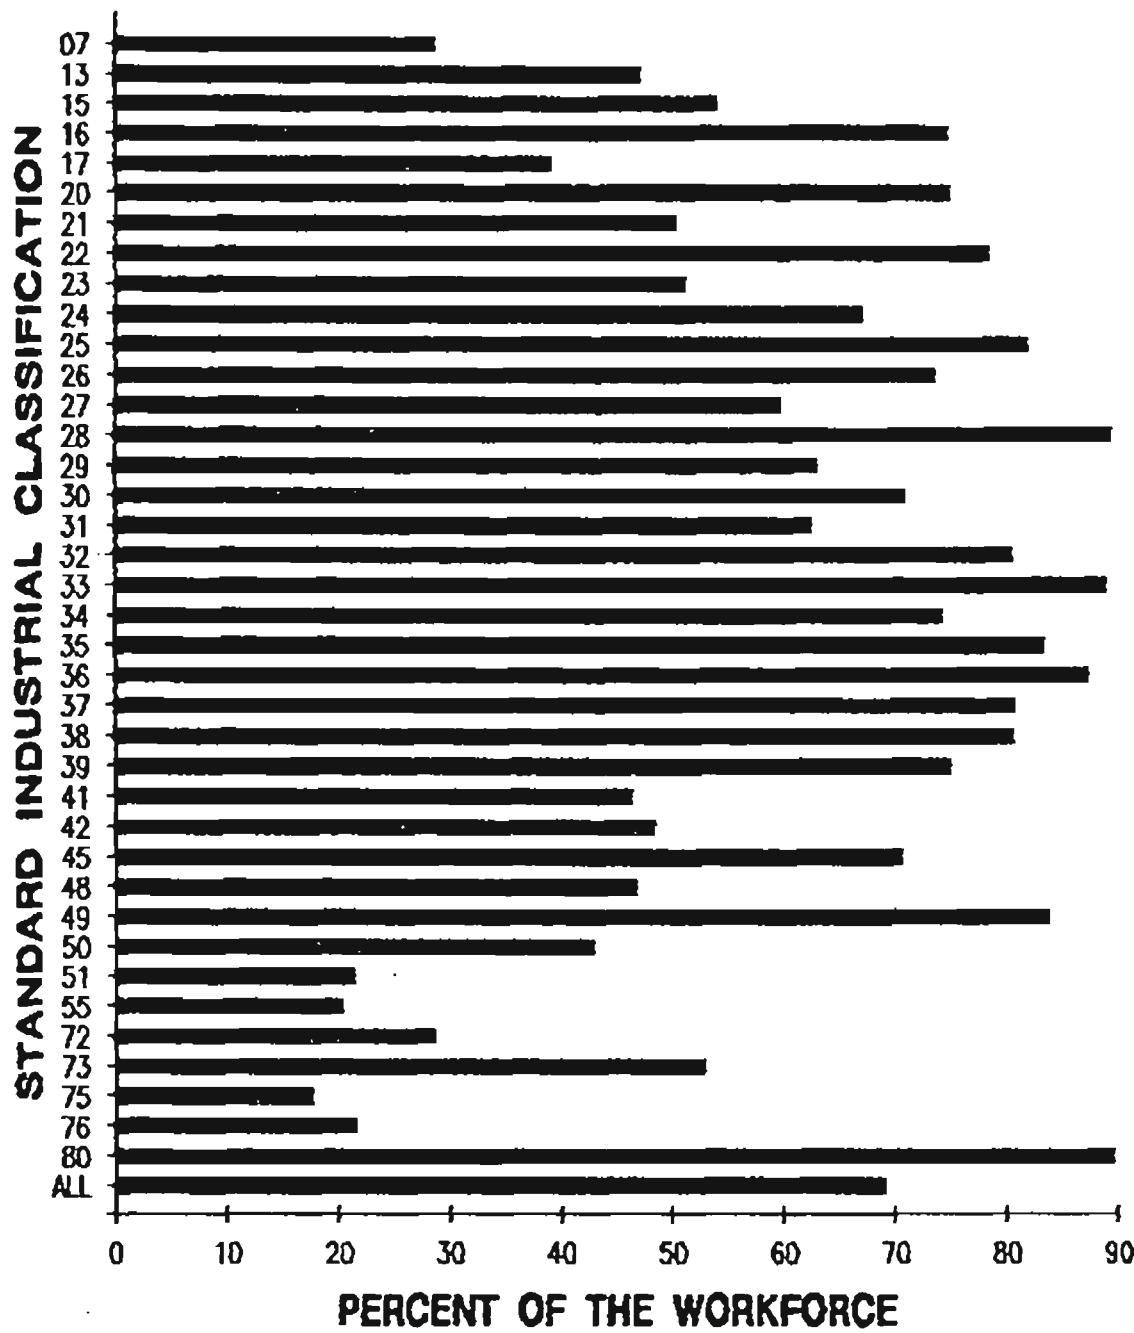

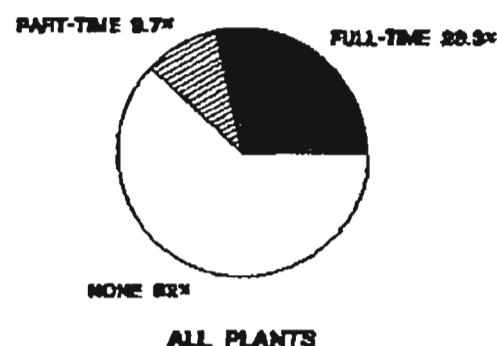

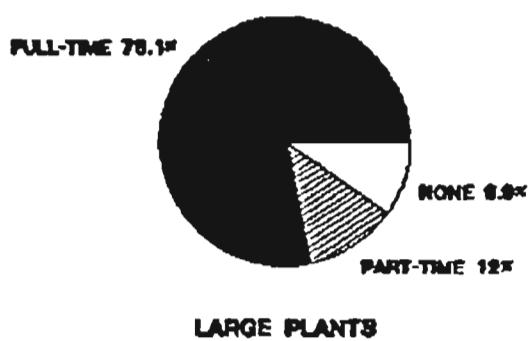

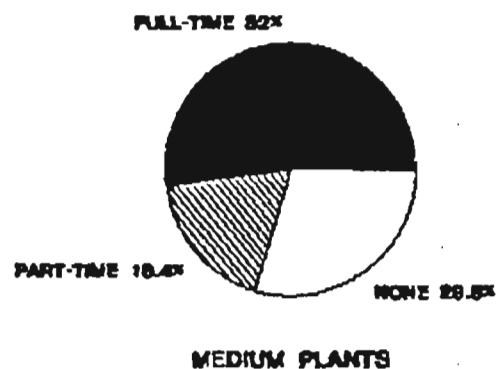

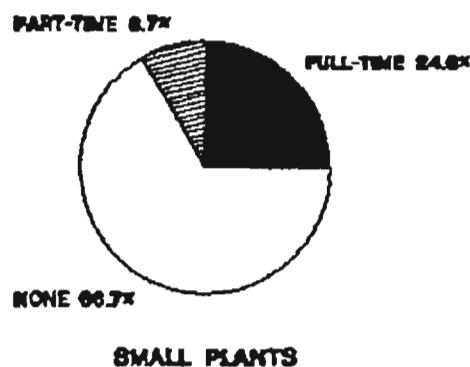

FIGURE III - 14
EMERGENCY HEALTH CARE PROVIDED ON-SITE
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 16
Employment of Physicians to Provide Health Care

Intent

The intent of this question was to determine if an industrial facility employed physicians, either full or part-time, specifically to provide health care to the employees of the facility.

This item was displayed on the questionnaire as:

16. Do you have on your payroll one or more on-site physicians to give your employees medical care?
- 1 Yes, full-time
2 Yes, part-time
3 No

Notes

Physicians not engaged in the direct provision of health care to employees of the facility, such as those employed primarily for purposes of research, were excluded from consideration here. Physicians provided by a third-party contractor were considered in question 17.

Full or part-time physicians were defined on the bases of presence during hours of facility operation (full-time) or less (part-time).

Analysis

Three analyses of the responses to question 16 are presented.

- (1) Response 16.1 - Presence of an employed physician to provide health care to employees during all hours of facility operation

The estimates of the plants which have full-time employed physicians, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-15 and III-16, and Tables III-13 and III-14.

Figure III-15 Employed physician on-site full-time
(by major industrial group)

Figure III-16 Employed physician on-site full-time
(by 2-digit SIC)

Table III-13 Number and percent of plants and employees in plants
which have an employed physician on-site full-time (by
major industrial group)

Table III-14 Number and percent of plants and employees in plants
which have an employed physician on-site full-time (by
2-digit SIC)

- (2) Response 16.2 - Presence of an employed physician to provide health care to employees during at least some of the hours of facility operation

The estimates of the plants which have part-time employed physicians, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-17 and III-18, and Tables III-15 and III-16.

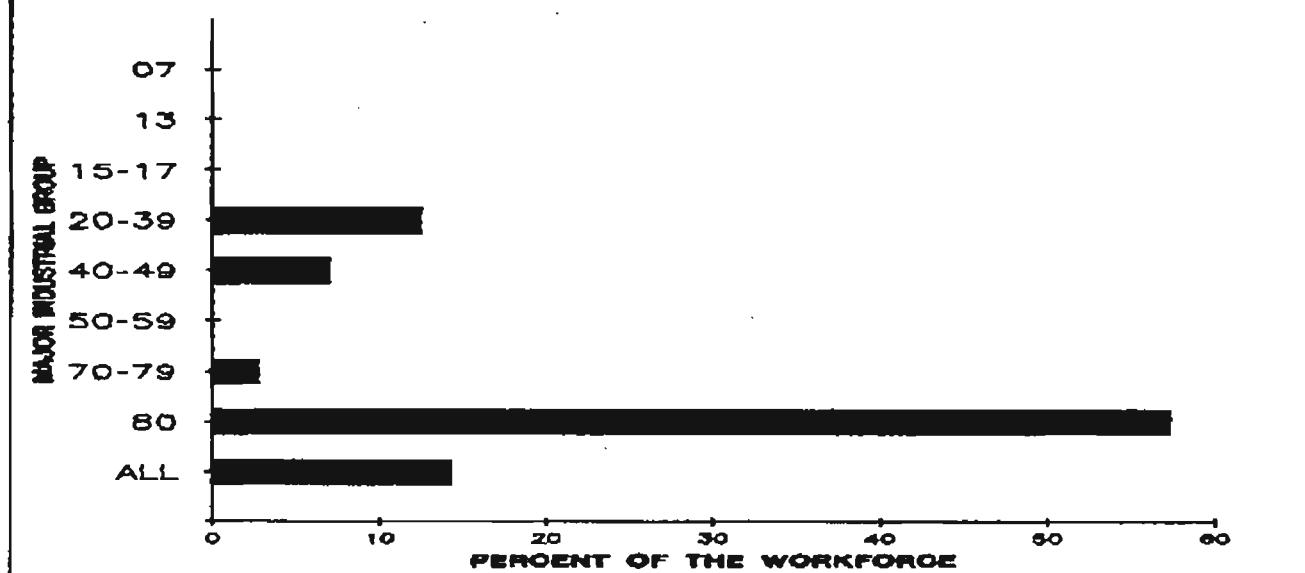

Figure III-17	Employed physician on-site part-time (by major industrial group)

Table III-16	Number and percent of plants and employees in plants which have an employed physician on-site part-time (by 2-digit SIC)

- (3) Response 16.1 or 16.2 - Presence of an employed physician to provide health care to employees, either full or part-time

The estimates of the plants which have either part or full-time employed physicians, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-19 and III-20, and III-21, and Tables III-17 and III-18.

FIGURE III - 21
PLANTS WITH AN EMPLOYED PHYSICIAN ON-SITE
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 17
Use of Off-Site Sources of Health Care

Intent

The intent of this question was to determine if at least part-time medical care for employees is obtained from off-site sources as a result of formal arrangements by plant management.

This item was displayed on the questionnaire as:

17. Do you have a formal arrangement with any outside source (physicians or clinics) to give your employees access to the care of a physician?

- 1 Yes, physician will travel to this facility on call
- 2 Yes, at clinic (not at this facility)
- 3 Yes, physician is based at this facility either full or part-time
- 4 No

Notes

In this context, "formal arrangement with an outside source" was limited to medical care providers who were under contract with the establishment to provide medical medical services, regardless of the location of the practice setting.

If more than one of the positive responses was applicable, then the lowest-numbered response was indicated. For example, if both 17.1 and 17.2 were applicable, then 17.1 was encoded.

Analysis

Three analyses of the responses to question 17 are presented, including one analysis of the responses to questions 16 and 17.

- (1) Response 16.1, 16.2, or 17.3 - Presence of an on-site physician, either employed or contract, for at least part of the hours of facility operation

The estimates of the plants which provide at least part-time health care from an on-site physician, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-22 and III-23, and Tables III-19 and III-20.

**Figure III-22 Employed or contract physician on-site
(by major industrial group)**

Figure III-23	Employed or contract physician on-site (by 2-digit SIC)
Table III-19	Number and percent of plants and employees in plants which have a contract or employed physician on-site at least part time (by major industrial group)
Table III-20	Number and percent of plants and employees in plants which have a contract or employed physician on-site at least part-time (by 2-digit SIC)

- (2) Response 17.1 or 17.3 - Presence of a contract physician to provide health care on-site, either located at the facility or available on-call from another location**

The estimates of the plants which provide at least part-time health care from contract physicians who are either available at the plant or on-call from another location, and the workers in those plants (by number and proportion of the totals) are displayed in Figures III-24 and III-25, and Tables III-21 and III-22.

Figure III-24	On-call or on-site contract physician (by major industrial group)

Table III-21	Number and percent of plants and employees in plants which have at least a part-time on-call or on-site contract physician (by major industrial group)
Table III-22	Number and percent of plants and employees in plants which have at least a part-time on-call or on-site contract physician (by 2-digit SIC)

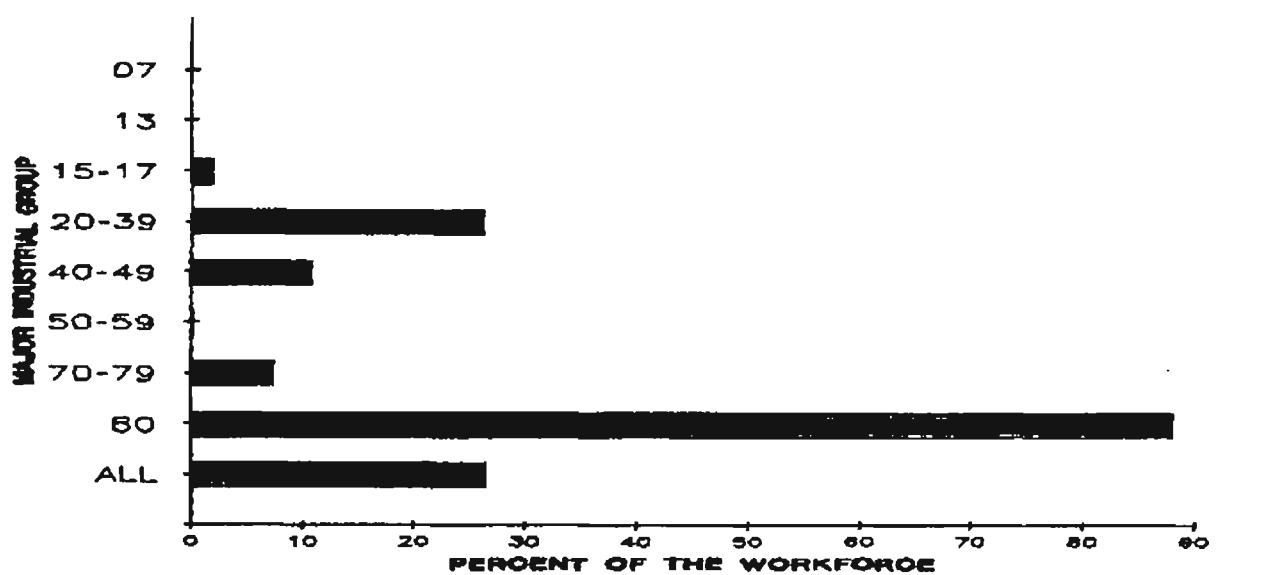

- (3) Response 17.2 - Employee health care provided at an off-site location by contract medical sources**

The estimates of the plants which provide employee health care by contract at an off-site location, and the workers in those plants (by number and proportion of the totals) are displayed in Figures III-26, III-27 and III-28, and Tables III-23 and III-24.

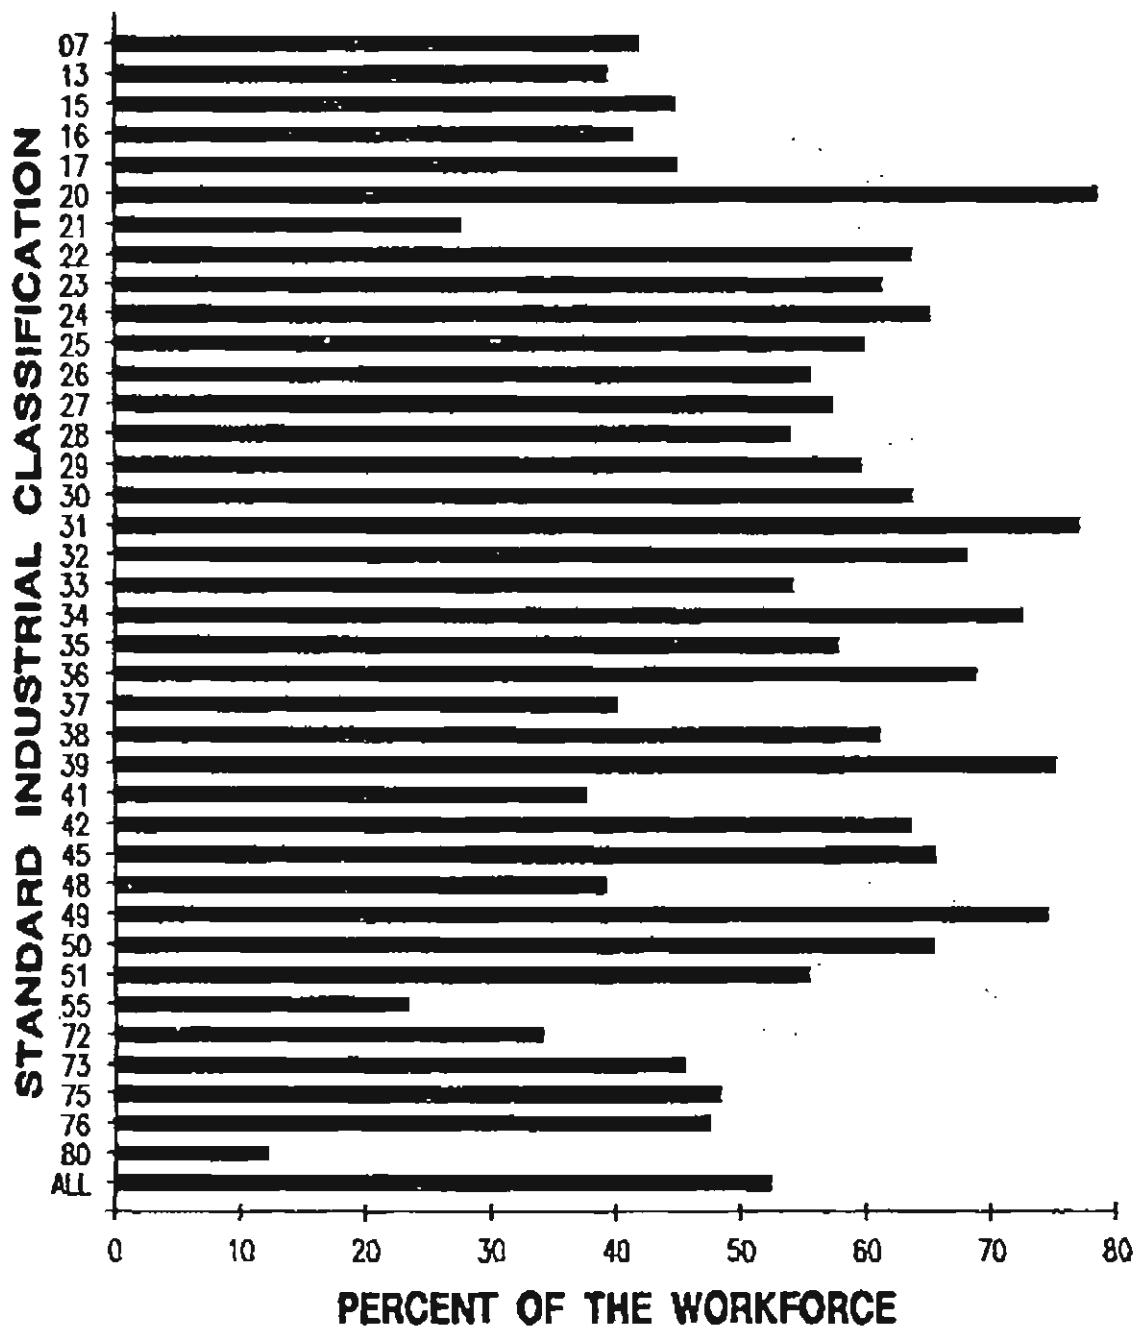

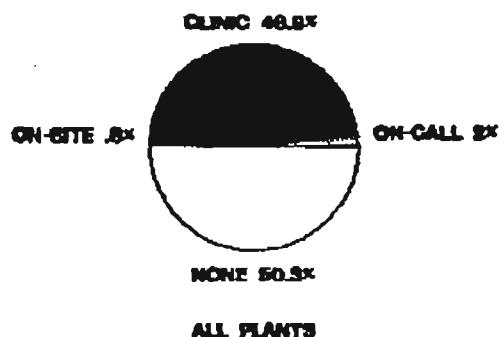

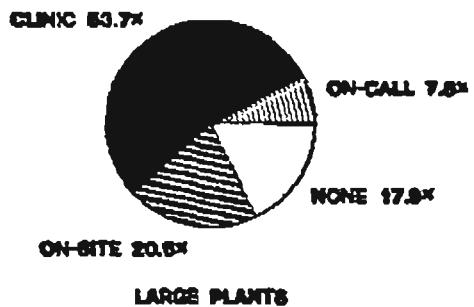

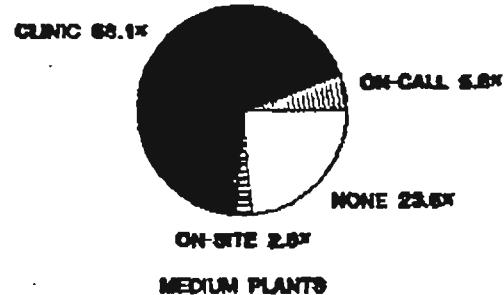

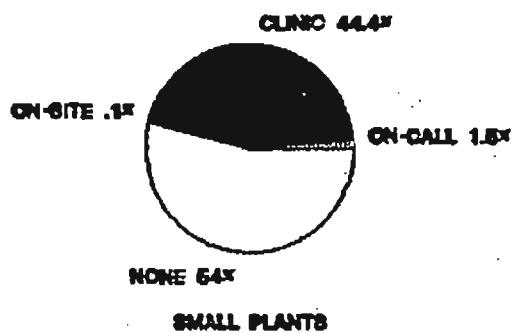

FIGURE III – 28
PLANTS PROVIDING HEALTH CARE BY CONTRACT
(NOES 1981-1983)

HOES QUESTIONNAIRE ITEM NO. 18
Estimated Number of Physician Hours Devoted to Industrial Worker Health Care

Intent

The intent of this question was to determine the amount of physician time devoted to the health care of industrial workers as a result of management policy.

This item was displayed on the questionnaire as:

18. Estimate the average number of physician hours that are devoted to your facility per week.

----- hours per week

Notes

The physician time accounted for here is a measure of the aggregate of: (1) in-house physician time devoted to worker health care; (2) on-call physician time devoted to worker health care; (3) contract physician care provided to workers on-site or off-site as a result of a formal agreement with management (See the Notes section of questionnaire item 17 for further detail).

Physician time spent on other than direct health care (i.e., research) was not included in the responses to this question.

To ensure comparability across industry or facility size strata, the hours per week per facility data was converted to average hours of physician time per week per 10,000 workers.

Many hospitals (SIC 80) interviewed during the survey had very informal mechanisms for assigning physician time to employee health. Basically, this amounted to an employee seeking care from any available resident physician. Because the hospital industry has this unique view of the assignment of physician time to employee health care, data for the hospital industry was not produced for the published analyses of question Number 18. To have included this data would have resulted in very deceptive comparisons with other industries.

Analysis

One analysis of the responses to question 18 is presented.

Response 18 - Average number of physician hours per week per 10,000 workers

The estimated average number of physician hours per week per 10,000 workers devoted to health care are displayed in Figures III-29 and III-30, and Tables III-25 and III-26.

HOES QUESTIONNAIRE ITEM NO. 19
Use of Employed Nurses to Provide Health Care

Intent

The intent of this question is to determine if nursing services are available to employees on a regular basis from nurses employed by the facility.

This item was displayed on the questionnaire as:

19. Does this facility have one or more nurses on the payroll to provide care for employees?

1 Yes

2 No

Notes

Only those situations where Registered Nurses (RN's) or Licensed Practical Nurses (LPN's) were employed by the facility and specifically assigned to provide nursing services during scheduled hours of duty resulted in a positive response to this question.

Personnel undergoing on the job training, paramedics, or "visiting nurses" (from corporate headquarters or government sources) did not satisfy the criteria for a positive response.

Analysis

Two analyses of the responses to question 19 are presented.

- (1) Response 19.1 and 19.2 - Proportion of the industrial facilities which do or do not employ nurses

The estimates of the proportion of the plants which do or do not employ one or more nurses to provide health care to employees are displayed in Figure III-31.

Figure III-31 One or more nurses employed on-site

- (2) Response 19.1 - Presence of employed RN's or LPN's to provide employee health care on-site

The estimates of the plants which employ one or more nurses to provide health care, and the workers in those plants (by number and proportion of the totals) are presented in Figures III-32 and III-33, and Tables III-27 and III-28.

FIGURE III - 33
NURSES EMPLOYED TO PROVIDE HEALTH CARE
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 20
Estimated Number of Nurses Employed to Provide
Health Care to Industrial Workers

Intent

The intent of this question was to determine the number of nurses (Registered or Licensed Practical) employed by industrial facilities.

This item was displayed on the questionnaire as:

20. How many registered nurses and licensed practical nurses are on the payroll at this facility?

RN - - -

LPN - - -

Notes

The number of nurses accounted for in this question includes only those directly employed by management to provide nursing care to employees. They may or may not be on-site (visiting nurse programs), but must be direct employees whose job function is to provide nursing care to the facility's workers.

Student nurses, visiting or detailed nurses from corporate headquarters, government-employed nurses, or paramedical personnel were not included in the responses to this question. See the Notes section of questionnaire items 14 and 19 for further definitions and qualifications.

Again, as in question 18, no hospital (SIC 80) data is presented here. Many hospital respondents gave their total nurse employment as a response, since no formalized program of health care for employees existed.

Analysis

Three analyses of the responses to question 20 are presented.

- (1) Response 20 - Estimated number of Registered Nurses and Licensed Practical Nurses employed by industry

The estimates of the number of Registered and Licensed Practical Nurses employed by industrial facilities to provide nursing care to workers are presented in Tables III-29 and III-30.

- | | |
|--------------|---|
| Table III-29 | Estimated number of Registered and Licensed Practical Nurses employed in industry (by major industrial group) |
| Table III-30 | Estimated number of Registered and Licensed Practical Nurses employed in industry (by 2-digit SIC) |

- (2) Response 20 - Estimated number of nurses (RN or LPN) employed per 10,000 workers

The estimated number of Registered or Licensed Practical Nurses employed per 10,000 workers is displayed in Figures III-34 and III-35, and Tables III-31 and III-32.

Figure III-34	Estimated number of nurses employed per 10,000 workers (by major industrial group)
Figure III-35	Estimated number of nurses employed per 10,000 workers (by 2-digit SIC)
Table III-31	Estimated number of Registered or Licensed Practical Nurses per 10,000 workers (by major industrial group)
Table III-32	Estimated number of Registered or Licensed Practical Nurses per 10,000 workers (by 2-digit SIC)

- (3) Response 20 - Estimated proportions of Registered and Licensed Practical Nurses employed by plant size.

The estimated proportions of Registered and Licensed Practical Nurses employed to provide nursing care to industrial workers by plant size are displayed in Figure III-36.

Figure III-36	Estimated proportions of Registered and Licensed Practical Nurses employed in industry by plant size - excluding hospitals.

ESTIMATED PROPORTION OF R.N.s and L.P.N.s EMPLOYED
IN INDUSTRY BY PLANT SIZE - EXCLUDING HOSPITALS
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 21
Estimated Number of Nurse Hours Devoted to Industrial Worker Health Care

Intent

The intent of this question was to determine the amount of nurse time devoted to the health care of industrial workers as a result of management policy.

This item was displayed on the questionnaire as:

21. Estimate the average number of nursing hours that are devoted to your facility per week.

----- hours

Notes

The nurse time accounted for in the responses to question 21 is an aggregate of: (1) in-house nurse time; (2) nurse time provided on a contractual basis; (3) nurse time provided by corporate nurses who were not direct employees of the surveyed facility; (4) any nurse time devoted to health care of employees, if that time is ultimately paid for by facility management.

Services provided by government-employed nurses are not included.

As explained in the Notes section of questions 18 and 20, nurse hours provided for employee health care in the hospital industry are not presented in these analyses due to the characteristics of employee health care in the hospital industry.

Analysis

Two analyses of the responses to question 21 are presented.

(1) Response 21 - Average number of nurse hours per facility

The estimates of the average number of nurse hours devoted to employee health care per facility per week are displayed in the first four columns of Tables III-33 and III-34.

Table III-33 Average number of nurse hours per facility and per 10,000 workers (by major industrial group)

Table III-34 Average number of nurse hours per facility and per 10,000 workers (by 2-digit SIC)

(2) Response 21 - Average number of nurse hours per 10,000 workers

The estimated average number of nurse hours per week devoted to employee health care per 10,000 workers is displayed in Figures III-37 and III-38, and the second four columns of Tables III-33 and III-34.

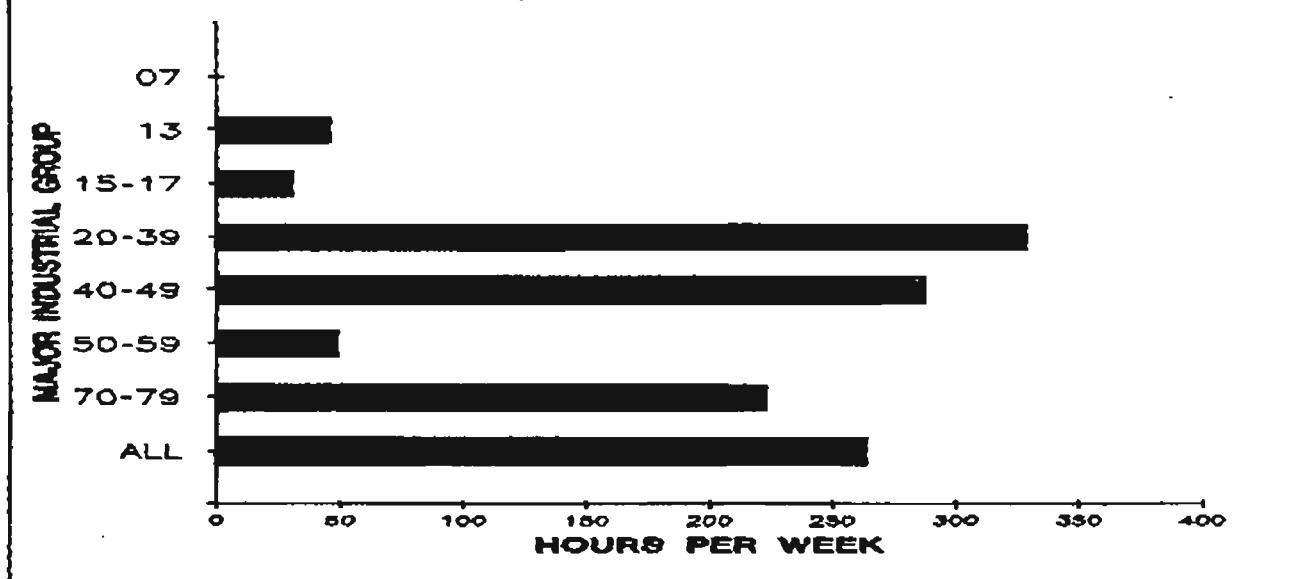

Figure III-37 Estimated number of nurse hours a week per 10,000 workers

 (by major industrial group)

Figure III-38 Estimated number of nurse hours a week per 10,000 workers

NOES QUESTIONNAIRE ITEM NO. 22
Examination or Tests Provided By Industrial Facilities

Intent

The intent of this question was to determine whether there was a company policy to provide preventive medical program services (examinations and tests), and to define which workers received these services on a periodic basis.

This overall item was displayed on the questionnaire as:

22. Do you provide the following examinations or tests to all or to selected groups of employees on a periodic basis?

		<u>Yes, All</u>	<u>Yes, All Exec. & Mgmt Only</u>	<u>Yes, All Production Workers Only</u>	<u>Yes, for Selected Mgmt and/or Production Workers</u>
Ophthalmology	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Audiometric	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Blood tests	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Urine tests	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Pulmonary function	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Chest X-rays	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Allergy/Sensitization	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Immunizations (flu, etc.)	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>

Notes

Each of the five possible answers within each of the eight tests categorized here is separately defined.

- (1) A "no" response indicated that no tests were provided to any worker in the facility.
- (2) A "yes, all" response indicated that an employer provided the specific test or examination to every employee in the facility without regard to that employee's exposure to potential occupational safety and health hazards.
- (3) A "yes, all exec. and mgmt. only" response indicated that examinations or tests were provided only to managerial or executive employees.

- (4) A "yes, all production workers only" response indicated that tests or examinations were provided only to workers directly involved in the production of the commodity or service produced by the facility.
- (5) A "yes, for selected mgmt. and/or production workers" response indicated that some, but not all of the workers in a facility were provided with the specific test or examination.

Because of the many analyses possible on the responses to question 22, some categorization was necessary. Accordingly, the five possible responses to each test/examination inquiry were grouped into one of two general responses.

- (1) Since response 1 ("no"), and response 3 ("yes, all exec. and mgmt. only") indicated that none of the general workforce would have been provided with tests or examinations, they were grouped together for analytical purposes.
- (2) Since response 2 ("all"), response 4 ("yes, all production workers only"), and response 5 ("yes, for selected mgmt. and/or production workers") indicated that at least some of the workers directly involved with the production of a service or commodity would have been provided with tests or examinations, they were grouped together for analytical purposes.

Since some question might exist as to the responses to each of the five possible answers for each question, a graphic representation of the estimated frequency of each of the five responses was produced for each of the eight tests/examinations in question 22.

Due to the number of analyses performed on question No. 22 responses, a listing and discussion of the analyses is presented in both an overview (Tables III-35 through III-44, and Figures III-39 through III-50) and by specific test/examination. Each group of analyses associated with a specific test/examination is presented separately, following an illustration of the specific item on the questionnaire.

Overview Analysis

Five overview analyses of the responses to question No. 22 are presented.

- (1) Response 22.2 - Provision of screening tests to all employees

The estimates of the plants which provide at least one of the eight screening tests or procedures to all workers, and the workers in those plants (by number and proportion of the totals) are displayed in Figures III-39 and III-40, and Tables III-35 and III-36.

Figure III-39 One or more screening tests provided to all workers
(by major industrial group)

Figure III-40 One or more screening tests provided to all workers
(by 2-digit SIC)

Table III-35	Number and percent of plants and employees in plants which provide one or more screening tests to all workers (by major industrial group)
Table III-36	Number and percent of plants and employees in plants which provide one or more screening tests to all employees (by 2-digit SIC)

(2) Response 22.3 - Provision of screening tests to management personnel

The estimates of the plants which provide at least one of the eight screening tests or procedures to management only, and the workers in those plants (by number and proportion of the totals) are displayed in Figures III-41 and III-42, and Tables III-37 and III-38.

Figure III-41	One or more tests provided only to management (by major industrial group)
Figure III-42	One or more tests provided only to management (by 2-digit SIC)
Table III-37	Number and percent of plants and employees in plants which provide one or more screening tests to management only (by major industrial group)
Table III-38	Number and percent of plants and employees in plants which provide one or more screening tests to management only (by 2-digit SIC)

(3) Response 22.4 - Provision of screening tests to production workers only

The estimates of the plants which provide one or more screening tests or procedures to all production workers only, and the workers in those plants (by number and proportion of the totals) are displayed in Figures III-43 and III-44, and Tables III-39 and III-40.

Figure III-43	One or more tests provided to all production workers (by major industrial group)
Figure III-44	One or more tests provided to all production workers (by 2-digit SIC)
Table III-39	Number and percent of plants and employees in plants which provide one or more screening tests to all production workers (by major industrial group)
Table III-40	Number and percent of plants and employees in plants which provide one or more screening tests to production workers (by 2-digit SIC)

(4) Response 22.5 - Provision of screening tests to selected employees

The estimates of the plants which provide at least one of the eight tests or procedures to selected employees only, and the workers in those plants (by number and proportion of the totals) are displayed in Figures III-45 and III-46, and Tables III-41 and III-42.

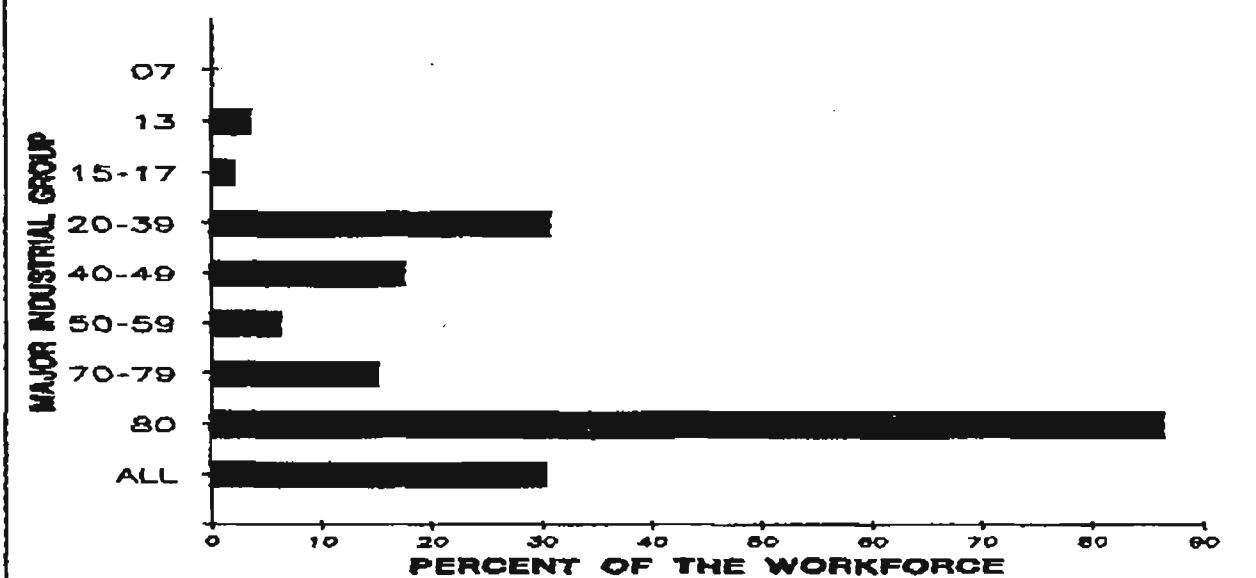

Figure III-45	One or more tests provided to selected workers (by major industrial group)
----------------------	--

WORKERS IN PLANTS PROVIDING SOME TESTS
(NOES 1981-1983)

Analysis of Ophthalmology Testing
(see text on questionnaire item 22 for definitions and notes)

This sub-item was displayed on the questionnaire as:

Ophthalmology 1 2 3 4 5

(Note: Response categories are as shown in the display of question 22.)

Three analyses of the responses to the ophthalmology sub-item are presented.

- (1) Response 2, 4, or 5 - Provision of ophthalmology tests to all, production, or selected workers

The estimates of the plants which provide ophthalmology testing to all workers, production workers or selected workers, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-51 and III-52, and Tables III-45 and III-46.

Figure III-51	Ophthalmology tests provided to all or selected workers (by major industrial group)
Figure III-52	Ophthalmology tests provided to all or selected workers (by 2-digit SIC)
Table III-45	Number and percent of plants and employees in plants which provide ophthalmology tests to all or selected workers (by major industry group)
Table III-46	Number and percent of plants and employees in plants which provide ophthalmology tests to all or selected workers (by 2-digit SIC)

- (2) Response 1 or 3 - No provision of ophthalmology tests, or testing of management personnel only

The estimates of plants which either do not provide any ophthalmology tests or provide them only to management personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-53 and III-54, and Tables III-47 and III-48.

Figure III-53	Ophthalmology tests not provided or for management only (by major industrial group)
Figure III-54	Ophthalmology tests not provided or for management only (by 2-digit SIC)
Table III-47	Number and percent of plants and employees in plants which provide no ophthalmology tests or examine management only (by major industrial group)
Table III-48	Number and percent of plants and employees in plants which provide no ophthalmology tests or examine management only (by 2-digit SIC)

(3) Response 1, 2, 3, 4, or 5 - Provision of ophthalmology tests

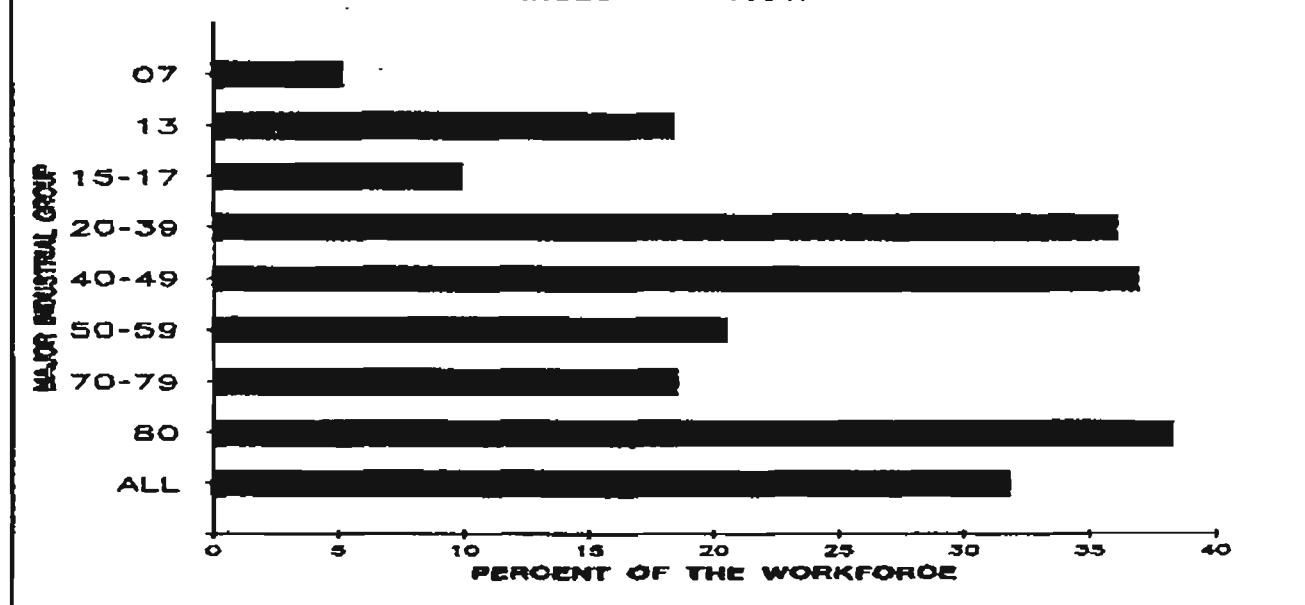

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the ophthalmology inquiry are presented in Figure III-55.

Figure III-55 Provision of ophthalmology tests

Analysis of Audiometric Testing

(see text on questionnaire item 22 for definitions and notes)

This sub-item was displayed on the questionnaire as:

Audiometric 1 2 3 4 5

(Note: Response categories are as shown in the display of question 22)

Three analyses of the responses to the audiometric sub-item are presented.

- (1) Response 2, 4, or 5 - Provision of audiometric tests to all, production, or selected workers

The estimates of the plants which provide audiometric testing to all workers, production workers, or selected workers, and the workers in those plants (by number and proportion of the totals) are displayed in Figures III-56 and III-57, and Tables III-49 and III-50.

Figure III-56 Audiometric tests provided to all or selected workers
(by major industrial group)

Figure III-57 Audiometric tests provided to all or selected workers
(by 2-digit SIC)

Table III-49 Number and percent of plants and employees in plants
which provide audiometric tests to all or selected
workers (by major industrial group)

Table III-50 Number and percent of plants and employees in plants
which provide audiometric tests to all or selected
workers (by 2-digit SIC)

- (2) Response 1 or 3 - No provision of audiometric tests or testing of
management personnel only

The estimates of the plants which either do not provide audiometric tests or provide them only to management personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-58 and III-59, and Tables III-51 and III-52.

Figure III-58 Audiometric tests not provided or for management only
(by major industrial group)

Figure III-59 Audiometric tests not provided or for management only
(by 2-digit SIC)

Table III-51 Number and percent of plants and employees in plants
which provide no audiometric tests or examine management
only (by major industrial group)

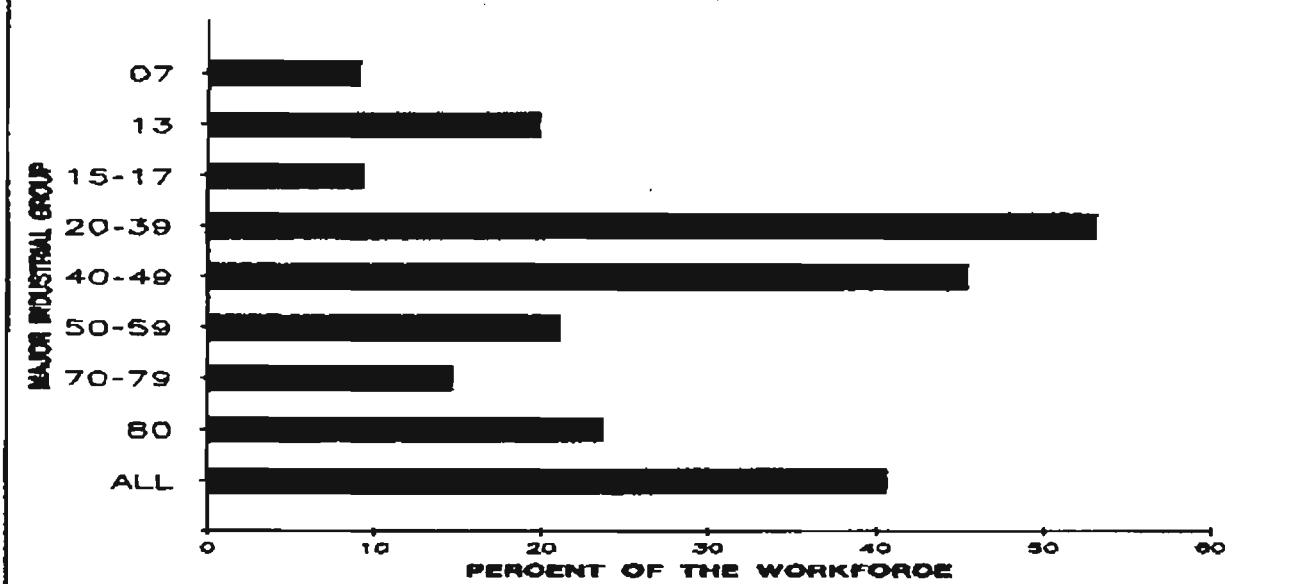

Table III-52 Number and percent of plants and employees in plants
which provide no audiometric tests or examine management
only (by 2-digit SIC)

(3) Response 1, 2, 3, 4, or 5 - Provision of audiometric tests

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the audiometric inquiry are presented in Figure III-60.

Figure III-60 Provision of audiometric tests

Analysis of Blood Testing

(see text on questionnaire item 22 for definitions and notes)

This sub-item was displayed on the questionnaire as:

Blood tests **1** **2** **3** **4** **5**

(Note: Response categories are as shown in the display of question 22)

Three analyses of the responses to the blood testing sub-item are presented.

- (1) Response 2, 4, or 5 - Provision of blood tests to all, production, or selected workers

The estimates of the plants which provide blood tests to all workers, production workers, or selected workers, and the workers in those plants (by number and proportion of the totals) are displayed in Figures III-61 and III-62, and Tables III-53 and III-54.

- Figure III-61** Blood tests provided to all or selected workers
 (by major industrial group)

Figure III-62 Blood tests provided to all or selected workers
 (by 2-digit SIC)

Table III-53 Number and percent of plants and employees in plants
 which provide blood tests to all or selected workers (by
 major industrial group)

Table III-54 Number and percent of plants and employees in plants
 which provide blood tests to all or selected workers (by
 2-digit SIC)

- (2) Response 1 or 3 - No provision of blood tests or testing of management personnel only

The estimates of the plants which either do not provide blood tests, or provide them only to management personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-63 and III-64, and Tables III-55 and III-56.

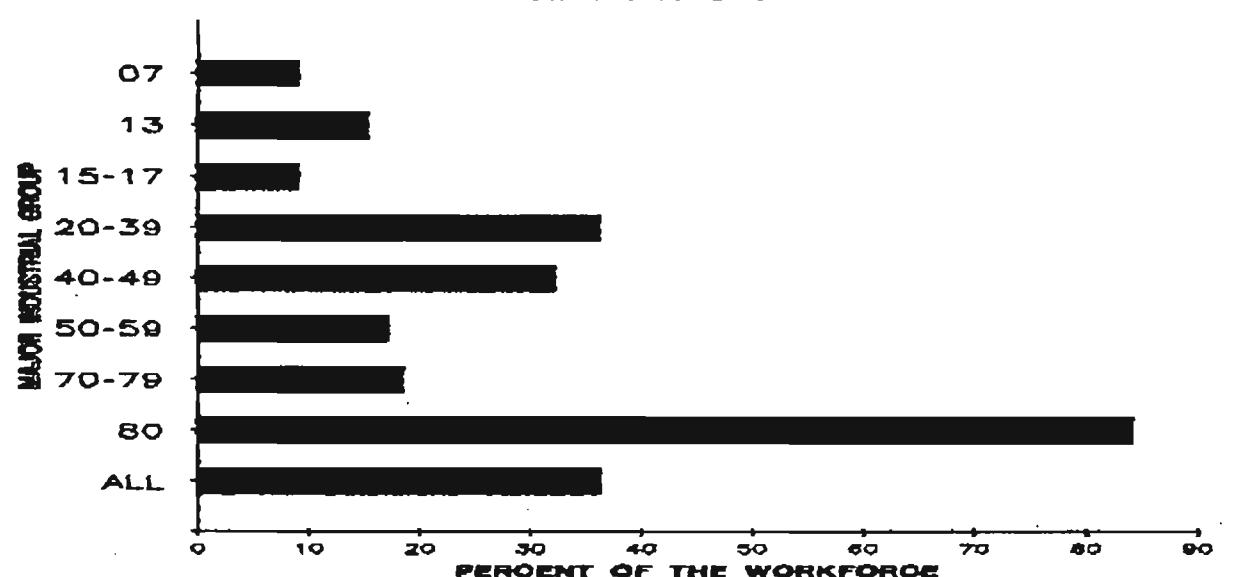

(3) Response 1, 2, 3, 4, or 5 - Provision of blood testing

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the blood test inquiry are presented in Figure III-65.

Figure III-65 Provision of blood tests

Analysis of Urine Testing

(see text on questionnaire item 22 for definitions and notes)

This sub-item was displayed on the questionnaire as:

Urine tests 1 2 3 4 5

(Note: Response categories are as shown in the display of question 22.)

Three analyses of the responses to the urine testing sub-item are presented.

- (1) Response 2, 4, or 5 - Provision of urine tests to all, production, or selected workers

The estimates of the plants which provide urine testing to all workers, production workers, or selected workers, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-66 and III-67, and Tables III-57 and III-58.

Figure III-66	Urine tests provided to all or selected workers (by major industrial group)
Figure III-67	Urine tests provided to all or selected workers (by 2-digit SIC)
Table III-57	Number and percent of plants and employees in plants which provide urine tests to all or selected workers (by major industry group)
Table III-58	Number and percent of plants and employees in plants which provide urine tests to all or selected workers (by 2-digit SIC)

- (2) Response 1 or 3 - No provision of urine tests, or testing of management personnel only

The estimates of plants which either do not provide any urine tests or provide them only to management personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-68 and III-69, and Tables III-59 and III-60.

Figure III-68	Urine tests not provided or for management only (by major industrial group)
Figure III-69	Urine tests not provided or for management only (by 2-digit SIC)
Table III-59	Number and percent of plants and employees in plants which provide no urine tests or examine management only (by major industrial group)
Table III-60	Number and percent of plants and employees in plants which provide no urine tests or examine management only (by 2-digit SIC)

(3) Response 1, 2, 3, 4, or 5 - Provision of urine tests

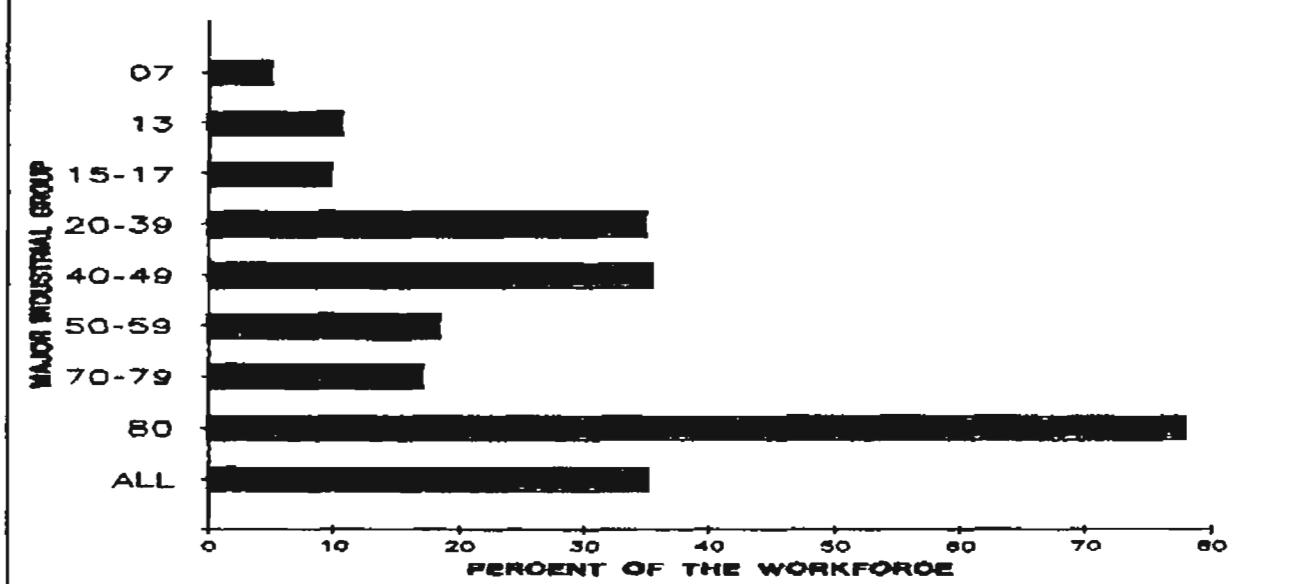

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the urine test inquiry are presented in Figure III-70.

Figure III-70 Provision of urine tests

Analysis of Pulmonary Function Testing
(see text on questionnaire item 22 for definitions and notes)

This sub-item was displayed on the questionnaire as:

Pulmonary function **1** **2** **3** **4** **5**

(Note: Response categories are as shown in the display of question 22.)

Three analyses of the responses to the pulmonary function sub-item are presented.

- (1) Response 2, 4, or 5 - Provision of pulmonary function tests to all, production, or selected workers

The estimates of the plants which provide pulmonary function testing to all workers, production workers, or selected workers, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-71 and III-72, and Tables III-61 and III-62.

Figure III-71 Pulmonary tests provided to all or selected workers (by major industrial group)

**Figure III-72 Pulmonary tests provided to all or selected workers
(by 2-digit SIC)**

Table III-61 Number and percent of plants and employees in plants which provide pulmonary tests to all or selected workers (by major industry group)

Table III-62 Number and percent of plants and employees in plants which provide pulmonary tests to all or selected workers (by 2-digit SIC)

- (2) Response 1 or 3 - No provision of pulmonary function tests, or testing of management personnel only

The estimates of plants which either do not provide any pulmonary function tests or provide them only to management personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-73 and III-74, and Tables III-63 and III-64.

**Figure III-73 Pulmonary tests not provided or for management only
(by major industrial group)**

**Figure III-74 Pulmonary tests not provided or for management only
(by 2-digit SIC)**

Table III-63 Number and percent of plants and employees in plants which provide no pulmonary tests or examine management only (by major industrial group)

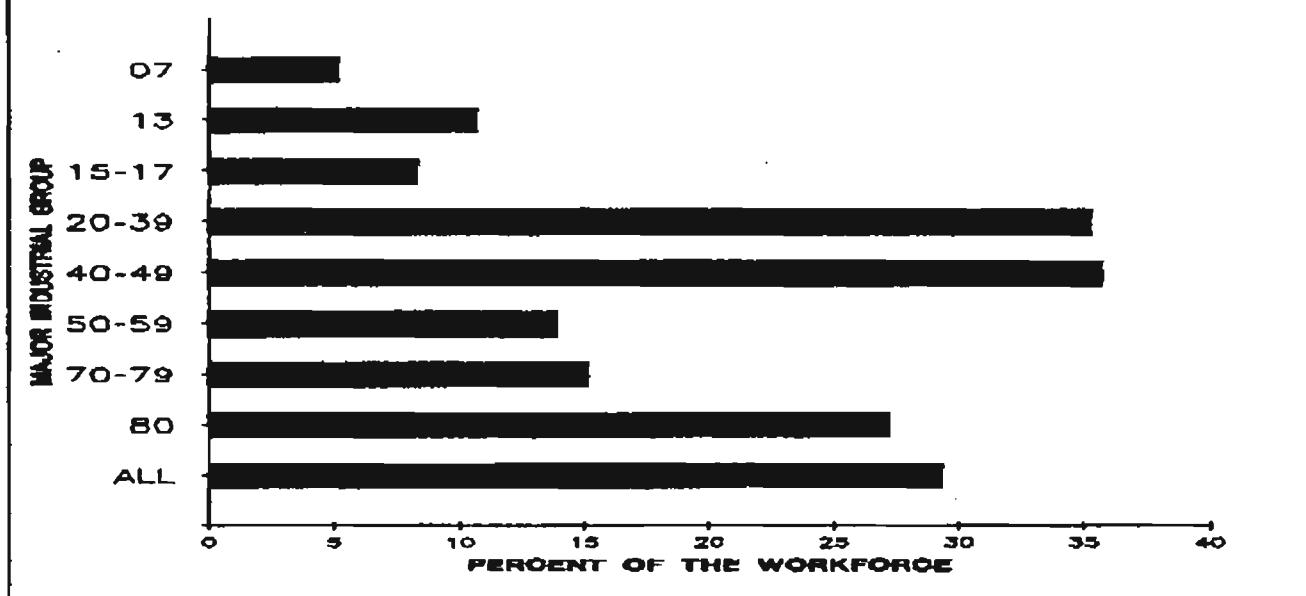

Table III-64 Number and percent of plants and employees in plants which provide no pulmonary tests or examine management only (by 2-digit SIC)

(3) Response 1, 2, 3, 4, or 5 - Provision of pulmonary function tests

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the pulmonary function inquiry are presented in Figure III-75.

Figure III-75 Provision of pulmonary tests

Analysis of Chest X-ray Provision

(see text on questionnaire item 22 for definitions and notes)

This sub-item was displayed on the questionnaire as:

Chest X-rays **1** **2** **3** **4** **5**

(Note: Response categories are as shown in the display of question 22.)

- (1) Response 2, 4, or 5 - Provision of chest x-ray to all, production, or

The estimates of the plants which provide chest x-rays to all workers, production workers or selected workers, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-76 and III-77, and Tables III-65 and III-66.

Figure III-76 Chest x-rays provided to all or selected workers
(by major industrial group)

Figure III-77 Chest x-rays provided to all or selected workers
(by 2-digit SIC)

Table III-65 Number and percent of plants and employees in plants
which provide chest x-rays to all or selected workers
(by major industry group)

Table III-66 Number and percent of plants and employees in plants
which provide chest x-rays to all or selected workers
(by 2-digit SIC)

- (2) Response 1 or 3 - No provision of chest x-rays, or examination of management personnel only

The estimates of plants which either do not provide chest x-rays or provide them only to management personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-78 and III-79, and Tables III-67 and III-68.

Figure III-78 Chest x-rays not provided or for management only
 (by major industrial group)

Figure III-79 Chest x-rays not provided or for management only
 (by 2-digit SIC)

Table III-67 Number and percent of plants and employees in plants
 which provide no chest x-rays or examine management only
 (by major industrial group)

Table III-68 Number and percent of plants and employees in plants
 which provide no chest x-rays or examine management only
 (by 2-digit SIC)

(3) Response 1, 2, 3, 4, or 5 - Provision of chest x-rays

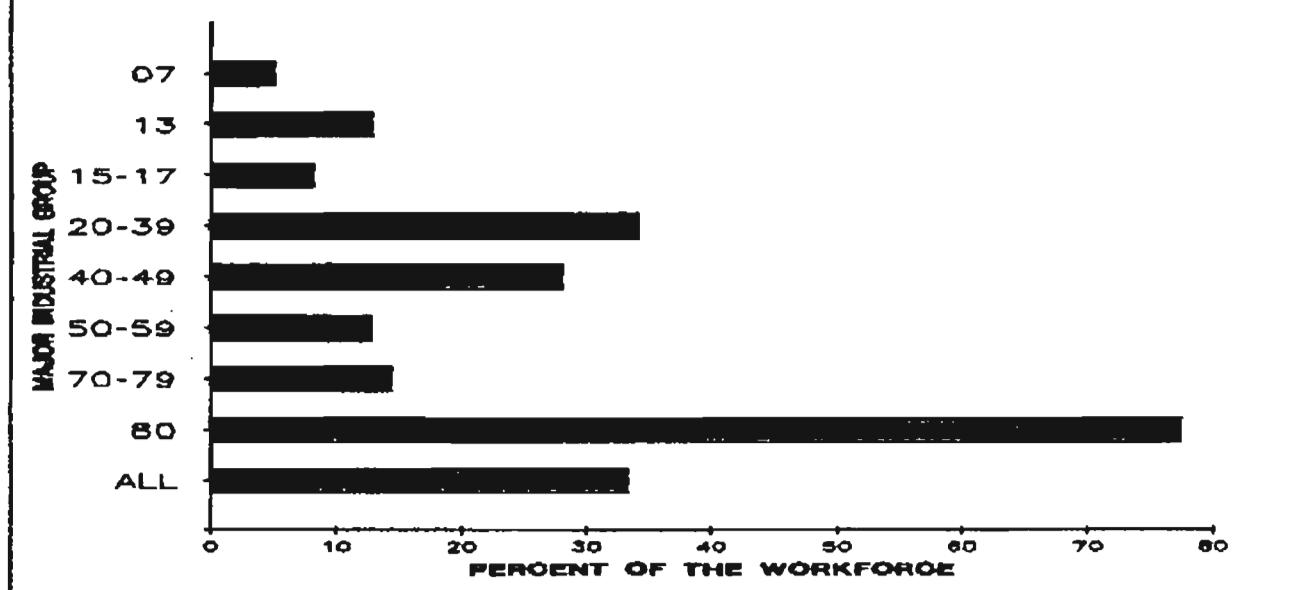

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the chest x-ray inquiry are presented in Figure III-80.

Figure III-80 Provision of chest x-rays

Analysis of Allergy/Sensitization Testing

(see text on questionnaire item 22 for definitions and notes)

This sub-item was displayed on the questionnaire as:

Allergy/Sensitization 1 2 3 4 5

(Note: Response categories are as shown in the display of question 22.)

Three analyses of the responses to the allergy/sensitization sub-item are presented.

- (1) Response 2, 4, or 5 - Provision of allergy/sensitization tests to all, production, or selected workers

The estimates of the plants which provide allergy/sensitization testing to all workers, production workers or selected workers, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-81 and III-82, and Tables III-69 and III-70.

Figure III-81 Allergy tests provided to all or selected workers
(by major industrial group)

Figure III-82 Allergy tests provided to all or selected workers
(by 2-digit SIC)

Table III-69 Number and percent of plants and employees in plants
which provide allergy tests to all or selected workers
(by major industry group)

Table III-70 Number and percent of plants and employees in plants
which provide allergy tests to all or selected workers
(by 2-digit SIC)

- (2) Response 1 or 3 - No provision of allergy/sensitization tests, or testing of management personnel only

The estimates of plants which either do not provide any allergy/sensitization tests or provide them only to management personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-83 and III-84, and Tables III-71 and III-72.

Figure III-83 Allergy tests not provided or for management only
(by major industrial group)

Figure III-84 Allergy tests not provided or for management only
(by 2-digit SIC)

Table III-71 Number and percent of plants and employees in plants
which provide no allergy tests or examine management
only (by major industrial group)

Table III-72 Number and percent of plants and employees in plants
which provide no allergy tests or examine management
only (by 2-digit SIC)

(3) Response 1, 2, 3, 4, or 5 - Provision of allergy/sensitization tests

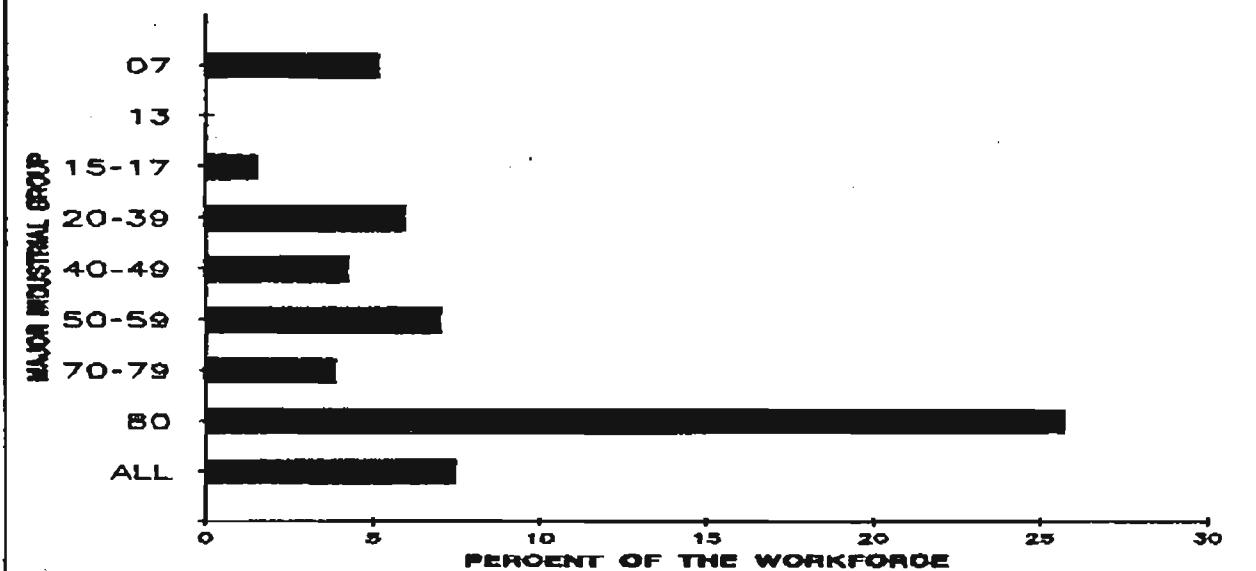

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the allergy/sensitization inquiry are presented in Figure III-85.

Figure III-85 Provision of allergy tests

Analysis of Immunization Provision

(see text on questionnaire item 22 for definitions and notes)

This sub-item was displayed on the questionnaire as:

Immunizations (flu, etc.) 1 2 3 4 5

(Note: Response categories are as shown in the display of question 22.)

Three analyses of the responses to the immunization sub-item are presented.

- (1) Response 2, 4, or 5 - Provision of immunizations to all, production, or selected workers

The estimates of the plants which provide immunizations to all workers, production workers or selected workers, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-86 and III-87, and Tables III-73 and III-74.

Figure III-86	Immunizations provided to all or selected workers (by major industrial group)
Figure III-87	Immunizations provided to all or selected workers (by 2-digit SIC)
Table III-73	Number and percent of plants and employees in plants which provide immunizations to all or selected workers (by major industry group)
Table III-74	Number and percent of plants and employees in plants which provide immunizations to all or selected workers (by 2-digit SIC)

- (2) Response 1 or 3 - No provision of immunizations, or testing of management personnel only

The estimates of plants which either do not provide any immunizations or provide them only to management personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-88 and III-89, and Tables III-75 and III-76.

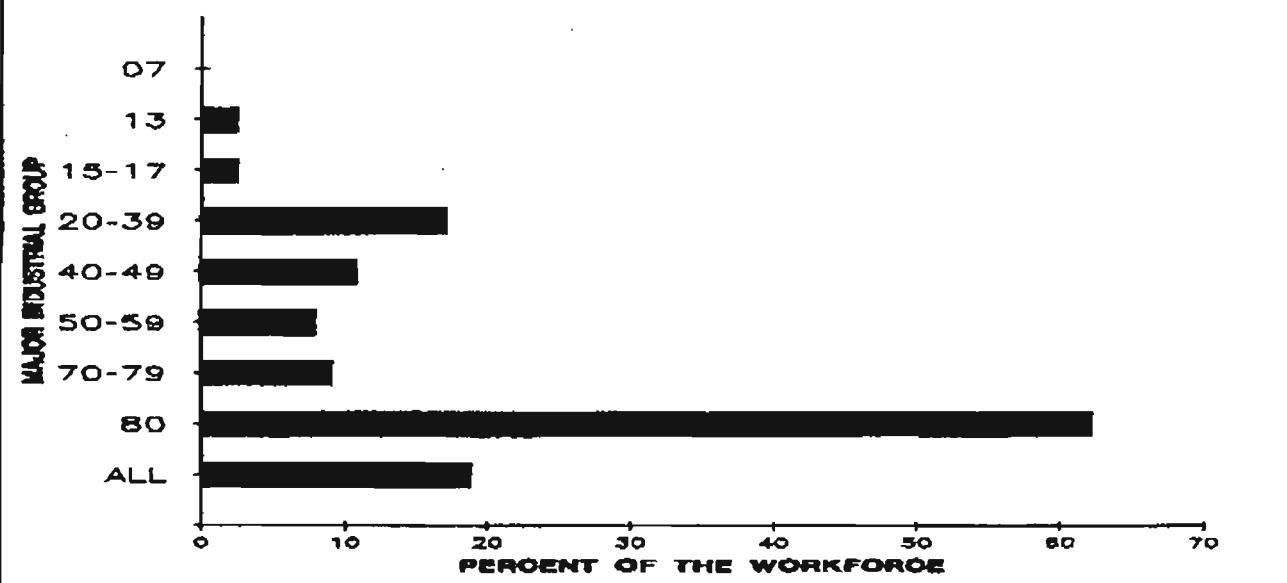

Figure III-88	Immunizations not provided or for management only (by major industrial group)
Figure III-89	Immunizations not provided or for management only (by 2-digit SIC)
Table III-75	Number and percent of plants and employees in plants which provide no immunizations or immunize management only (by major industrial group)
Table III-76	Number and percent of plants and employees in plants which provide no immunizations or immunize management only (by 2-digit SIC)

(3) Response 1, 2, 3, 4, or 5 - Provision of immunization

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the immunization inquiry are presented in Figure III-90.

Figure III-90 Provision of immunizations

NOES QUESTIONNAIRE ITEM NO. 23
Required Pre-placement or Pre-hiring Examinations

Intent

The intent of this question was to determine if an industrial facility required a medical examination of a worker's health before hiring or placing them in a new position.

This item was displayed on the questionnaire as:

Before new employees are
hired or placed, are they
required to take a medical
examination?

1 2 3 4 5

Notes

A medical examination in this inquiry was defined as those lists, procedures, or observations of a worker's health status performed by or under the supervision of a physician. This could range from a physician interview to a comprehensive physical examination involving lab tests.

Examinations by a worker's private physician are included if the results are submitted to facility management. Sight or audio screening tests are also included if the results are reviewed by a physician, and records are submitted to management.

Examinations not performed by, or under the supervision of a physician (including review/evaluation) did not constitute a positive response to this inquiry.

Analysis

Three analyses of the responses to question 23 are presented.

- (1) Response 23.2, 23.4, or 23.5 - Pre-placement examinations required for all, production, or selected workers

The estimates of the plants which have required medical examinations prior to hiring or new placement, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-91 and III-92, and Tables III-77 and III-78.

Figure III-91 Pre-placement exams required for all or selected workers (by major industrial group)

Figure III-92 Pre-placement exams required for all or selected workers (by 2-digit SIC)

Table III-77 Number and percent of plants and employees in plants which require a medical examination before hiring or placement (by major industrial group)

Table III-78 Number and percent of plants and employees in plants which require a medical examination before hiring or placement (by 2-digit SIC)

- (2) Response 23.1 or 23.3 - Pre-placement examinations not required, or required only for management personnel

The estimates of the plants which do not require pre-hiring or pre-placement examinations, or require them only for management personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-93 and III-94, and Tables III-79 and III-80.

Figure III-93 Pre-placement exams not required or for management only (by major industrial group)

Figure III-94 Pre-placement exams not required or for management only (by 2-digit SIC)

Table III-79 Number and percent of plants and employees in plants which do not require pre-placement examinations or examine management only (by major industrial group)

Table III-80 Number and percent of plants and employees in plants which do not require pre-placement examinations or examine management only (by 2-digit SIC)

- (3) Response 23.1, 23.2, 23.3, 23.4, or 23.5 - Required pre-hiring or pre-placement examinations

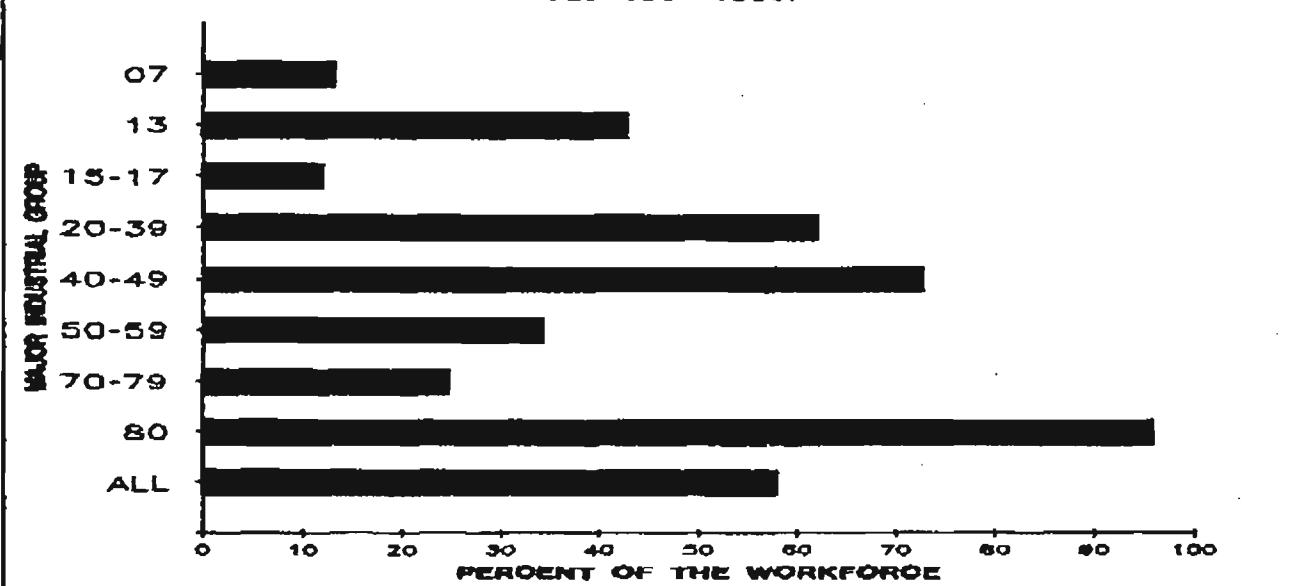

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the pre-placement inquiry are displayed in Figure III-95.

WORKERS

NOES QUESTIONNAIRE ITEM NO. 24
Recording of Health Information On New Employees

Intent

The intent of this question was to determine if the facility recorded health information on new employees on some regular form.

This item was displayed on the questionnaire as:

Do you record health
information about a
new employee on some
regular form?

1 2 3 4 5

Notes

Health information refers to any data on employee health, ranging from the results of a complete physical to a simple verbal interview regarding the worker's health, so long as the results are recorded and kept on file.

Acceptable health information may be derived from pre-employment physicals, medical histories, interviews, and from data on existing physical defects.

Information from physiological tests was excluded as a positive response when obtained for other than health reasons.

A regular form is any standardized documentation which is retained in the employee's file or as part of his or her medical history.

Any written record was regarded as a positive response to the question as long as the recording process was consistent for the designated employee group.

Analysis

Three analyses of the responses to question 24 are presented.

- (1) Response 24.2, 24.4, or 24.5 – Recording of health information on all, production, or selected workers

The estimates of the plants which record and store health information on all workers, production workers, or selected workers, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-96 and III-97, and Tables III-81 and III-82.

Figure III-96 Health information recorded on all or selected new workers (by major industrial group)

Figure III-97	Health information recorded on all or selected new workers (by 2-digit SIC)
Table III-81	Number and percent of plants and employees in plants which record health information on all or selected workers (by major industrial group)
Table III-82	Number and percent of plants and employees in plants which record health information on all or selected workers (by 2-digit SIC)

- (2) Response 24.1 or 24.3 - Health information not recorded, or recorded for management personnel only**

The estimates of the plants which either do not record health information, or record it for management personnel only, and the workers in those plants (by number and proportion of the totals) are displayed in Figures III-98 and III-99, and Tables III-83 and III-84.

Figure III-98	Health information not recorded or for management only (by major industrial group)
Figure III-99	Health information not recorded or for management only (by 2-digit SIC)
Table III-83	Number and percent of plants and employees in plants which do not record health information or do so only for management (by major industrial group)
Table III-84	Number and percent of plants and employees in plants which do not record health information or do so only for management (by 2-digit SIC)

- (3) Response 24.1, 24.2, 24.3, 24.4, or 24.5 - Recording of health information**

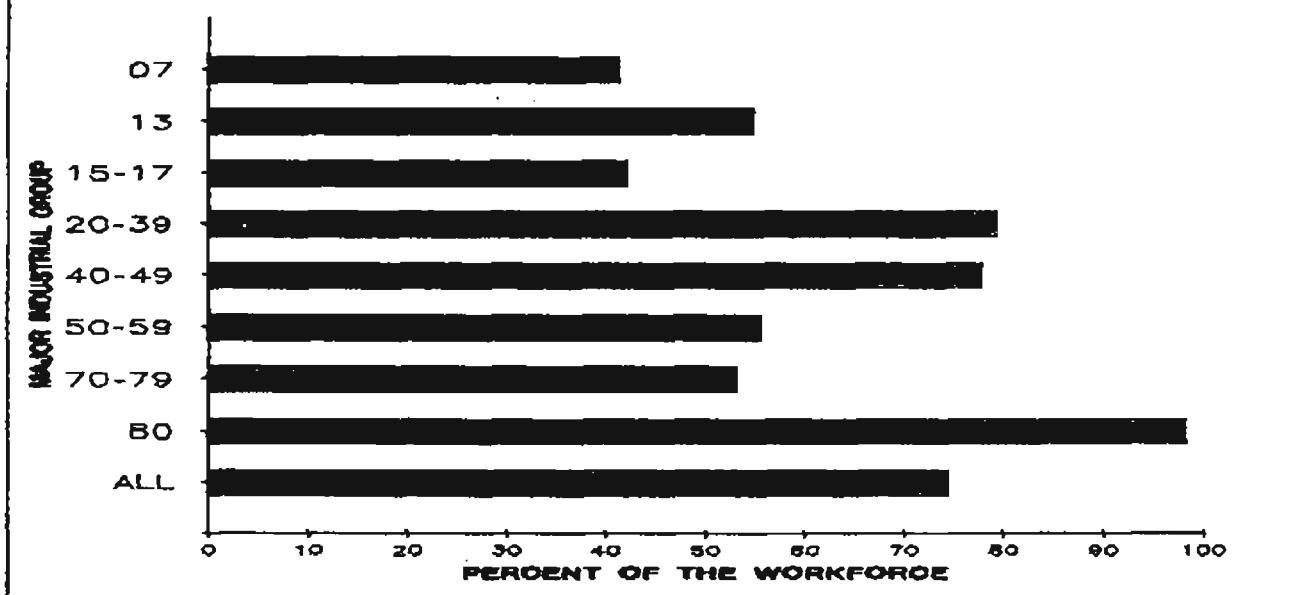

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the health Information Inquiry are displayed in Figure III-100.

...No facilities observed.

MOES QUESTIONNAIRE ITEM NO. 25
Required Post-Illness Medical Examinations

Intent

The intent of this question was to determine if the facility required medical examinations to determine the fitness of an employee returning to work after an illness, and to determine if specific types of workers were covered by this policy.

This item was displayed on the questionnaire as:

Do you require medical
examinations of your
employees who return
to work after an illness?

1 2 3 4 5

Notes

Under the definition of a medical examination given in the discussion of questionnaire item No. 23, a positive response was recorded even if the policy of the facility required examinations only for certain occupations or categories of absence. Examinations performed by the worker's private physician resulting in a written statement that the employee is fit to return to work also resulted in a positive response.

Examinations voluntarily undertaken by an employee following an illness do not result in a positive response to this question, as they were not required.

Analysis

Three analyses of the responses to question 25 are presented.

- (1) Response 25.2, 25.4, or 25.5 - Post-illness medical examinations required for all, production, or selected workers

The estimates of the plants which require post-illness medical examinations for all workers, production workers, or selected workers, and the workers in those plants (by number and proportion of the totals) are displayed in Figures III-101 and III-102, and Tables III-85 and III-86.

Figure III-101 Post-illness exams required for all or selected workers
(by major industrial group)

Figure III-102 Post illness exams required for all or selected workers
(by 2-digit SIC)

Table III-85	Number and percent of plants and employees in plants which require post-illness examinations of all or selected workers (by major industrial group)
Table III-86	Number and percent of plants and employees in plants which require post-illness examinations of all or selected workers (by 2-digit SIC)

- (2) Response 25.1 or 25.3 - Post-illness medical examinations not required, or required for management personnel only

The estimates of the plants which either do not require post-illness medical examinations or require them only for management personnel, and workers in those plants (by number and proportion of the totals) are displayed in Figure III-103 and III-104, and Tables III-87 and III-88.

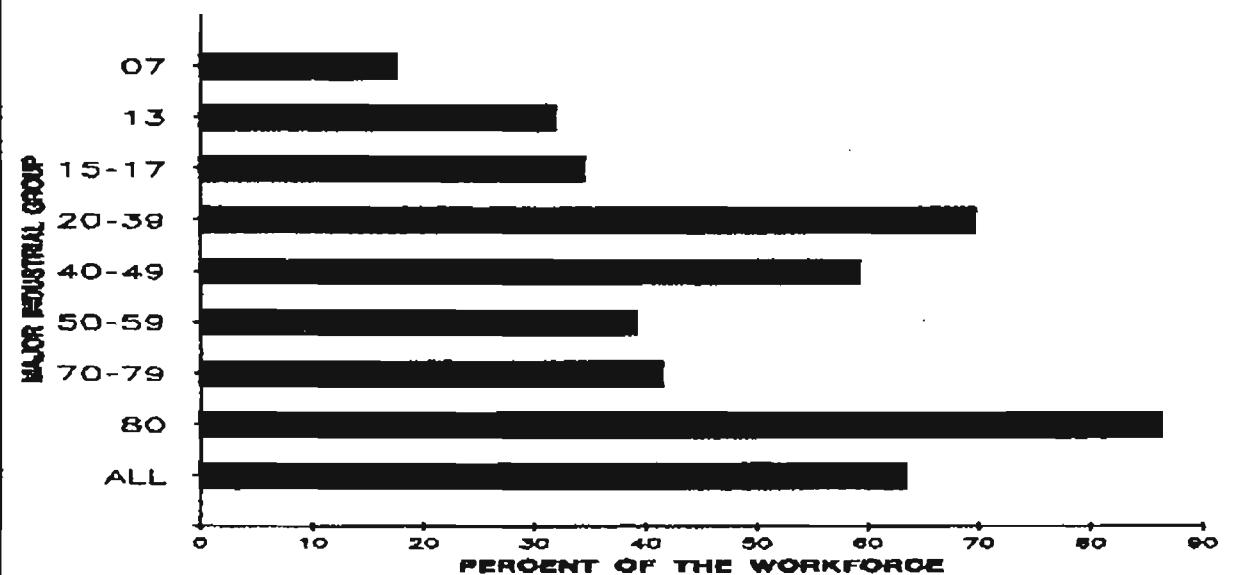

Figure III-103	Post-illness exams not required or for management only (by major industrial group)
Figure III-104	Post-illness exams not required or for management only (by 2-digit SIC)
Table III-87	Number and percent of plants and employees in plants which do not require post-illness examinations or examine management only (by major industrial group)
Table III-88	Number and percent of plants and employees in plants which do not require post-illness examinations or examine management only (by 2-digit SIC)

- (3) Response 25.1, 25.2, 25.3, 25.4, or 25.5 - Required post-illness medical examinations

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the post-illness examination inquiry are displayed in Figure III-105.

Figure III-105 Post-illness examination required

FIGURE III - 105
POST-ILLNESS EXAMINATIONS REQUIRED
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 26
Required Exit Medical Examinations

Intent

The intent of this question was to determine if the facility required medical examinations upon termination of employment, and if specific employee groups were affected by this policy.

This item was displayed on the questionnaire as:

Do you require medical examinations of your employees when their employment is terminated? (Exit examination)

1 2 3 4 5

Notes

All examinations performed by or under the supervision of a physician which were required upon the termination of a worker's employment would be included as a positive response to this inquiry.

No voluntary examinations were accepted as a positive response.

Analysis

Three analyses of the responses to question 26 are presented.

- (1) Response 26.2, 26.4, or 26.5 - Exit examinations required for all, production or selected workers

The estimates of the plants which require exit examinations for all workers, production workers, or selected workers, and workers in those plants (by number and proportion of the totals) are displayed in Figures III-106 and III-107, and Tables III-89 and III-90.

Figure III-106 Exit exams required for all or selected workers
(by major industrial group)

Figure III-107 Exit exams required for all or selected workers
(by 2-digit SIC)

Table III-89 Number and percent of plants and employees in plants
which require exit examinations for all or selected
workers (by major industrial group)

Table III-90 Number and percent of plants and employees in plants
which require exit examinations for all or selected
workers (by 2-digit SIC)

(2) Response 26.1 or 26.3 - Exit examinations not required, or required for management only

The estimates of the plants which either do not require exit examinations, or require them for management personnel only, and the workers in those plants (by number and proportion of the totals) are displayed in Figures III-108 and III-109, and Tables III-91 and III-92.

Figure III-108 Exit exams not required or for management only
(by major industrial group)

Figure III-109 Exit exams not required or for management only
(by 2-digit SIC)

Table III-91 Number and percent of plants and employees in plants which do not require exit exams or examine management only (by major industrial group)

Table III-92 Number and percent of plants and employees in plants which do not require exit exams or examine management only (by 2-digit SIC)

(3) Response 26.1, 26.2, 26.3, 26.4, or 26.5 - Required exit medical examinations

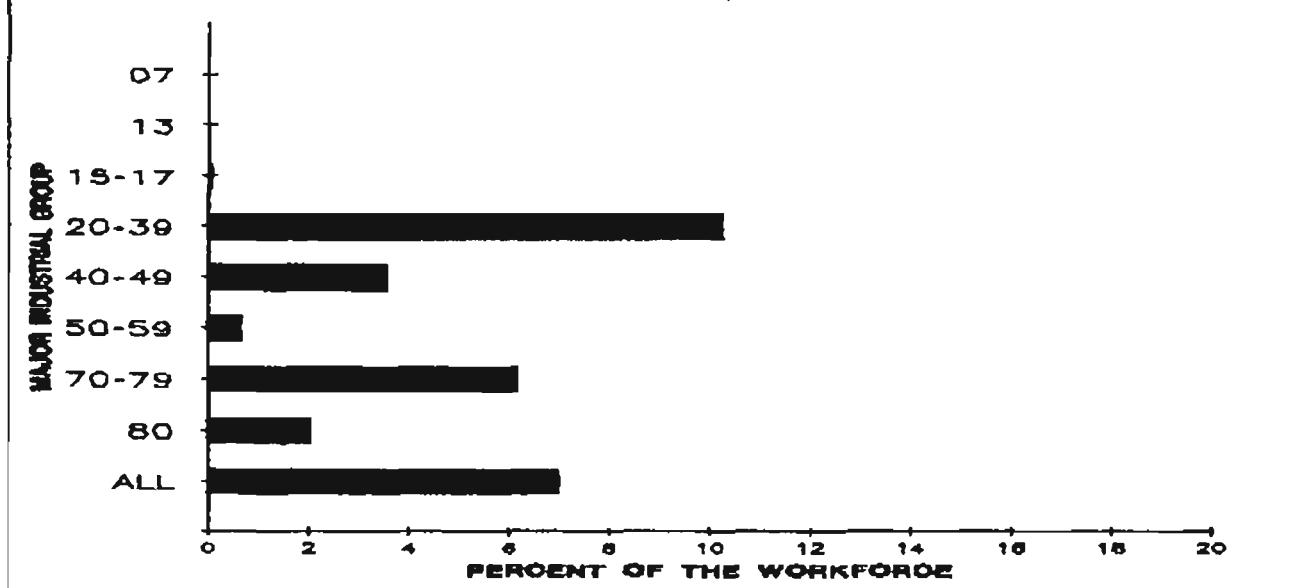

The estimated proportions of plants and workers in those plants corresponding to each of the five possible responses to the exit examination inquiry are displayed in Figure III-110.

MOES QUESTIONNAIRE ITEM NO. 27
Retention of Medical Records

Intent

The intent of this question was to determine the surveyed facility's management policy on the length of time that employee medical records are retained.

This item was displayed on the questionnaire as:

27. How long are medical records and other health information records retained?

— — — Years (If "forever" code "999")
(If "unknown" code "U K")

Notes

Record keeping systems (personnel or time keeping) were excluded from consideration unless they made specific provision for the inclusion of medical and/or health-related records.

Three classes of responses to question 27 were possible. In analyzing the survey data, it was decided that responses of unknown (UK) should be discarded since no real analytical process was possible. A "forever" (999) response did not allow for specificity, so analysis was performed to estimate the number of plants, and workers in those plants, where medical or health-related records were retained "forever". Approximately 43% of all plants, employing about 56% of the workforce in the survey sample frame, fall into this category.

The remaining respondents gave a specific ("non-forever") value which could be analyzed. These responses were averaged across the estimated populations of plants and workers.

Analysis

Two analyses of the responses to question 27 are presented.

- (1) Response 27 - Average number of "non-forever" years that medical records are retained

Estimates of the average "non-forever" retention periods for medical or health-related records are displayed in Figures III-111 and III-112, and Tables III-93 and III-94.

Figure III-111 Average number of "non-forever" years plants keep medical records

 (by major industrial group)

Figure III-112 Average number of "non-forever" years plants keep medical records

 (by 2-digit SIC)

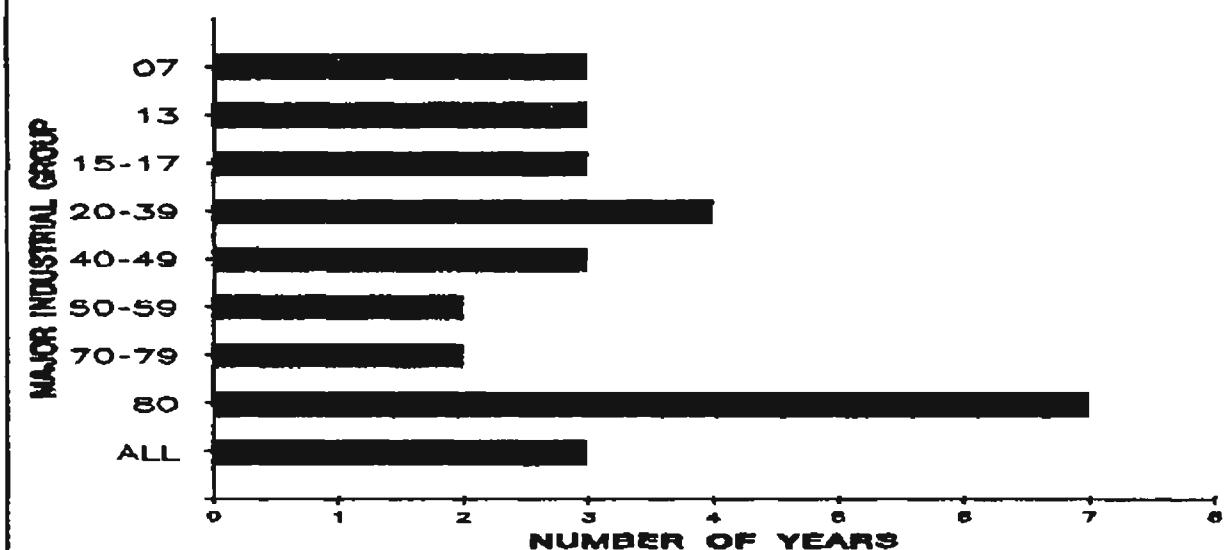

Table III-93	Average number of years facilities keep medical records among plants not reporting "forever" (by major industrial group)
Table III-94	Average number of years facilities keep medical records among plants not reporting "forever" (by 2-digit SIC)

(2) Response 27 - Number of plants retaining medical records "forever"

The estimates of the plants which keep medical or health-related records "forever", and workers in those plants (by number and proportion of the totals) are displayed in Figures III-113 and III-114, and Tables III-95 and III-96.

Figure III-113	Proportion of plants which keep medical records "forever" (by major industrial group)
Figure III-114	Proportion of plants which keep medical records "forever" (by 2-digit SIC)
Table III-95	Number and percent of plants and employees in plants which keep medical records "forever" (by major industrial group)
Table III-96	Number and percent of plants and employees in plants which keep medical records "forever" (by 2-digit SIC)

**NATIONAL OCCUPATIONAL EXPOSURE SURVEY
(1981-1983)
Analyses of Management Interview Responses**

Section IV - Industrial Hygiene and Safety Practices

- employed health/safety personnel - personal protective equipment required
- number of health/safety personnel - provision of personal protective gear
- industrial hygiene consultation - servicing of personal protective gear
- occupational safety consultation - enforcement of personal protective gear use
- physical agent monitoring - economic penalties used
- physical agent records - economic penalties assessed
- fume, gas monitoring - safety inspections
- direct reading instruments used - written safety reports
- fume monitoring records - safety inspections reported to workers
- chemical substitution - preventive maintenance
- substitution to reduce exposure - safety training
- substitution due to inspection - safety rule assessment
- equipment or process modifications - safety rule enforcement
- modifications to reduce exposure - economic penalties used
- modifications due to inspection - economic penalties assessed
- nature of modifications - recirculation of exhaust air

NOES QUESTIONNAIRE ITEM NO. 28
Employment of Occupational Safety or Occupational Health Personnel

Intent

The intent of this question was to determine if the facility employed individuals whose primary responsibilities were to prevent injuries and illnesses.

This item was displayed on the questionnaire as:

28. Do you employ full-time individuals at this facility whose major responsibilities are in the area of prevention of occupational injuries or illnesses?

- 1 Yes, injury prevention
- 2 Yes, illness prevention
- 3 Yes, both injuries and illnesses
- 4 No (Skip to Question 30).

Notes

Injury prevention is the recognition, evaluation and control of occupational safety hazards. Injury prevention activities include, but are not limited to: inspection for fire hazards; inspection for safety guards on machinery; conduct of safety and first aid training; and evaluation of the environment for compliance with OSHA regulations.

Illness prevention is the recognition, evaluation and control of occupational health hazards. Illness prevention activities include, but are not limited to: the evaluation of occupational stress and the potential for impairment of worker health; prescribing methods for the necessary control or elimination of such stress based on experience and quantitative measurements; the collection of gases, or other forms of potentially toxic agents for analysis; and development of educational programs for employees.

Injury or illness prevention personnel were counted on the survey only if the individual(s) spent more than 50% of their time on such duties.

Injury or illness prevention activities performed by government or visiting corporate headquarters personnel were excluded. Personnel involved in direct delivery of medical care (doctors, nurses, etc.) who spent less than 50% of their time in injury or illness prevention programs were excluded.

Analysis

Three analyses of the responses to question 28 are presented.

(1) Response 28.1 - Injury prevention personnel employed

The estimates of the plants which employ full-time individuals whose major responsibilities are the prevention of occupational injuries,

and workers in those plants (by number and proportion of the total) are displayed in Figures IV-1 and IV-2, and Tables IV-1 and IV-2.

Figure IV-1	Occupational safety personnel employed on-site (by major industrial group)
Figure IV-2	Occupational safety personnel employed on-site (by 2-digit SIC)
Table IV-1	Number and percent of plants and employees in plants which employ occupational safety personnel (by major industrial group)
Table IV-2	Number and percent of plants and employees in plants which employ occupational safety personnel (by 2-digit SIC)

(2) Response 28.2 - Illness prevention personnel employed

The estimates of the plants which employ full-time individuals whose major responsibilities are the prevention of occupational illness, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-3 and IV-4, and Tables IV-3 and IV-4.

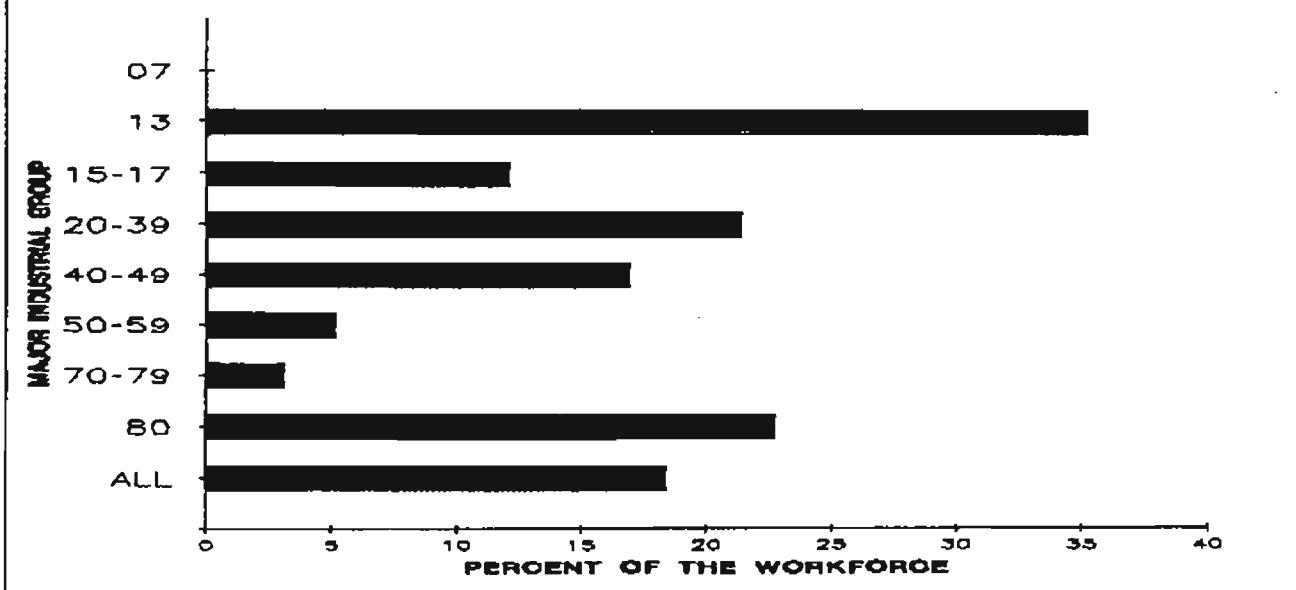

Figure IV-3	Occupational health personnel employed on-site (by major industrial group)
Figure IV-4	Occupational health personnel employed on-site (by 2-digit SIC)
Table IV-3	Number and percent of plants and employees in plants which employ occupational health personnel (by major industrial group)
Table IV-4	Number and percent of plants and employees in plants which employ occupational health personnel (by 2-digit SIC)

(3) Response 28.1, 28.2, or 28.3 - Injury and/or illness prevention personnel employed

The estimates of the plants which employ full-time individuals whose major duties are the prevention of either occupational injury or illness, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-5, IV-6, and IV-7, and Tables IV-5 and IV-6.

Figure IV-5	Occupational health and/or safety personnel on-site (by major industrial group)
Figure IV-6	Occupational health and/or safety personnel on-site (by 2-digit SIC)
Figure IV-7	Plants with health or safety personnel
Table IV-5	Number and percent of plants and employees in plants which employ occupational safety and/or health personnel (by major industrial group)
Table IV-6	Number and percent of plants and employees in plants which employ occupational safety and/or health personnel (by 2-digit SIC)

NOES QUESTIONNAIRE ITEM NO. 29
Occupational Health and Safety Specialists and Their Activities

Intent

The intent of this question was to determine the number of occupational health and safety specialists employed by industry and to describe their major duties.

This item was displayed on the questionnaire as:

29. How many full-time occupational health and safety specialists are employed at this facility?

Safety (injuries)
 Health (illnesses)

For each of those individuals, please write in the appropriate activity number from the activity clusters listed below:

CLUSTER NO.

Individual #1 _	1: Administers (directs, manages) Plans and develops programs, Advises top level management.
Individual #2 _	2: Inspects work place to identify hazards. Investigates to determine the cause of injuries/illnesses.
Individual #3 _	3: Analyzes plans or specs. to identify hazards, develops operating procedures to control hazards.
Individual #4 _	4: Provides education and training
Individual #5 _	5: Performs and analyzes tests to monitor for the presence of dusts, gases, etc.
Individual #6 _	6: Performs engineering design to control hazards
Individual #7 _	
Individual #8 _	
Individual #9 _	
Individual #10 _	
Individual #11 _	
Individual #12 _	

Notes

Occupational health and safety personnel were described in the text for questionnaire item number 28.

Persons included or excluded by these descriptions are also defined in the questionnaire item number 28 text.

The assignment of one of the activity cluster numbers to one or more of the individuals employed within a facility was based on agreement of that person's duties to the description given, and performance of task(s) outlined by the activity description for more than 50% of his or her working time.

Analysis

Three analyses of the responses to question 29 are presented.

(1) Response 29 - Estimated number of occupational health and safety specialists

Estimates of the number of occupational health and safety specialists employed in the NOES sampling frame are displayed in Figures IV-8, IV-9, and IV-10, and Tables IV-7 and IV-8.

Figure IV-8	Estimated number of occupational health and safety professionals employed in industry (by major industrial group)
Figure IV-9	Estimated number of occupational health and safety professionals employed in industry (by 2-digit SIC)
Figure IV-10	Estimated proportions of occupational health or safety personnel employed by plant size
Table IV-7	Estimated number of occupational health and safety specialists employed in industry (by major industrial group)
Table IV-8	Estimated number of occupational health and safety specialists employed in industry (by 2-digit SIC)

(2) Response 29 - Estimated number of occupational health or safety specialists employed per 10,000 workers

Estimates of the number of occupational health and safety specialists employed by industry for each 10,000 workers are displayed in Figures IV-11 and IV-12, and Tables IV-9 and IV-10.

Figure IV-11	Estimated number of occupational health or safety personnel employed per 10,000 workers (by major industrial group)
Figure IV-12	Estimated number of occupational health or safety personnel employed per 10,000 workers (by 2-digit SIC)
Table IV-9	Estimated number of occupational health and safety professionals employed per 10,000 workers (by major industrial group)
Table IV-10	Estimated number of occupational health and safety professionals employed per 10,000 workers (by 2-digit SIC)

(3) Response 29 (activities) - Major activities of occupational health and safety personnel

As displayed in the analysis of the responses to questionnaire item number 28, an estimated 4.8% of all industrial facilities (accounting for approximately 35% of the estimated workforce) in the NOES sample frame employ occupational health or safety personnel on-site.

Within this subset of the survey sample frame, Figure IV-13 displays the estimated proportions of plants and workers in plants by specific occupational health or safety activity. These activities are displayed proportionately, since more than one activity may occur in any facility.

Figure IV-13 Occupational safety and health activities in plants employing specialists by plants and workers

The estimated number of plants (in the subset discussed above) by health and safety activity are displayed in Tables IV-11 and IV-12. No attempt should be made to total across columns to arrive at an overall total since more than one activity may have occurred in one plant.

Table IV-11 Number and percent of plants by occupational health and safety activity (by major industrial group)

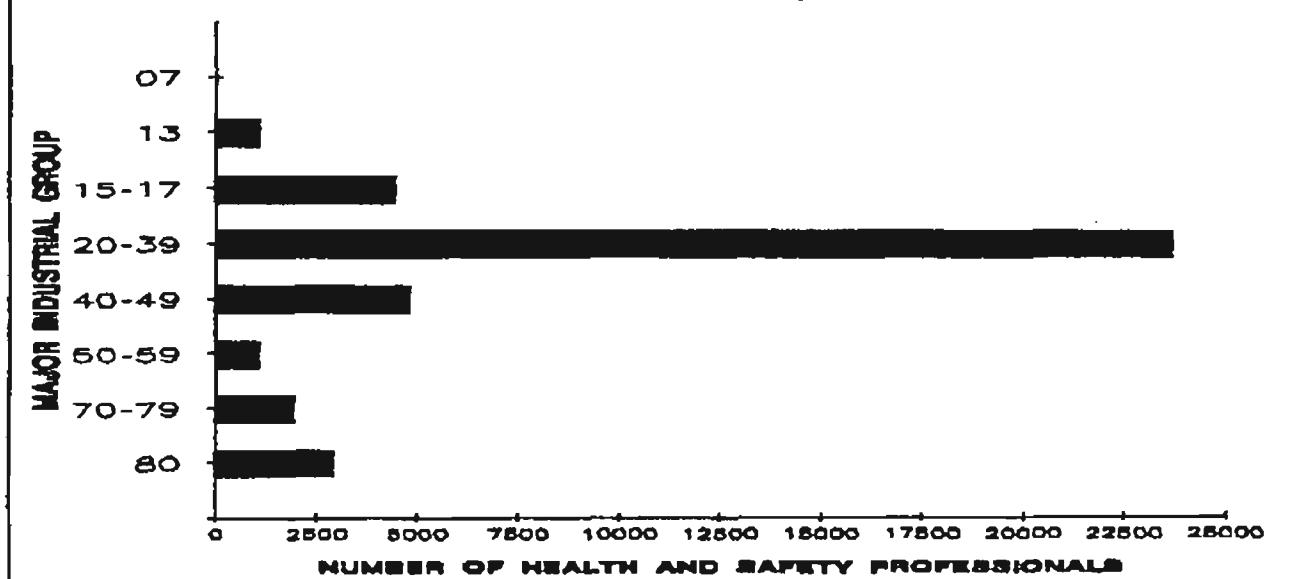

Table IV-12 Number and percent of plants by occupational health and safety activity (by 2-digit SIC)

The estimated number of workers in plants (again within the 35% of the workforce discussed above) by health and safety activity are displayed in Tables IV-13 and IV-14. The precaution against row totalling is also valid here.

Table IV-13 Number and percent of workers in plants by occupational health and safety activity (by major industrial group)

Table IV-14 Number and percent of workers in plants by occupational health and safety activity (by 2-digit SIC)

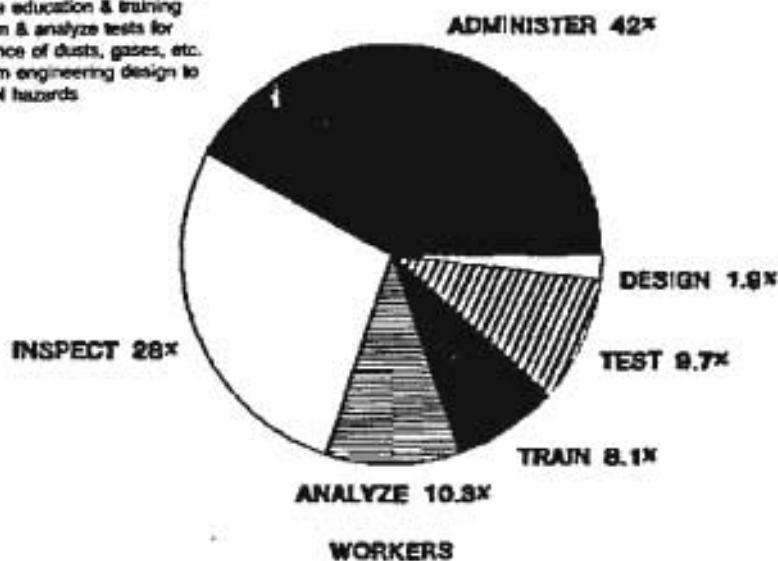

FIGURE IV - 13
OCCUPATIONAL SAFETY AND HEALTH ACTIVITIES IN PLANTS
EMPLOYING SPECIALISTS BY PLANTS AND WORKERS
(NOES 1981-1983)

LEGEND

ACTIVITY	DEFINITION
ADMINISTER	• administer, plan & develop programs, advise management
INSPECT	• Inspect workplace for hazards, investigate injury/illness causes
ANALYZE	• analyse plans to identify hazards, develop procedures for control
TRAIN	• provide education & training
TEST	• perform & analyze tests for presence of dusts, gases, etc.
DESIGN	• perform engineering design to control hazards

NOES QUESTIONNAIRE ITEM NO. 30
Use of Industrial Hygiene Consultation Services

Intent

The intent of this question was to determine whether a facility received industrial hygiene consulting services from an outside source during the previous year.

This item was displayed on the questionnaire as:

30. Has your facility received industrial hygiene services on a consulting basis during the past 12 months?

- 1 Yes, from government sources
- 2 Yes, from non-government sources
- 3 No

Notes

Industrial hygiene consulting service from an outside source is defined as the provision of advice, consultation, or service obtained from persons not employed by the facility which were provided for reasons other than enforcement of regulatory health standards.

Consultations or visits by federal, state or local officials, by corporate headquarters personnel, or by insurance company specialists were acceptable if the intent was to provide industrial hygiene services and not to enforce legal regulatory standards.

All consultations not conducted on behalf of the facility or corporate management, such as regulatory visits or union-initiated studies, were excluded.

Analysis

Two analyses of the responses to question 30 are presented.

- (1) Responses 30.1 and 30.2 – Industrial hygiene consultations received from government and non-government sources

The estimates of the plants which have received industrial hygiene consultations during the preceding year from government or non-government sources, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-14 and IV-15, and Tables IV-15 and IV-16.

Table IV-16 Number and percent of plants and employees in plants which received industrial hygiene consultation during the past year (by 2-digit SIC)

- (2) Responses 30.1, 30.2 or 30.3 - Plants receiving industrial hygiene consultation in the past year from government or non-government sources, or not receiving industrial hygiene consultation.

The estimates of the proportion of plants (by size category) which received industrial hygiene consultations in the past year from government sources (GOV'T), non-government sources (NON-GOV'T), or which did not receive such consultation (NONE) are displayed in Figure IV-16.

...No facilities observed.

FIGURE IV – 16
**PLANTS RECEIVING INDUSTRIAL HYGIENE
CONSULTATION BY SOURCE**
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 31
Use of Occupational Safety Consultation Services

Intent

The intent of this question was to determine whether a facility received occupational safety consulting services from an outside source during the previous year.

This item was displayed on the questionnaire as:

31. Has your facility received occupational safety services on a consulting basis during the past months?

- 1 Yes, from government sources
- 2 Yes, from non-government sources
- 3 No

Notes

Occupational safety consultation services from an outside source is defined as the provision of occupational safety advice, consultation, or service obtained from persons not employed by the facility which were provided for reasons other than enforcement of regulatory safety standards.

All consultations not conducted on behalf of the facility or corporate management, such as regulatory visits or union-initiated studies, were excluded.

Analysis

Two analyses of the responses to question 31 are presented.

- (1) Responses 31.1 and 31.2 – Occupational safety consultations received from government and non-government sources.

The estimates of the plants which have received occupational safety consultations during the preceding year from government or non-government sources, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-17 and IV-18, and Tables IV-17 and IV-18.

**Figure IV-17 Occupational safety consultation in last year
 (by major industrial group)**

**Figure IV-18 Occupational safety consultation in the last year
 (by 2-digit SIC)**

**Table IV-17 Number and percent of plants and employees in plants
 which received occupational safety consultation during
 the past year (by major industrial group)**

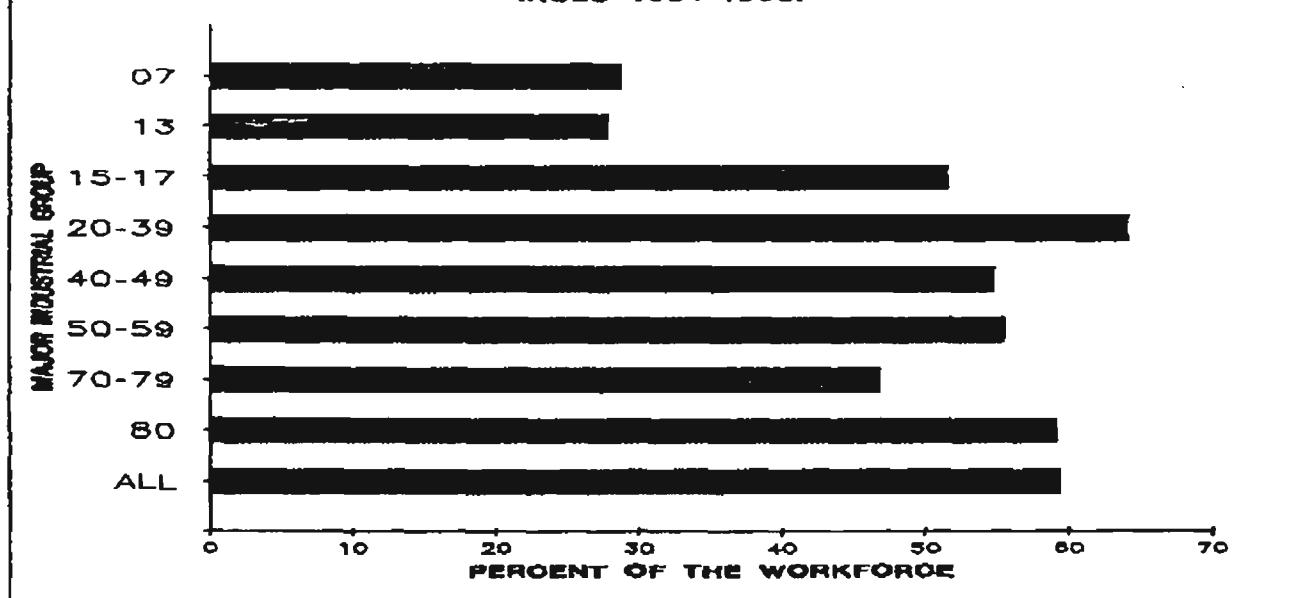

**Table IV-18 Number and percent of plants and employees in plants
 which received occupational safety consultation during
 the past year (by 2-digit SIC)**

- (2) Responses 31.1, 31.2, or 31.3 - Plants receiving occupational safety consultations in the past year from government or non-government sources, or not receiving occupational safety consultations

The estimates of the proportion of plants (by size category) which received occupational safety consultations in the past year from government sources (GOV'T), non-government sources (NON-GOV'T), or which did not receive such consultation (NONE) are displayed in Figure IV-19.

OCCUPATIONAL SAFETY CONSULTATION IN THE LAST YEAR
(NOES 1981-1983)

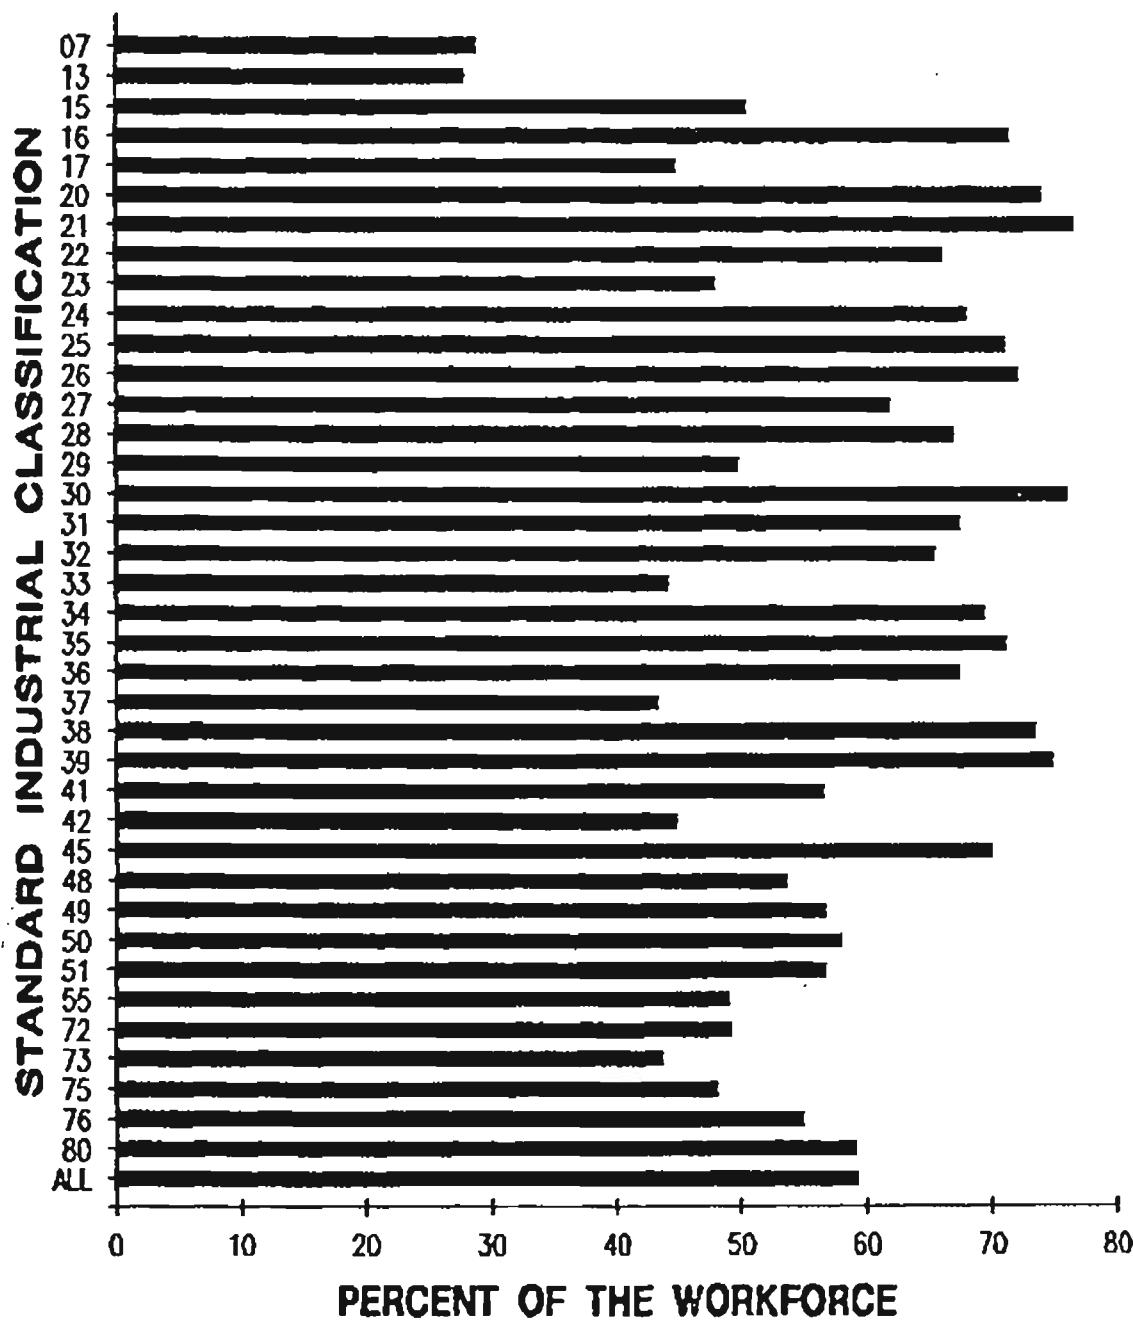

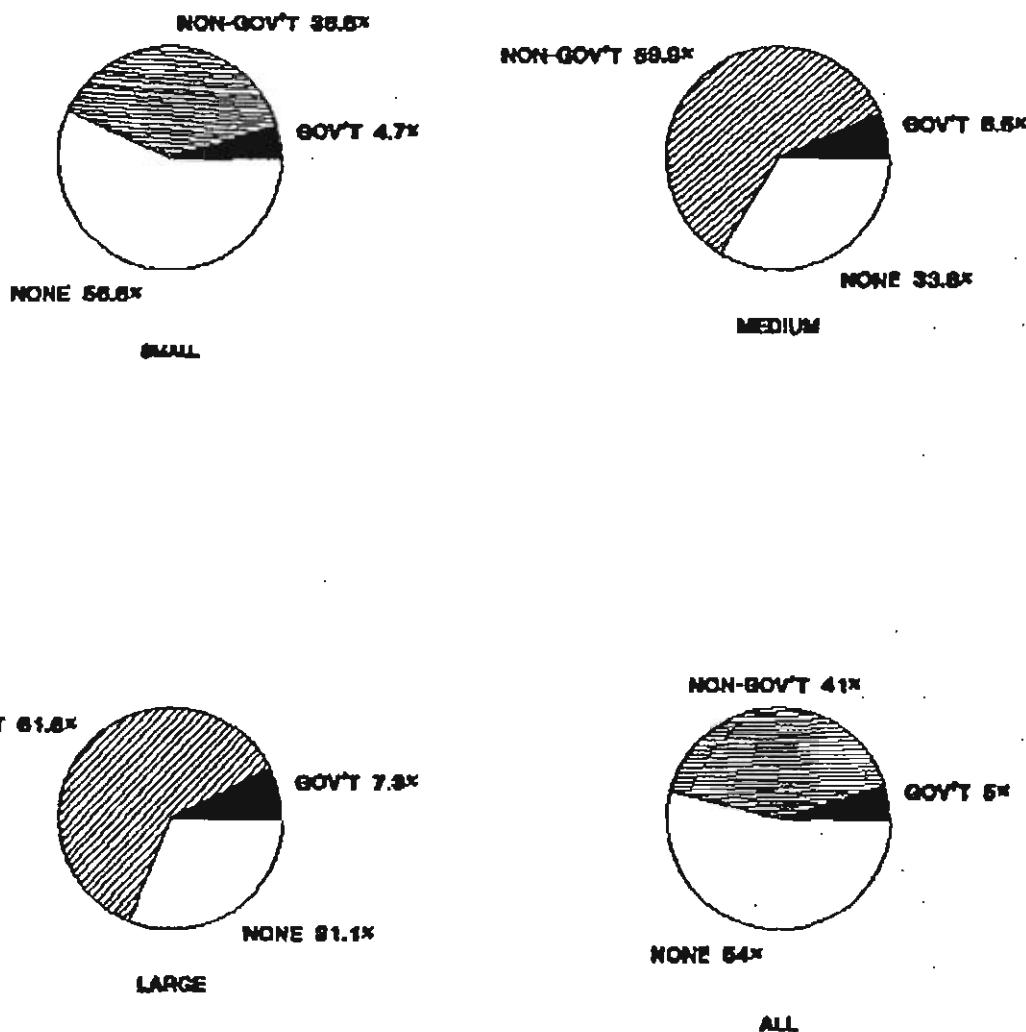

FIGURE IV - 19
**PLANTS RECEIVING OCCUPATIONAL SAFETY
CONSULTATION BY SOURCE**
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 32
Existence of a Program to Regularly Monitor Physical Agents

Intent

The intent of this question was to determine if the facility had a program to regularly or periodically monitor the presence of such physical agents as heat, vibration, radiation, noise and magnetic fields.

This item was displayed on the questionnaire as:

32. Do you have a program under which you regularly or periodically monitor the presence of physical agents such as heat, vibration, radiation, noise, and magnetic fields?

- 1 No (Skip to Question 34)
2 Yes (Circle yes or no for each physical agent listed below:)

	<u>Yes</u>	<u>No</u>
1. Heat	1	2
2. Vibration	1	2
3. Radiation	1	2
4. Noise	1	2
5. Magnetic fields	1	2
6. Other	1	2

Notes

"To regularly or periodically monitor" refers to programs within the facility which were established to monitor environmental levels of physical agents on a planned or predictable basis.

Tests using instrumentation or monitoring by outside sources are included if the intent was to determine if employee health was at risk and the monitoring was performed at the request of management.

Monitoring of process conditions or of areas where no employee exposure could take place (e.g., inside a closed vessel) or any monitoring not performed under an industrial hygiene/occupational health rationale was not included as a positive response.

Analysis

Two analyses of the responses to question 32 are presented.

- (1) Response 32.2 - regular or periodic monitoring of physical agents

The estimates of the plants which have established programs to regularly or periodically monitor the occupational environmental levels of one or

more physical agents, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-20, IV-21, IV-22, and IV-23, and Tables IV-19, and IV-20.

Figure IV-20	Plants monitoring physical agents (by major industrial group)
Figure IV-21	Plants monitoring physical agents (by 2-digit SIC)
Figure IV-22	Workers in plants monitoring physical agents (by major industrial group)
Figure IV-23	Workers in plants monitoring physical agents (by 2-digit SIC)
Table IV-19	Number and percent of plants and employees in plants which regularly monitor physical agents (by major industrial group)
Table IV-20	Number and percent of plants and employees in plants which regularly monitor physical agents (by 2-digit SIC)

- (2) Response 32.2, sub-items 1 to 6 - regular monitoring of specific physical agents

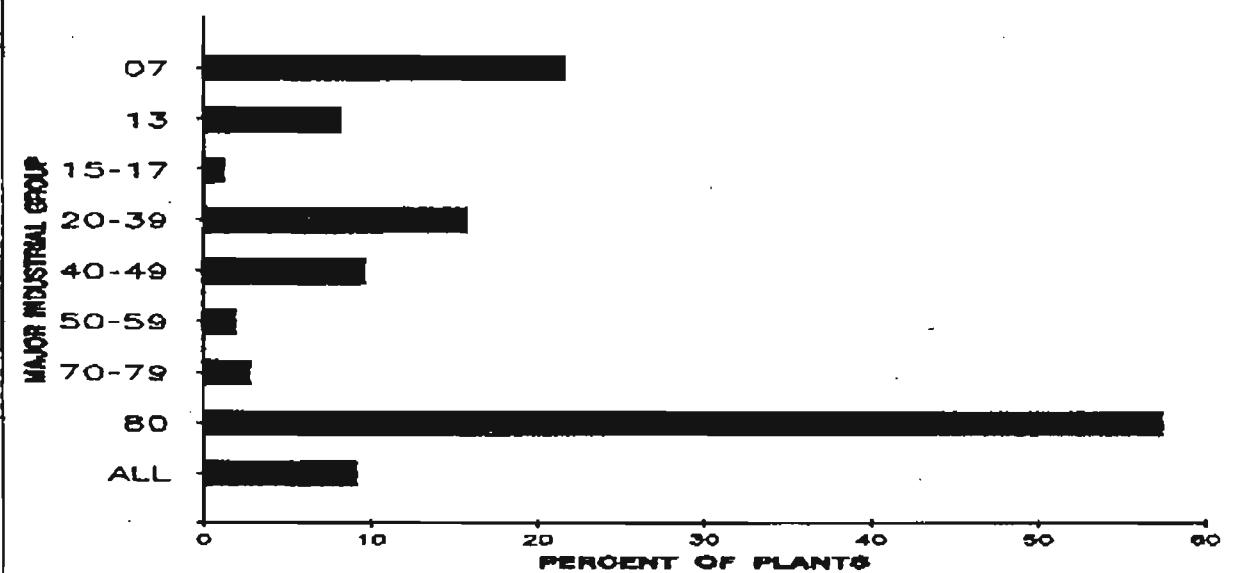

The estimates of the number and proportion of plants and workers in plants which regularly or periodically monitor specific physical agents are displayed in Figure IV-24 and Tables IV-21, IV-22, IV-23 and IV-24.

Figure IV-24	Proportions of physical agent monitoring by plants and workers in plants
Table IV-21	Number and percent of plants by physical agent monitored (by major industrial group)
Table IV-22	Number and percent of plants by physical agent monitored (by 2-digit SIC)
Table IV-23	Number and percent of workers in plants by physical agent monitored (by major industrial group)
Table IV-24	Number and percent of workers in plants by physical agent monitored (by 2-digit SIC)

Note: The estimates of plants and workers in plants which monitor specific physical agents shown in Tables 21-24 are not mutually self-exclusive. No attempt should be made to total numbers across the six columns of data provided.

This is because multiple responses to question 32 are possible. Therefore, the effect of adding across columns is to multiply count a single original observation, inflating the estimate(s).

PROPORTIONS OF PHYSICAL AGENT
MONITORING BY PLANTS AND WORKERS IN PLANTS
(NOES 1981-1983)

PLANTS

WORKERS

NOES QUESTIONNAIRE ITEM NO. 33
Retention of Records From a Physical Agent Monitoring Program

Intent

The intent of this question was to determine the length of time that facilities retain the records from programs to monitor physical agents in the workplace.

This item was displayed on the questionnaire as:

33. How long do you retain the records of the monitoring program?

— — Years (If "forever" code "99")
(If "unknown" code "UK")

Notes

This question was asked only of those respondents who indicated that a program to monitor physical agents was in existence in the surveyed facility.

Definitions, inclusions, and exclusions pertaining to physical agent monitoring are found in the Notes text of questionnaire item 32.

Three classes of responses to question 33 were possible. In analyzing these responses, it was decided that an unknown (coded UK) duration was of no analytical value. Therefore, analysis of the two remaining classes of responses was performed. A "99" or "forever" response did not allow for specificity, so analysis was performed to estimate the number of plants, and workers in those plants, where the records of physical agent monitoring were kept "forever". Approximately 6% of all plants, employing about 32% of the workforce, fall into this category.

The remaining respondents gave a specific ("non-forever") value which could be analyzed. These responses were averaged across the estimated population of plants and workers.

Analysis

Two analyses of the responses to question 33 are presented.

- (1) Response 33 - "Non-forever" or average years of retention for the records from physical agent monitoring programs

The estimated average ("non-forever") length of time that records from physical agent monitoring programs are retained are displayed in Figures IV-25 and IV-26, and Tables IV-25 and IV-26.

Figure IV-25 Average number of "non-forever" years plants keep physical agent monitoring records
(by major industrial group)

Figure IV-26 Average number of "non-forever" years plants keep physical agent monitoring records
(by 2-digit SIC)

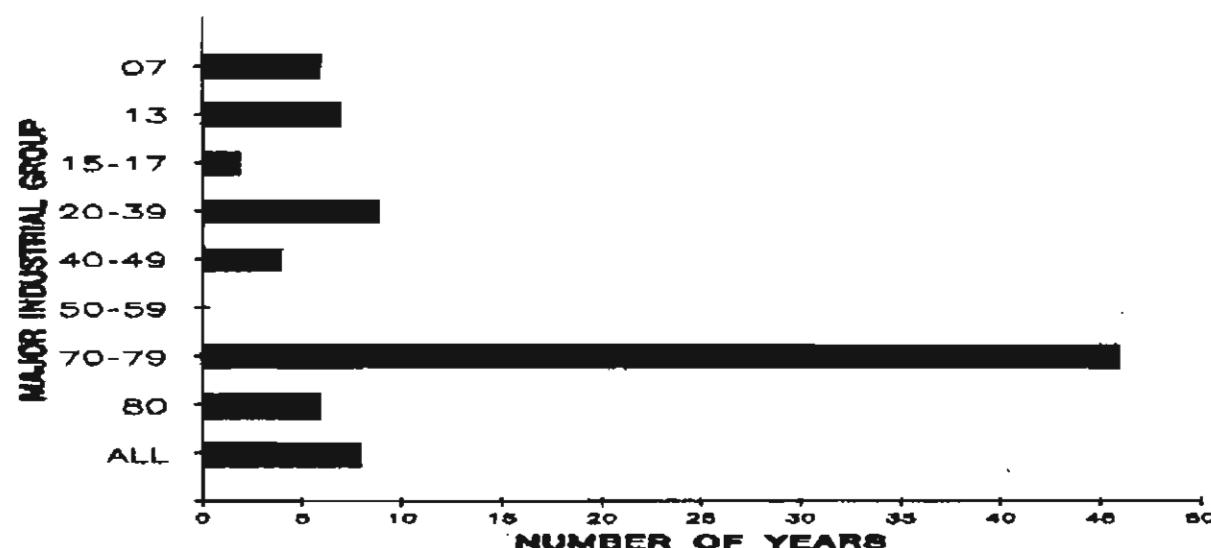

Table IV-25	Average number of years facilities keep physical agent monitoring records among plants not reporting "forever" (by major industrial group)
Table IV-26	Average number of years facilities keep physical agent monitoring records among plants not reporting "forever" (by 2-digit SIC)

(2) Response 33 – Physical agent monitoring records kept "forever"

The estimates of the plants which keep physical agent monitoring records "forever", and workers in those plants (by number and proportion of the total) are displayed in Figure IV-27 and IV-28, and Tables IV-27 and IV-28.

Figure IV-27	Proportion of plants which keep physical agent monitoring records "forever" (by major industrial group)
Figure IV-28	Proportion of plants which keep physical agent monitoring records "forever" (by 2-digit SIC)
Table IV-27	Number and percent of plants and employees in plants which keep physical agent monitoring records "forever" (by major industrial group)
Table IV-28	Number and percent of plants and employees in plants which keep physical agent monitoring records "forever" (by 2-digit SIC)

PROPORTION OF PLANTS WHICH KEEP PHYSICAL
AGENT MONITORING RECORDS "FOREVER"
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 34
Existence of a Program to Regularly Monitor Fumes and Gases

Intent

The intent of this question was to determine if the facility had a program to regularly or periodically monitor the environmental levels of chemical materials in fume, gas, mist, vapor or dust form.

This item was displayed on the questionnaire as:

34. Do you have a program under which you regularly or periodically monitor the presence of fumes, gases, mists, dusts, or vapors?

- 1 Yes
2 No (Skip to Question 38)

Notes

"To regularly or periodically monitor" refers to programs within the facility which were established to monitor environmental levels of chemical materials on a planned or predictable basis.

Tests using instrumentation or monitoring by outside sources are included if the intent was to protect worker health and the monitoring was performed at the request of management.

Monitoring of process conditions, irregular or one-time monitoring, or any monitoring not performed under an occupational health rationale was not included as a positive response.

Analysis

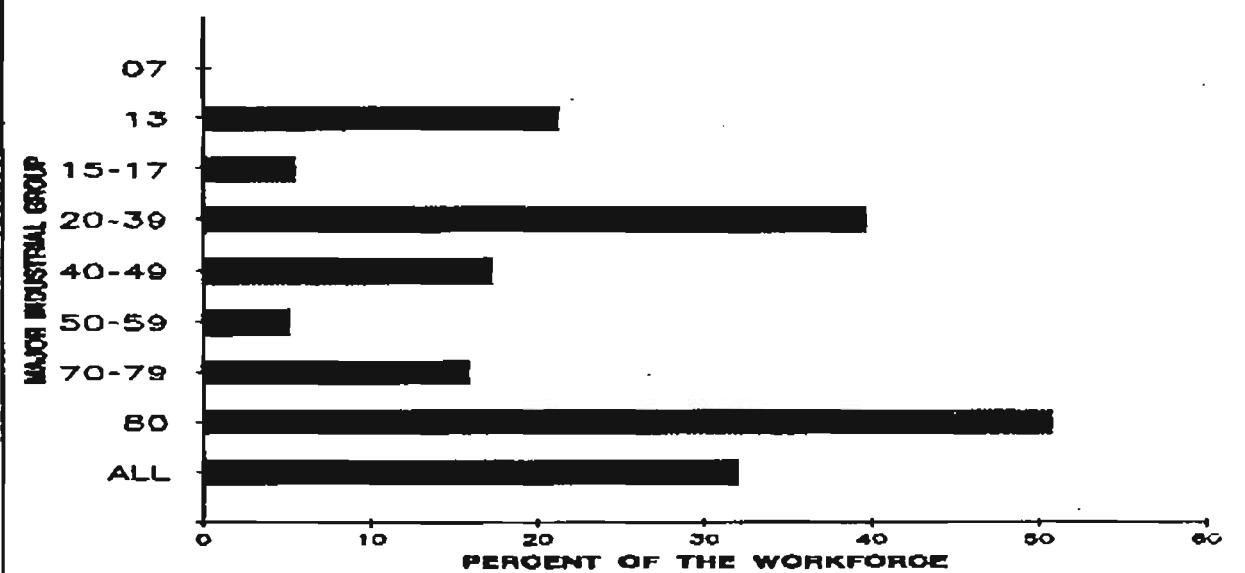

One analysis of the responses to question 34 is presented.

Response 34.1 - Regular or periodic monitoring of chemical materials

The estimates of the plants which have established programs for the regular or periodic monitoring of the environmental levels of chemical materials in fume, gas, mist, dust or vapor form, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-29, IV-30, and IV-31, and Tables IV-29 and IV-30.

**PLANTS WHICH MONITOR FUMES, GASES,
MISTS, DUSTS, OR VAPORS
(NOES 1981-1983)**

MOES QUESTIONNAIRE ITEM NO. 35
Methods of Fume and Gas Monitoring

Intent

The intent of this question was to generally categorize the methods used in monitoring fumes, gases, mists, dusts, or vapors.

This item was displayed on the questionnaire as:

35. How is this monitoring conducted?

- 1 Sample collection with laboratory analysis (Skip to Question 37)
- 2 Direct reading instruments
- 3 Both

Notes

This question was asked only if the interviewee had indicated the existence of a regular monitoring program within the facility, and the response had met the conditions specified in the discussion of question 34.

Analysis

One analysis of the responses to question 35 is presented.

Responses 35.1, 35.2, or 35.3 – Fume monitoring methods

The estimates of the plants which utilize sample collection with laboratory analysis, or direct reading instruments, or both methods in their monitoring of environmental levels of chemical materials, and workers in those plants (by number and proportion of the total) are displayed in Figure IV-32 and Tables IV-31 and IV-32.

Figure IV-32	Fume monitoring methods by plants and workers in plants
Table IV-31	Number and percent of plants and employees in plants which monitor fumes, gases, mists, dusts and vapors by method (by major industrial group)
Table IV-32	Number and percent of plants and employees in plants which monitor fumes, gases, mists, dusts and vapors by method (by 2-digit SIC)

NOES QUESTIONNAIRE ITEM NO. 36
Direct Reading Instruments Used in Fume Monitoring

Intent

The intent of this question was to categorize the direct reading instrumentation used in the monitoring of fumes, gases, mists, dusts or vapors.

This item was displayed on the questionnaire as:

36. Which types of direct reading instruments are used in the monitoring program? Circle "yes" or "no" for each type listed below:

Yes **No**

1. Direct mass measurement tests	1	2
2. Fibrous aerosol monitors	1	2
3. Detector tubes	1	2
4. Infrared (I.R.) gas monitors	1	2
5. Ultraviolet (U.V.) gas monitors	1	2
6. Gas chromatograph monitors	1	2
7. Electrochemical monitors	1	2
8. Other "wet" chemical methods	1	2

Notes

This question was asked only of those respondents indicating the existence of a regular program to monitor gases, fumes, dusts, mists or vapors and who also indicated the use of direct reading instruments in that monitoring program. More than one type of direct reading instrument may have been specified.

Analysis

Two analysis of the responses to question 36 are presented.

- (1) Response 36, sub-items 1 to 8 - Types of direct reading instruments used in plants using direct reading instruments

The estimated proportions of direct reading instrument types used in plants using direct reading instruments for fume monitoring by plants and workers are displayed in Figure IV-33.

Figure IV-33 Types of instruments used in plants using direct reading instruments by plants and workers

(2) Response 36, sub-items 1 to 8 - Estimated plants and workers using different types of direct reading instruments

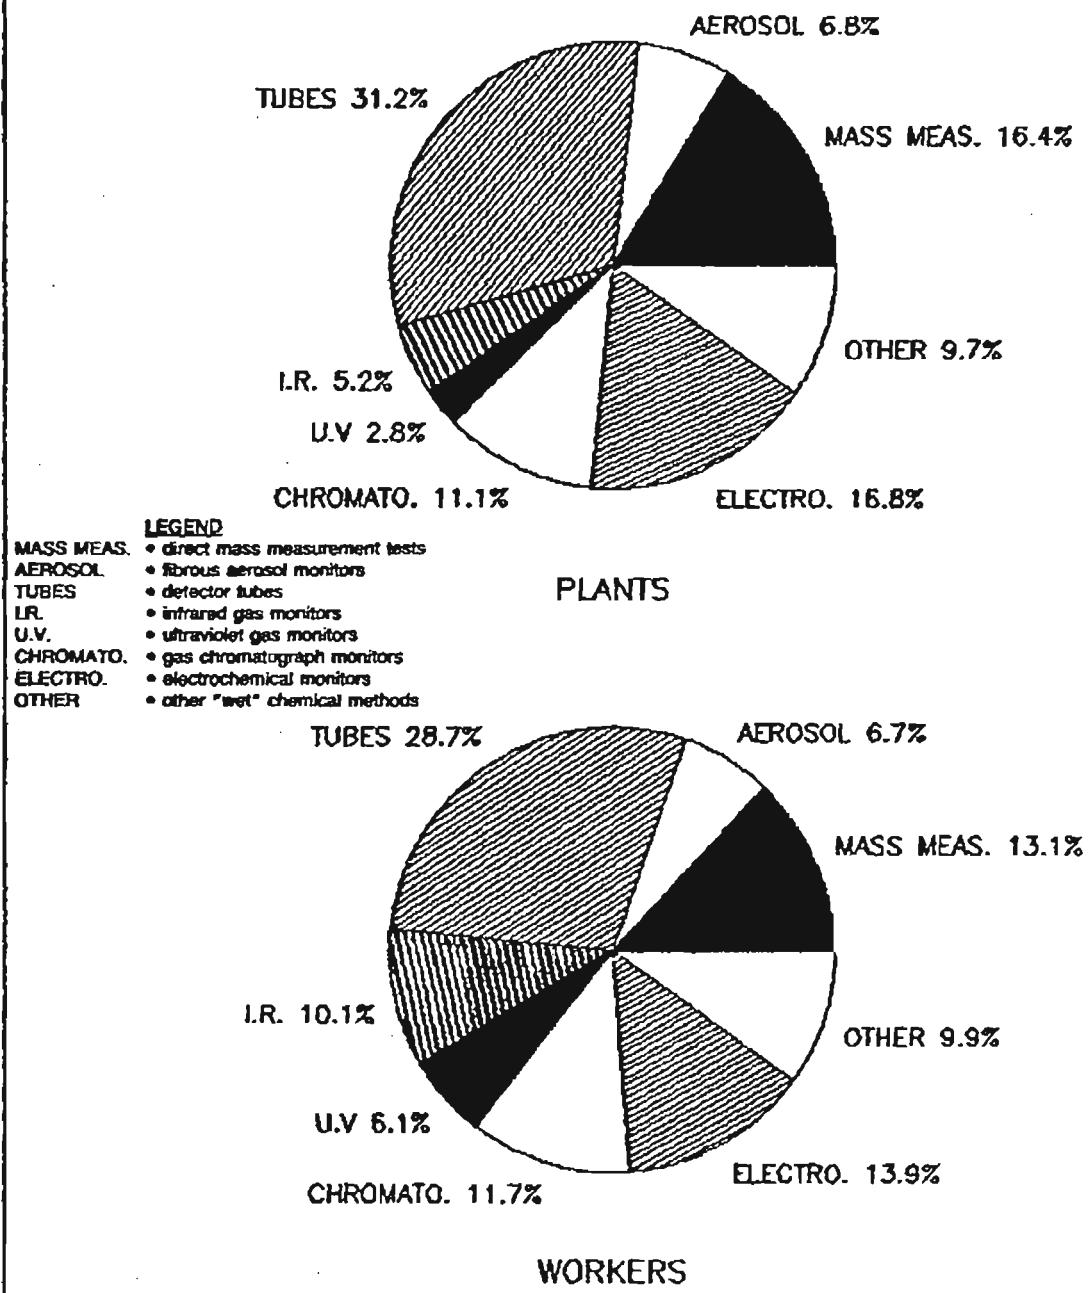

The estimates, by type of direct reading instrument used, of the plants which have regular programs to monitor the environmental levels of chemical fumes, etc., and which use direct reading instruments, and workers in those plants (by number and proportion of the total) are displayed in Tables IV-33, IV-34, IV-35 and IV-36.

Table IV-33	Estimated number of plants by type of direct reading instrument used (by major industrial group)
Table IV-34	Estimated number of plants by type of direct reading instrument used (by 2-digit SIC)
Table IV-35	Estimated number of employees in plants by type of direct reading instrument used (by major industrial group)
Table IV-36	Estimated number of employees in plants by type of direct reading instrument used (by 2-digit SIC)

Note: These estimates of plants and workers in plants using specific types of direct measuring instruments are not mutually self-exclusive. No attempt should be made to total numbers across the eight columns of data provided.

As in Analysis 2, question 32, multiple responses to question 36 from one facility are possible. Therefore the effect of adding across columns is to multiply count a single original observation.

NOES QUESTIONNAIRE ITEM NO. 37
Retention of Records From Fume Monitoring Programs

Intent

The intent of this question was to determine the length of time that facilities retain the records from programs to monitor fumes, gases, dusts, or mists in the workplace.

This item was displayed on the questionnaire as:

37. How long do you retain the records of the monitoring program?

-- Years (If "forever" code "99")
(If "unknown" code "UK")

Notes

This question was asked only of those respondents who indicated that a program to monitor fumes, gases, mists, or dusts was in existence in the facility.

Definitions, inclusions, and exclusions pertaining to fume monitoring are found in the Notes text of questionnaire item 36.

As discussed in the Notes text for question 33, three classes of responses to question 37 were possible. As before, responses of "unknown" duration were discarded, and the "forever" and "non-forever" values analyzed separately.

Analysis

Two analyses of the responses to question 37 are presented.

(1) Response 37 - "Non-forever" or average years of retention for the records from fume monitoring programs

The estimated average length of time that records from fume monitoring programs are retained are displayed in Figures IV-34 and IV-35, and Tables IV-37 and IV-38.

Figure IV-34 Average number of "non-forever" years plants keep fume monitoring records

 (by major industrial group)

Figure IV-35 Average number of "non-forever" years plants keep fume monitoring records

 (by 2-digit SIC)

Table IV-37 Average number of years facilities keep fume monitoring records among plants not reporting "forever" (by major industrial group)

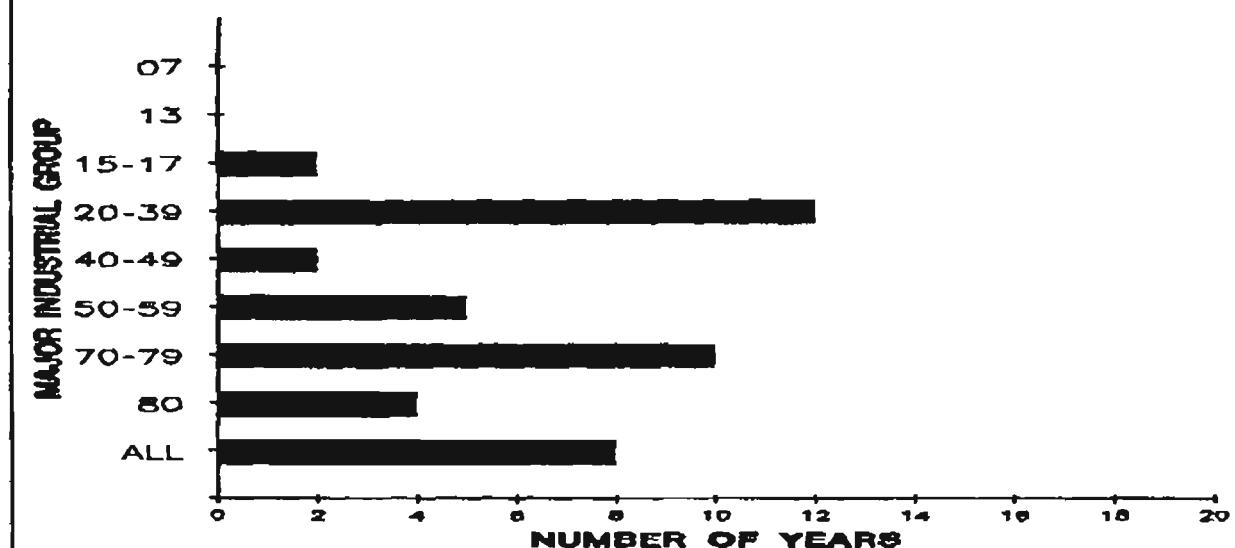

Table IV-38 Average number of years facilities keep fume monitoring records among plants not reporting "forever" (by 2-digit SIC)

(2) Response 37 - Fume monitoring records kept "forever"

The estimates of the plants which keep fume monitoring records "forever", and workers in those plants (by number and proportion of the total) are displayed in Figures IV-36 and IV-37, and Tables IV-39 and IV-40.

Figure IV-36	Proportion of plants which keep fume monitoring records "forever" (by major industrial group)
Figure IV-37	Plants which keep fume monitoring records "forever" (by 2-digit SIC)
Table IV-39	Number and percent of plants and employees in plants which keep fume monitoring records "forever" (by major industrial group)
Table IV-40	Number and percent of plants and employees in plants which keep fume monitoring records "forever" (by 2-digit SIC)

HOES QUESTIONNAIRE ITEM NO. 38
Substitution of Chemical Materials

Intent

The intent of this question was to determine whether the facility had substituted chemical agents within the past five years.

This item was displayed on the questionnaire as:

38. Have any substitutions of chemical materials been made within the last 5 years?

- 1 Yes
2 No (Skip to Question 41)

Notes

The term "substitutions" used in this question means to cease use of one chemical material and initiate use of an alternative.

The exchange of one tradename compound for another was not considered a substitution unless it was related to the actual chemical content of both tradename products.

Analysis

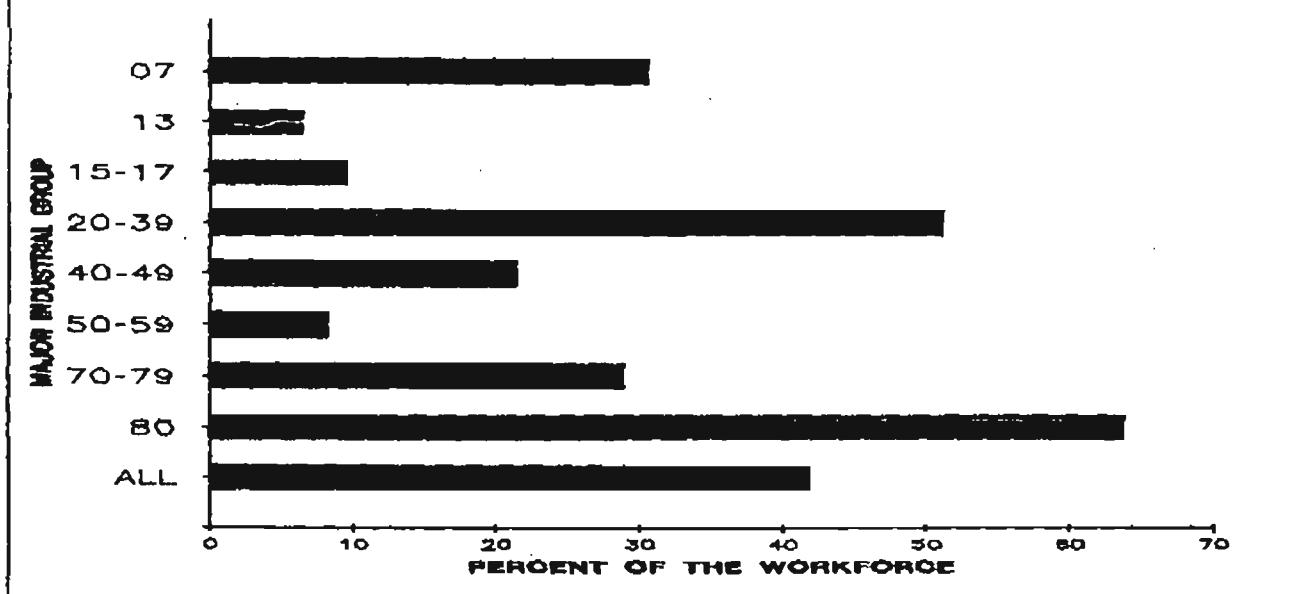

One analysis of the responses to question 38 is presented.

Response 38.1 - Chemical substitutions made in the last five years

The estimates of the plants which have substituted chemical materials in the past five years, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-38, IV-39, IV-40, IV-41, IV-42, and IV-43, and Tables IV-41 and IV-42.

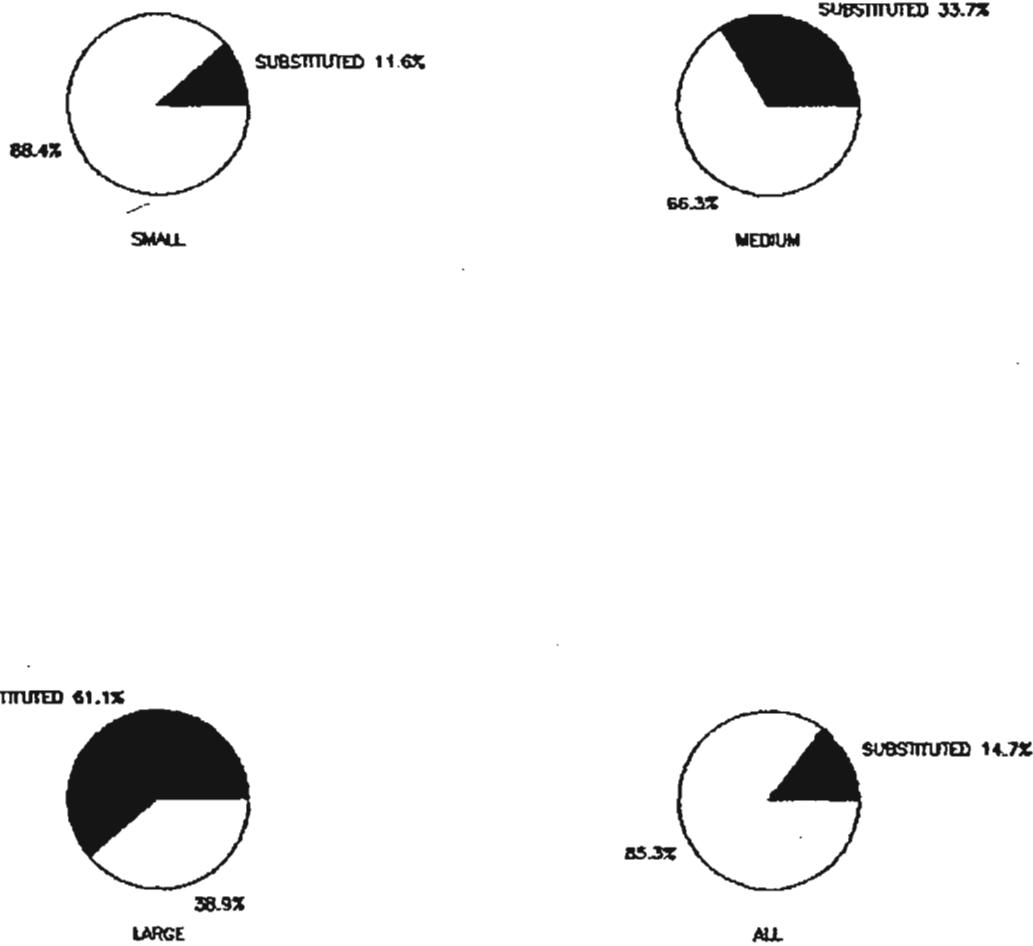

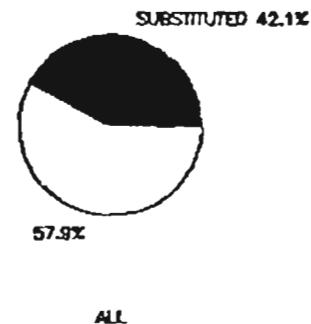

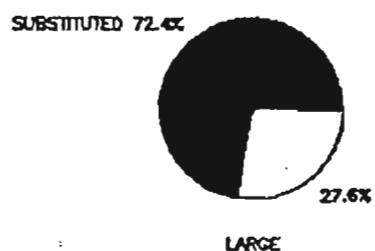

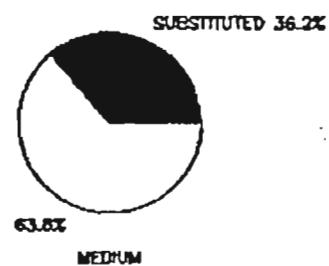

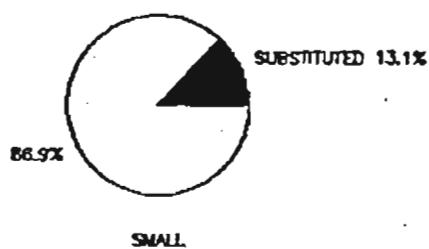

FIGURE IV - 43
CHEMICAL SUBSTITUTION BY WORKFORCE
PROPORTION AND PLANT SIZE
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 39
Chemical Substitutions Made to Reduce Worker Exposure

Intent

The intent of this question was to determine if a chemical substitution was made for the primary purpose of reducing or eliminating worker exposure to specific chemical agents.

This item was displayed on the questionnaire as:

39. Were any of these substitutions made for the primary purpose of reducing employee exposures?

1 Yes
2 No

Notes

Exchanges of raw materials, ingredients, intermediates, or finished (tradename) products for the primary purpose of protecting employee health were considered affirmative responses.

Substitutions made due to regulatory requirements or a ban on the production, trade, or marketing of a specific chemical agents was also an affirmative response.

Substitutions or exchanges made for economic or any reasons other than those relating to worker health were considered a negative response to this question.

Analysis

One analysis of the responses to question 39 is presented.

Response 39.1 - Substitutions made to reduce employee exposure.

The estimates of the plants which have substituted chemical agents for the express purpose of reducing or eliminating worker exposure to specific agents, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-44, IV-45, IV-46, IV-47, IV-48, and IV-49, and Tables IV-3 and IV-44.

NOES QUESTIONNAIRE ITEM NO. 40
Chemicals Substituted as a Result of Government Inspection

Item

The intent of this question was to determine if the facility had substituted chemical materials within the past five years as a direct result of government inspection activity.

This item was displayed on the questionnaire as:

40. Were any of these substitutions made as a result of inspections of this facility by federal, state or local authorities?

1 Yes
2 No

Notes

An affirmative answer to this question was recorded only when chemical substitutions were made as a consequence of a regulatory visit.

Consultative visits or advice from private consultants, corporate staff, insurance carrier specialists or government employees which resulted in a chemical substitution were excluded.

Analysis

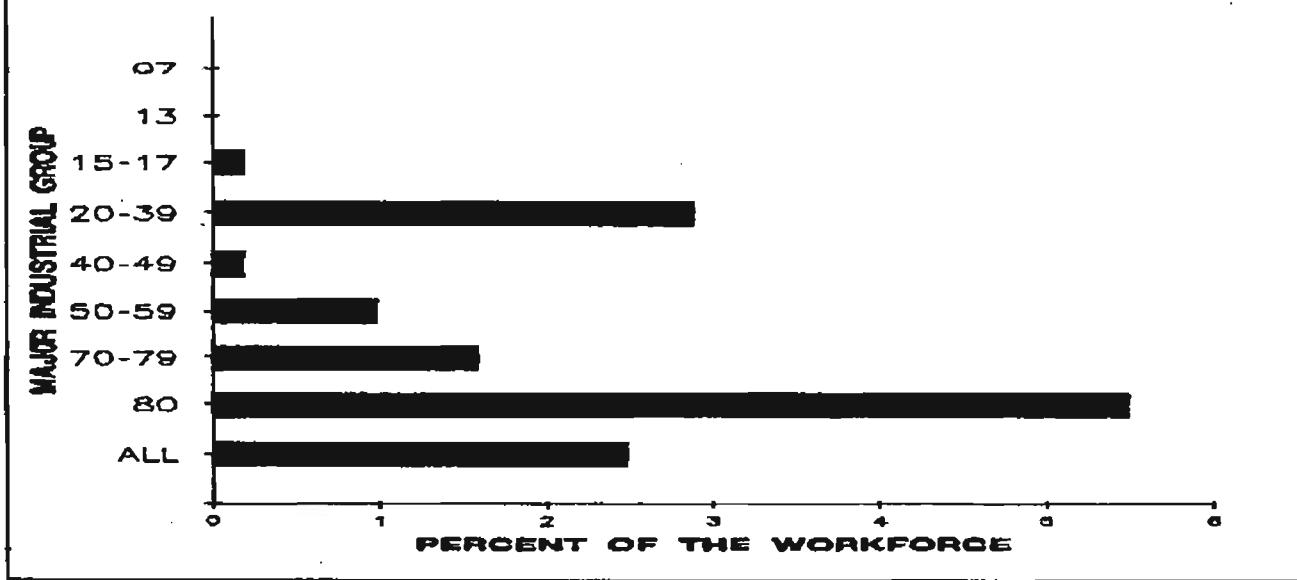

One analysis of the responses to question 40 is presented.

Response 40.1 - Chemicals substituted as a result of government inspection

The estimates of the plants which substituted chemical materials within the past five years due to government inspection activity, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-50, IV-51, IV-52, IV-53, IV-54, and IV-55, and Tables IV-45 and IV-46.

(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 41
Process or Equipment Modifications Made in the Past Five Years

Intent

The intent of this question was to determine if the facility had made major modifications of equipment or processes during the past five years.

This item was displayed on the questionnaire as:

41. Have any major equipment or process modifications been made within the last 5 years?

- 1 Yes
2 No (Skip to Question 45)

Notes

A "major modification" was considered to be a change in machinery, process(es), equipment, or physical plant layout which was significant enough to change the potential occupational exposure(s) of workers to chemical, physical or biological agents.

Changes made to protect against injury, such as machine guards, were not considered to be major process or equipment modifications within the intent of this question.

Analysis

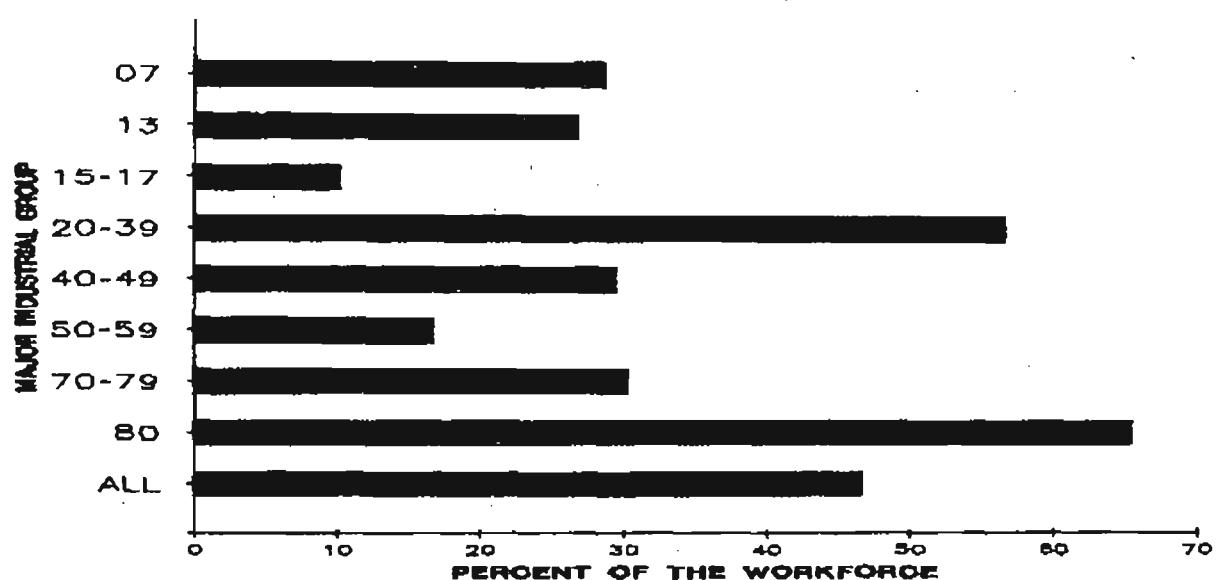

One analysis of the responses to this question is presented.

Response 41.1 - Major process or equipment modifications made during the past five years

The estimates of the plants which made modifications to equipment or processes during the past five years which were significant enough to change potential worker occupational exposures, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-56, IV-57, IV-58, IV-59, IV-60, and IV-61, and Tables IV-47 and IV-48.

Figure IV-56	Workers in plants modifying equipment or processes (by major industrial group)

NOES QUESTIONNAIRE ITEM NO 42
Equipment or Process Modifications Made to Reduce Worker Exposures

Intent

The intent of this question was to determine if major equipment or process modifications (as specified for question 41) were made for the primary purpose of reducing or eliminating worker exposure to chemical, physical or biological agents.

This item was displayed on the questionnaire as:

42. Were any of these modifications made for the primary purpose of reducing employee exposures?

- 1 Yes
2 No

Notes

Any modifications in equipment, plant layout, or process which was made primarily for economic reasons or for any reason not directly associated with protecting the health of the workers resulted in a negative response to this question.

Analysis

One analysis of the responses to this question is presented.

Response 42.1 - Modification made to reduce worker exposure

The estimates of the plants which made major equipment or process modifications during the past five years for the purpose of reducing occupational exposures, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-62, IV-63, IV-64, IV-65, IV-66, and IV-67, and Tables IV-49 and IV-50.

NOES QUESTIONNAIRE ITEM NO. 43
Equipment or Process Modifications Made as a Result of Government Inspection

Intent

The intent of this question was to determine if the equipment or process modifications made by the facility in the past five years were the direct result of government inspection activity.

This item was displayed on the questionnaire as:

43. Were any of these modifications made as a result of inspections of this facility by federal, state or local authorities?

1 Yes
2 No

Notes

An affirmative answer to this question was recorded only when modifications were made as a consequence of a regulatory visit.

Modifications resulting from non-regulatory consultations by private consultants, corporate staff, insurance carrier specialists, or government employees were excluded.

Analysis

One analysis of the responses to question 43 is presented.

Response 43.1 - Modifications made as a result of government inspection

The estimates of the plants which modified equipment or processes as a result of a government inspection, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-68, IV-69, IV-70, IV-71, IV-72, and IV-73, and Tables IV-51 and IV-52.

NOES QUESTIONNAIRE ITEM NO. 44
Type of Equipment or Process Modification

Intent

The intent of this question was to categorize process or equipment modifications made in the past five years.

This item was displayed on the questionnaire as:

44. What was the nature of the modification?

- 1 A redesign of the process
- 2 Enclosing the process
- 3 Equipment substitution
- 4 A redesign of the equipment
- 5 Combination of the above
- 6 Not listed here

Notes

This question was asked only of those respondents who gave a positive response when asked if major modifications of equipment or processes had been made during the previous five years. The criteria for "major modification" detailed in the notes for question 41 therefore apply to the modifications specified in this question.

Any combination of modifications 1 through 4 was coded "5" or "combination of the above".

Analysis

Two analyses of the responses to question 44 are presented.

(1) Response 44, sub-items 1 to 6 - Types of modifications made in the past five years

The estimated proportions of plants and workers in those plants which have made major modifications to equipment or processes are displayed in Figure IV-74.

Figure IV-74 Equipment or process modification by plants and workers in plants

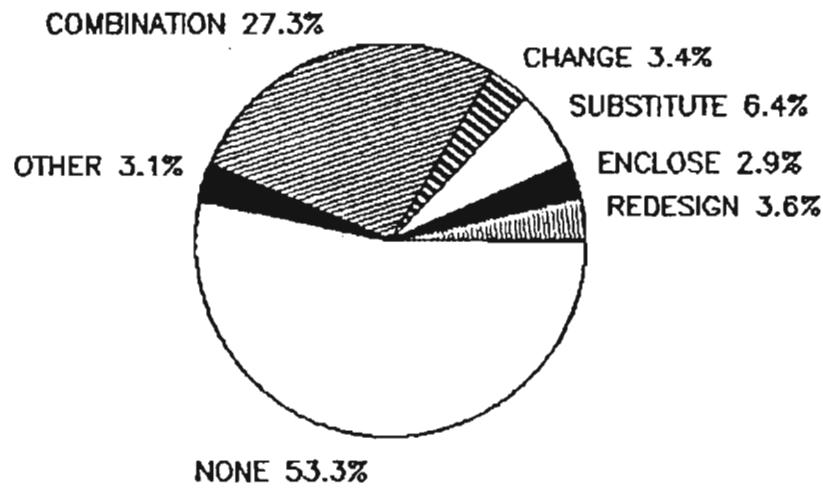

(2) Response 44, sub-items 1 to 6 - Estimated plants and workers by category of equipment or process modification

The estimates of the plants which have made specific equipment or process modifications in the last five years, and workers in those plants (by number and proportion of the total) are displayed in Table IV-53, IV-54, IV-55, and IV-56.

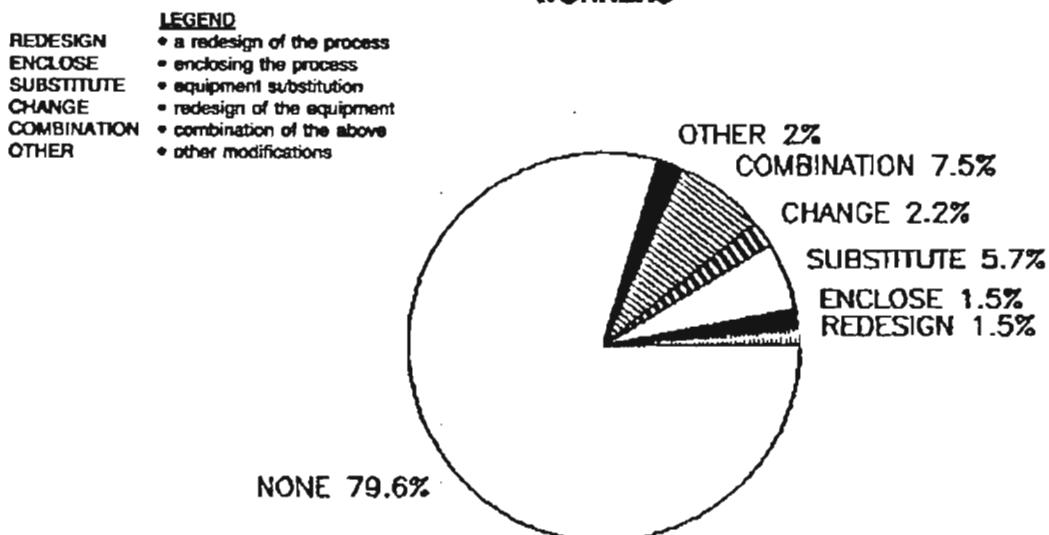

Table IV-53 Number and percent of plants which modified equipment or processes in the past five years by type of modification (by major industrial group)

Table IV-54	Number and percent of plants which modified equipment or processes in the past five years by type of modification (by 2-digit SIC)
Table IV-55	Number and percent of workers in plants which modified equipment or processes in the past five years by type of modification (by major industrial group)
Table IV-56	Number and percent of workers in plants which modified equipment or processes in the past five years by type of modification (by 2-digit SIC)

NOES QUESTIONNAIRE ITEM NO. 45
Plants Which Recirculate Exhaust Air

Intent

The intent of this question was to determine whether a plant recirculated exhaust air.

This item was displayed on the questionnaire as:

45. Does this facility recirculate exhaust air from any process or plant area?

- 1 Yes
2 No (Skip to Question 47)

Notes

Recirculation of exhaust air was considered to be the capture of exhaust air from a process or work area, and re-introduction of that air back into the facility, usually following treatment to remove contaminants.

Standard heating or cooling systems were not considered to recirculate exhaust air.

Catalytic converters or scrubbing devices attached to the exhausts of stationary or mobile internal combustion engines within the plant were not considered recirculation systems.

Analysis

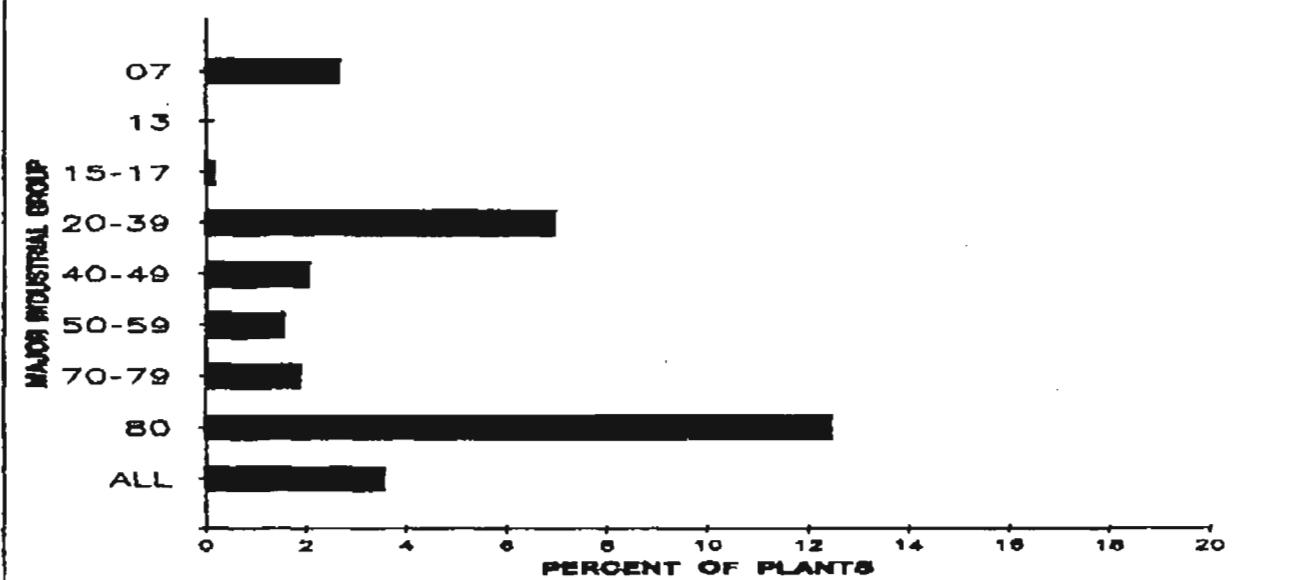

One analysis of the response to question 45 is presented.

Response 45.1 - Exhaust air from the facility recirculated

The estimates of the plants which recirculate exhaust air from a process or work area back into the facility, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-75, IV-76, and IV-77, and Tables IV-7 and IV-58.

Figure IV-75	Plants which recirculate exhaust air (by major industrial group)
Figure IV-76	Plants which recirculate exhaust air (by 2-digit SIC)
Figure IV-77	Plants recirculating exhaust air
Table IV-57	Number and percent of plants and employees in plants which recirculate exhaust air from within the plant (by major industrial group)
Table IV-58	Number and percent of plants and employees in plants which recirculate exhaust air from within the plant (by 2-digit SIC)

FIGURE IV - 76
PLANTS WHICH RECIRCULATE EXHAUST AIR
(NOES 1981-1983)

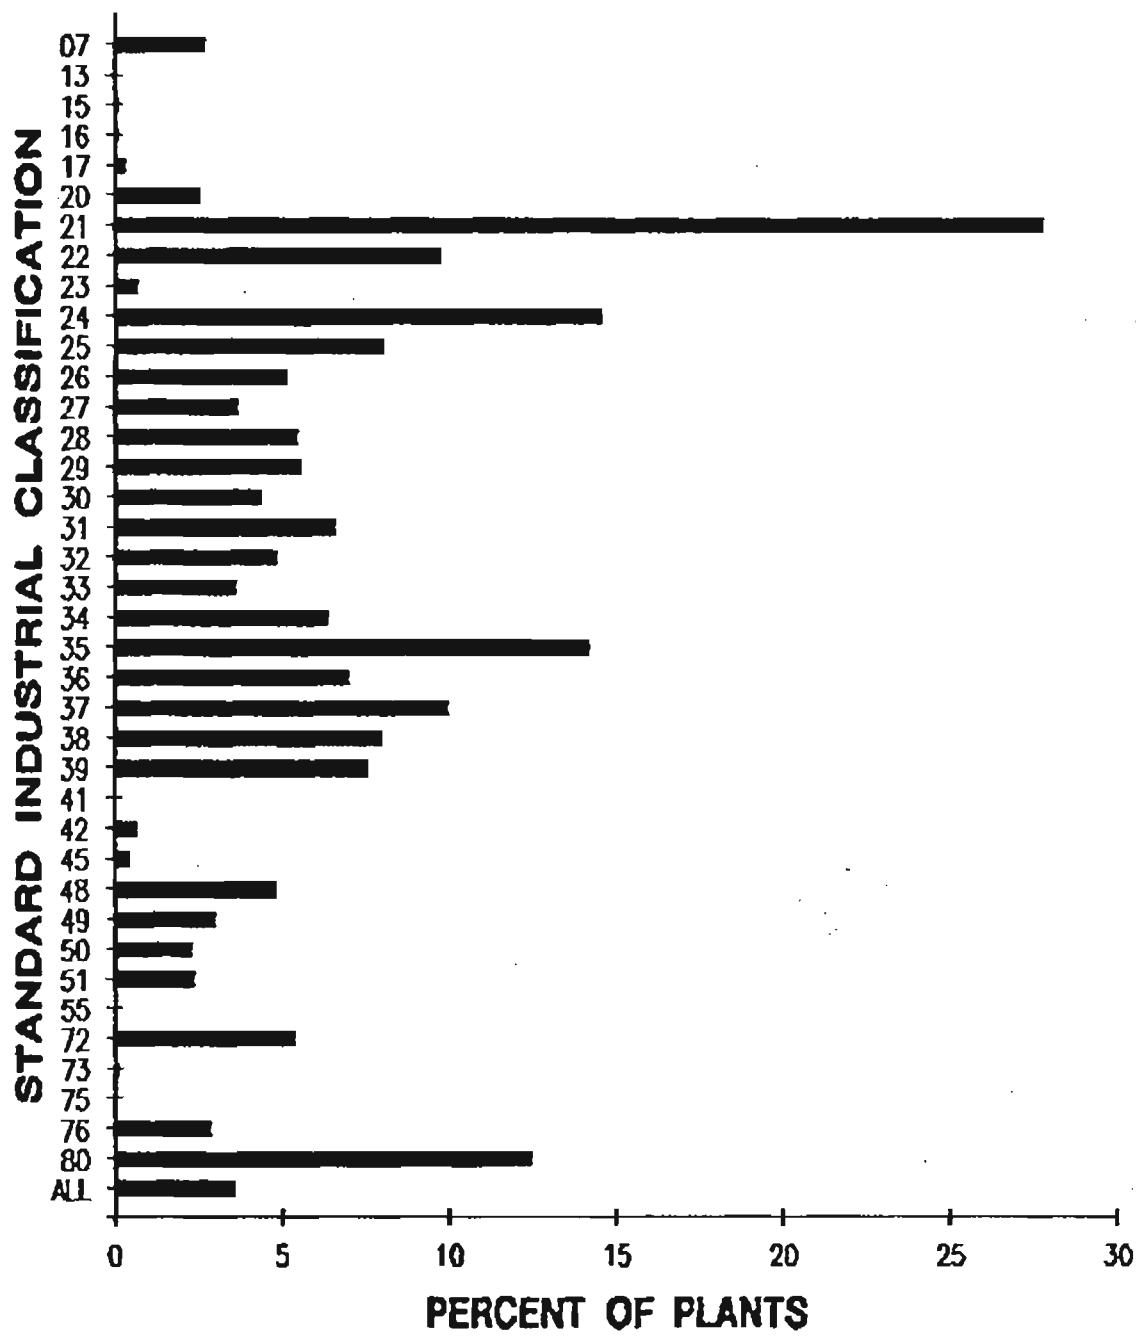

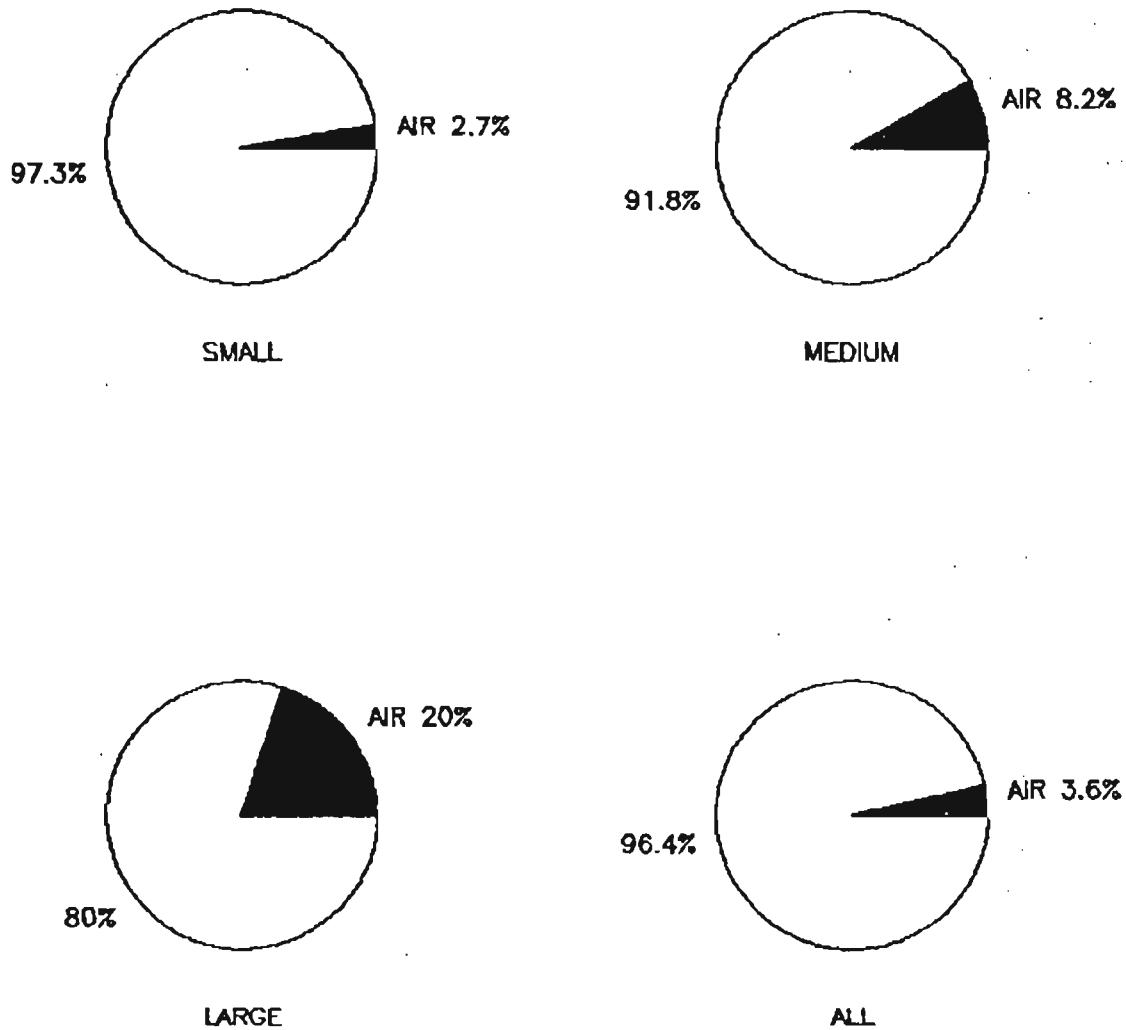

FIGURE IV - 77
PLANTS RECIRCULATING EXHAUST AIR
(NOES 1981-1983)

NIOSH QUESTIONNAIRE ITEM NO. 46
Areas of the Facility Involved in Recirculation of Exhaust Air

Intent

The intent of this question was to determine which areas of the facility provided or received exhaust air.

This item was displayed on the questionnaire as:

46. What processes or areas are involved?

Notes

No analysis of this question was done for this publication.

This is because the responses were recorded as free text and could not readily be encoded for computer processing.

Those interested in the data available on this question should contact NIOSH for further explanation and to arrange for the specialized processing that most closely meets their needs and definitions of plant areas.

NOES QUESTIONNAIRE ITEM NO 47
Use of Personal Protective Devices Required or Recommended

Intent

The intent of this question was to determine the policy of plant management regarding the use of personal protective devices.

This item was displayed on the questionnaire as:

47. Are there areas in this facility in which personal protective devices or equipment are required or recommended?

- 1 Yes, required
2 Yes, recommended
3 Yes, both
4 No (Skip to Question 53)

Notes

To require the use of personal protective devices meant that there was a formal management policy that some or all employees must use protective devices as a condition of employment.

To recommend the use of personal protective devices means that management encouraged the use of the protective devices, but did not make employment conditional on their use.

Personal protective devices and equipment include, but are not limited to; safety glasses, goggles, ear plugs, face shields, hard hats, gloves, safety shoes, rubberized clothing, welding helmets, and respirators.

Analysis

Two analyses of the responses to question 47 are presented.

- (1) Responses 47.1, 47.2, or 47.3 – Personal protective devices required and/or recommended

The estimates of the plants which require and/or recommend the use of personal protective devices, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-78, IV-79, IV-80, and IV-81, and Tables IV-59 and IV-60.

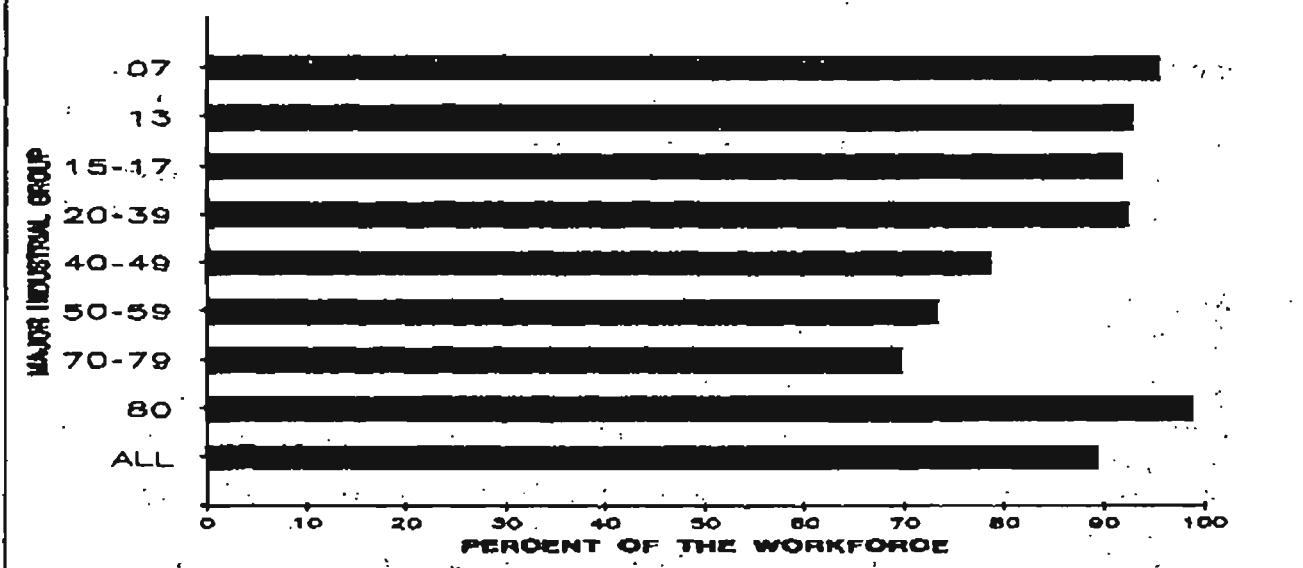

Figure IV-81	Plants which require or recommend personal protective devices (by 2-digit SIC)
Table IV-59	Number and percent of plants and employees in plants which require or recommend personal protective devices (by major industrial group)
Table IV-60	Number and percent of plants and employees in plants which require or recommend personal protective devices (by 2-digit SIC)

- (2) Responses 47.1, 47.2, 47.3, and 47.4 - Management policy on the use of personal protective devices

The estimated proportions of plants by size category, and workers in those plants, for each of the four possible management policies (require, recommend, require and recommend, no policy) regarding the use of personal protective devices are presented in Figures IV-82 and IV-83.

Figure IV-82	Management personal protective device policy by proportion of workers in plants
Figure IV-83	Management personal protective device policy by proportion of plants and plant size

MANAGEMENT PERSONAL PROTECTIVE DEVICE POLICY
BY PROPORTION OF PLANTS AND PLANT SIZE
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 48
Source of Personal Protective Devices Used by Workers

Intent

The intent of this question was to determine who is financially responsible for the purchase of the personal protective devices used by workers.

This item was displayed on the questionnaire as:

48. Who provides personal protective devices?

- 1 individual employees
2 employer
3 both
4 other (specify) _____

Notes

This question was asked only of those who responded that there was a management policy to require or recommend the use of protective devices.

The response was coded according to financial responsibility. For example, if employees purchased their own equipment, but were reimbursed by the company, the employer was regarded as the source of equipment. If costs were shared, then "both" was the provider.

In the instances where the equipment was provided by such outside sources as unions or government agencies the "other" response was coded.

Analysis

Two analyses of the responses to question 48 are presented.

(1) Response 48.2 - Employer provision of personal protective devices to workers

Estimates of the number and proportion of plants which provide personal protective gear to workers are displayed in Figures IV-84 and IV-85, and parts of Tables IV-61 and IV-62.

Figure IV-84 Number of plants providing personal protective devices to workers
 (by major industrial group)

Figure IV-85 Number of plants providing personal protective devices to workers
 (by 2-digit SIC)

Table IV-61 Number and percent of plants which require or recommend personal protective devices by provider (by major industrial group)

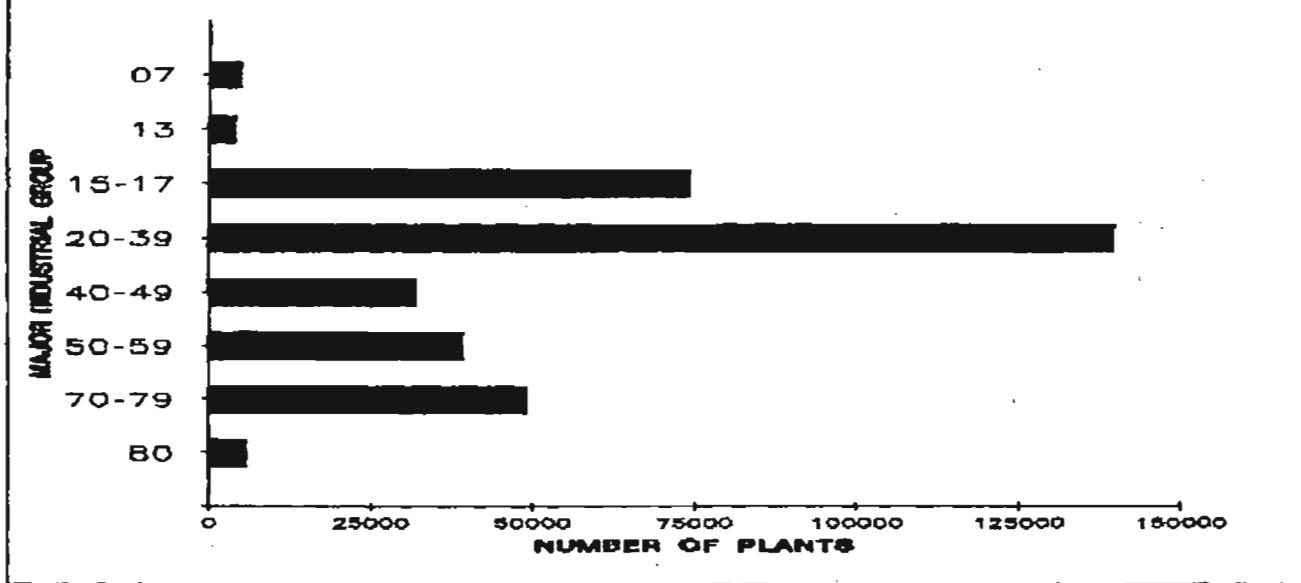

Table IV-62 Number and percent of plants which require or recommend personal protective devices by provider (by 2-digit SIC)

(2) Responses 48.1, 48.2, 48.3, or 48.4 - Provision of protective devices by workers, employers, employers/workers, or other sources

Estimates of the number and percent of plants, and proportion of workers in plants where protective gear is provided by workers, employers, employers and workers, or other sources are displayed in Figures IV-86 and IV-87, and parts of Tables IV-61 and IV-62.

Figure IV-86	Source of protective devices by proportion of workers and plant size

HOES QUESTIONNAIRE ITEM NO. 49

Responsibility for Maintenance of Personal Protective Devices

Intent

The intent of this question was to determine formal responsibility for the proper maintenance of personal protective devices.

This item was displayed on the questionnaire as:

49. Who has been designated to see to it that personal protective devices and equipment are serviced and maintained?

- 1 individual employees
2 employer representative
3 both
4 no one
5 other Specify _____

Notes

Maintenance of personal protective devices refers to such activities as cleaning, changing respirator filters, repairing equipment straps, or filling air tanks.

Responsibility for maintenance was established by management policy. For example, if the employer formally assumed all responsibility, "employer representative" was coded, and if employees were directed to perform their own maintenance operations, "individual employees" was coded. "Both" was coded where management policy directed a sharing of maintenance tasks between employer representative and employees.

In the absence of any specific management directive, "no one" was coded, and management arrangements to have maintenance performed by unions, government units, or other sources was coded "other".

Analysis

Two analyses of the responses to question 49 are presented.

(1) Response 49.2 - Personal protective devices maintained by the employer

The estimated proportions of the workforce employed in plants where personal protective devices are maintained by their employer are displayed in Figures IV-88 and IV-89.

Figure IV-88 Workers in plants where personal protective devices are maintained by the employer
(by major industrial group)

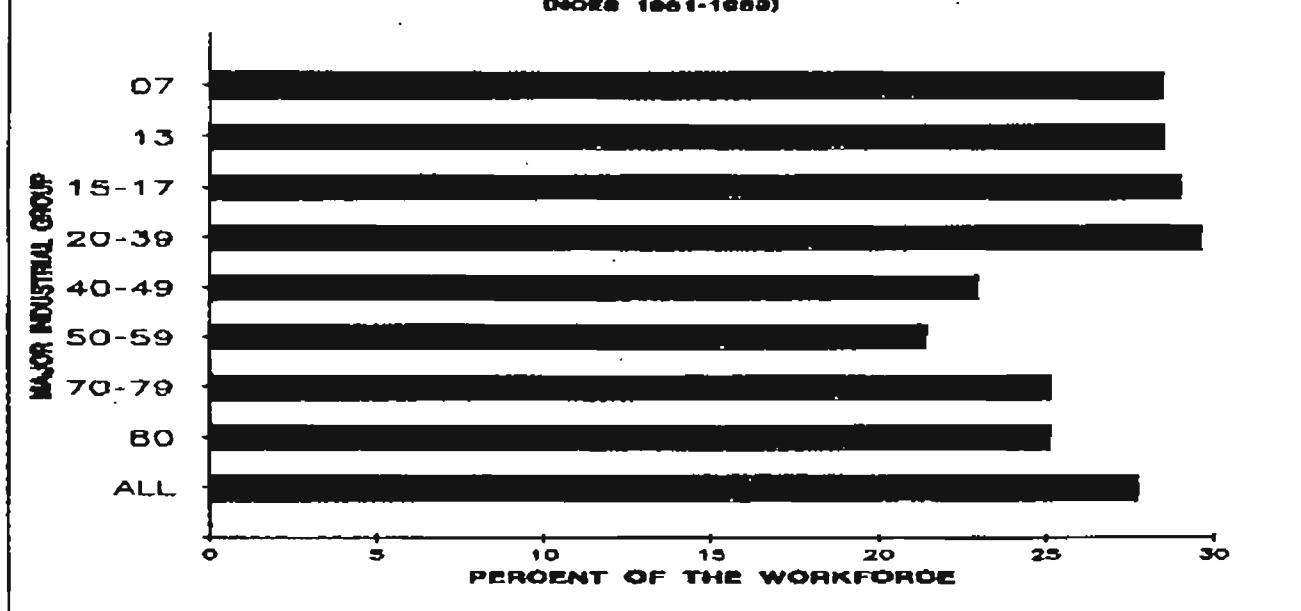

Figure IV-89 Workers in plants where personal protective devices are maintained by the employer
(by 2-digit SIC)

- (2) Responses 49.1, 49.2, 49.3, 49.4, and 49.5 - Assigned responsibility for maintenance of personal protective devices.

Estimates of the number and proportion of plants, and employees in those plants, by categories of assigned responsibility for maintenance of personal protective gear are presented in Figures IV-90 and IV-91, and Tables IV-63 and IV-64.

(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 50
Worker Use of Personal Protective Devices Enforced by Corrective Measures

Intent

The intent of this question was to determine if the employer had a functioning system of corrective actions for improper use, or failure to use personal protective devices or clothing.

This item was displayed on the questionnaire as:

50. In those instances where employees refuse to wear protective devices or fail to wear them properly, are corrective measures taken?

- 1 Yes
2 No (Skip to Question 53)

Notes

Corrective measures were considered to be formal actions by plant management against individuals who refused to use protective devices, or who wore them improperly. These measures included personnel actions (transfer, removal, suspension, dismissal, etc.) and fines imposed by management. Informal actions such as verbal notification of error, or labor union sanctions against the offending worker(s) were not regarded as corrective measures.

Improper use of personal protective devices meant the wearing of inappropriate clothing or devices, including respirators rendered non-functional due to improper facial fit or the use of inappropriate filters.

Analysis

One analysis of the responses to question 50 is presented.

Response 50.1 - Corrective measures taken to enforce proper use of protective devices

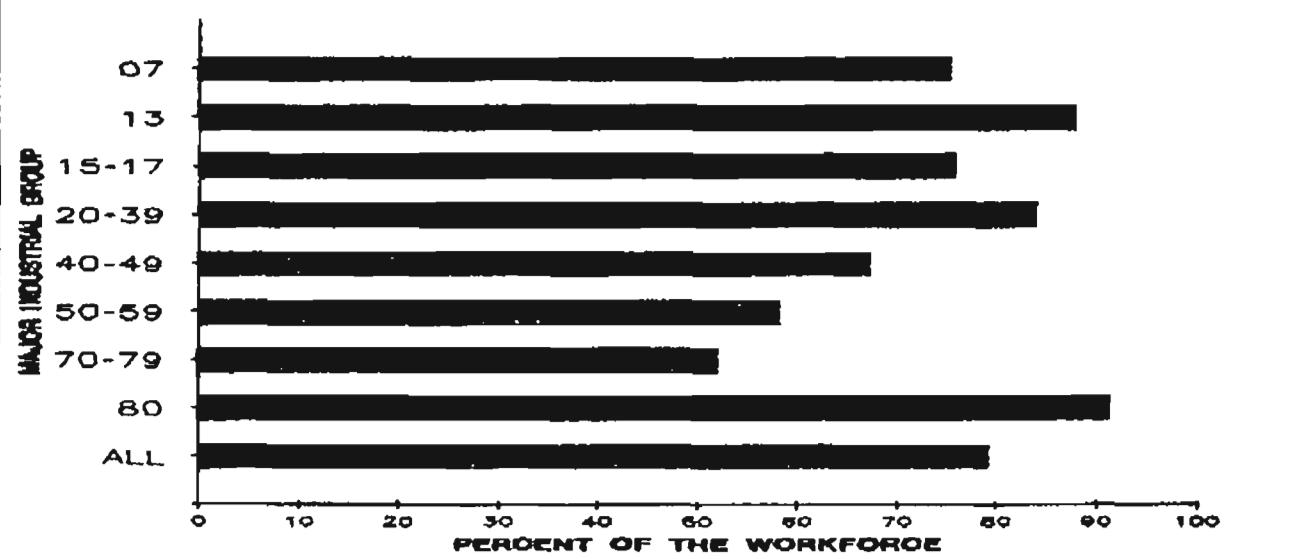

The estimates of the plants which have a functioning system of corrective actions established by the employer to enforce proper use of personal protective devices, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-92, IV-93, IV-94, IV-95, IV-96 and IV-97, and Tables IV-65 and IV-66.

NOES QUESTIONNAIRE ITEM NO. 51
Corrective Measures to Enforce Proper Use of Protective
Gear Which Involve Economic Penalties

Intent

The intent of this question was to determine to what extent workers were penalized by economic penalties for failure to comply with facility guidelines for the proper use of personal protective devices and equipment.

This item was displayed on the questionnaire as:

51. Do those corrective measures involve economic penalties?

- 1 Yes
2 No (Skip to Question 53)

Notes

This question was asked only if the interviewer received a positive response to the previous question regarding use of corrective measures.

Economic penalties were considered to be disciplinary actions taken by management which resulted in a financial loss to the affected worker. Examples of such actions are fines, dismissal, work hour reduction, suspension, or loss of seniority.

Actions not taken by management, such as union-sponsored sanctions, were regarded as a negative response.

Costs incurred by a worker, such as medical bills, as a consequence of failure to use protective gear properly, were not regarded as economic penalties.

Analysis

One analysis of the responses to question 51 is presented.

Response 51.1 - Corrective measures involve economic penalties

The estimates of the plants which impose economic penalties to enforce the proper use of personal protective devices, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-98, IV-99, IV-100, and IV-101, and Tables IV-67 and IV-68.

Figure IV-98 Proportion of plants which include economic penalties in their corrective measures to enforce protective device use

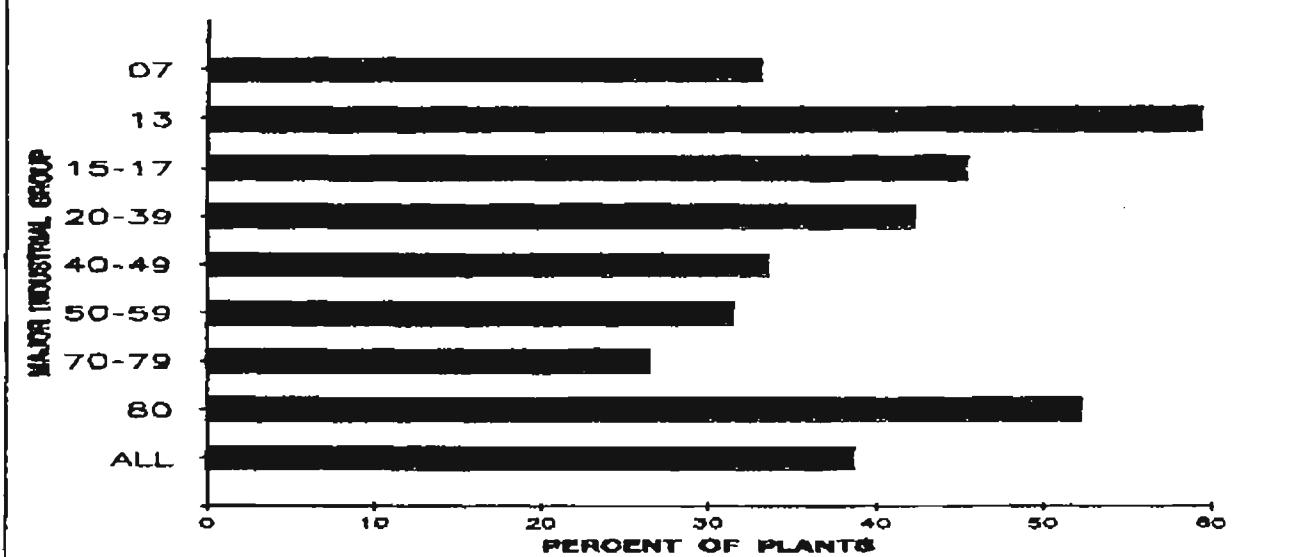

(by major industrial group)

Figure IV-99 Proportion of plants which include economic penalties in their corrective measures to enforce protective device use

(by 2-digit SIC)

Figure IV-100	Proportion of workers in plants which enforce protective device use with economic penalties
Figure IV-101	Proportion of plants which enforce protective device use with economic penalties
Table IV-67	Number and percent of plants and employees in plants which enforce protective device use with economic penalties (by major industrial group)
Table IV-68	Number and percent of plants and employees in plants which enforce protective device use with economic penalties (by 2-digit SIC)

NOES QUESTIONNAIRE ITEM NO. 52
Assessment of Economic Penalties in the Past Year as a
Result of a Protective Device Use Policy

Intent

The intent of this question was to determine whether management-directed actions had been taken in the past year for failure to use protective devices properly which involved direct or indirect economic loss to the worker(s) concerned.

This item was displayed on the questionnaire as:

52. Have any economic penalties been assessed in the past 12 months?

- 1 Yes
- 2 No, we know of no instances where violations of company policy have occurred within the last 12 months
- 3 No, although we know that there was a minimum of one violation of company policy within the last 12 months

Notes

This question was asked only of those who responded that the management-directed measures in their facility for improper use of personal protective equipment included the use of economic penalties.

As in question 51, economic penalties must be assessed by plant management, excluding action from any other source, such as a labor union.

Analysis

Two analyses of the responses to question 52 are presented.

(1) Response 52.1 - Economic penalties assessed in the past twelve months

The estimated proportions of plants and workers in plants which imposed economic penalties (fines) on workers in the past year for failure to properly use protective devices are displayed in Figures IV-102, IV-103, IV-104, and IV-105.

Figure IV-102 Workers in plants which fined employees in the past year for improper use of protective devices
(by major industrial group)

Figure IV-103 Workers in plants which fined employees in the past year for improper use of protective devices
(by 2-digit SIC)

Figure IV-104 Plants which fined workers in the past year for improper protective device use
(by major industrial group)

Figure IV-105 Plants which fined workers in the past year for improper protective device use
(by 2-digit SIC)

(2) Response 52.1, 52.2, or 52.3 - Categories of economic penalties imposed in the past twelve months

The estimates of the plants which have a policy of assessing economic penalties as part of their corrective measures for improper use of protective devices, by category of penalty assessment, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-106 and IV-107, and Tables IV-69 and IV-70.

Figure IV-106	Proportion of workers in plants by category of economic penalty for failure to use protective devices properly
Figure IV-107	Proportion of plants by category of economic policy for failure to use protective devices properly
Table IV-69	Number and percent of plants and workers in plants by category of economic penalty for improper protective device use in the past year (by major industrial group)
Table IV-70	Number and percent of plants and workers in plants by category of economic penalty for improper protective device use in the past year (by 2-digit SIC)

NOES QUESTIONNAIRE ITEM NO. 53
Existence of a Program to Regularly Conduct Safety Inspections

Intent

The intent of this question was to determine if regular or periodic safety inspections of the facility were conducted.

This item was displayed on the questionnaire as:

53. Do you have a program under which you regularly or periodically conduct safety inspections of this facility?

- 1 Yes
2 No (Skip to Question 56)

Notes

A "regular or periodic safety inspection" refers to programs established by facility management which provide inspections on a planned or predictable basis.

Regular or periodic safety inspections performed by consultants, insurance carrier specialists, or other non-government outside sources at the request of facility management meet the criteria for an affirmative response.

Safety inspections conducted by a government agency, precipitated by an accident, or which are conducted as isolated one-time events would result in a negative response to this question.

Analysis

One analysis of the responses to question 53 is presented.

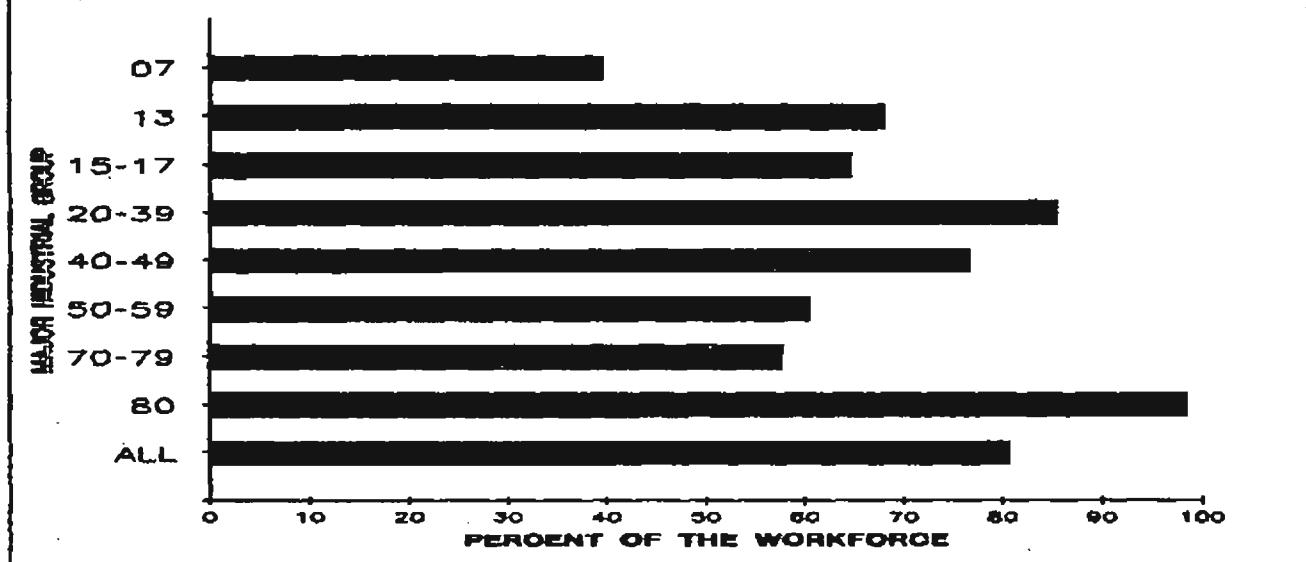

Response 53.1 - Regular or periodic safety inspections conducted

The estimates of the plants which conduct regular or periodic safety inspection of the facility, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-108, IV-109, IV-110, IV-111, IV-112, and IV-113, and Tables IV-71 and IV-72.

NOES QUESTIONNAIRE ITEM NO. 54
Written Reports Required for Safety Inspections

Intent

The intent of this question was to determine whether all safety inspections of the facility resulted in a written report of the findings.

This item was displayed on the questionnaire as:

54. Are written results of these safety inspections required?

- 1 Yes
2 No

Notes

This question was asked only of those respondents who indicated that safety inspections were regularly conducted.

Written reports were considered to be reports arising from inspection of a facility, whether positive or negative in nature. They need not have been formal, and would have included handwritten or transcribed oral reports.

Analysis

One analysis of the responses to question 54 is presented.

Response 54.1 - Written reports of safety inspections required

The estimates of the plants which require written reports of all safety inspections within the facility, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-114, IV-115, IV-116, IV-117, and Tables IV-73 and IV-74.

(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 55
Results of Safety Inspections Routinely Made Available to Workers

Intent

The intent of this question was to determine whether affected employees are routinely provided with the results of safety inspections.

This item was displayed on the questionnaire as:

55. Are the results of the safety inspections posted or otherwise made routinely available to affected employees?

- 1 Yes
2 No

Notes

"Routinely available" safety inspections results were considered to be those reports provided to affected employees as a normal practice established by management policy. These reports can be written or oral or displayed in areas commonly used by workers, as long as they convey the results of a safety inspection.

An "affected employee" was a worker whose occupational environment was included in a safety inspection.

Posting government inspections or any other inspection not initiated by management did not meet the intent of this question.

Analysis

One analysis of the responses to question 55 is presented.

Response 55.1 – Safety inspection reports made available to workers

The estimates of the plants which routinely make safety inspection reports available to their employees, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-118, IV-119, IV-120, IV-121, IV-122, and IV-123, and Tables IV-75 and IV-76.

NOES QUESTIONNAIRE ITEM NO. 56
Plants Which Have a Regular Preventive Maintenance Program

Intent

The intent of this question was to determine whether the facility had a regularly scheduled preventive maintenance program.

This item was displayed on the questionnaire as:

56. Do you have a regularly scheduled preventive maintenance program?

- 1 Yes
2 No

Notes

A preventive maintenance program was considered to be a management-initiated process of inspection and corrective action or repair intended to precede any actual failure of the physical structure or related equipment of the facility.

A program which involved preventive inspections at intervals of three or more years did not meet the criteria for a regularly scheduled preventive maintenance program.

Analysis

One analysis of the responses to question 56 is presented

Response 56.1 - Existence of a regularly scheduled preventive maintenance program

The estimates of the plants which have a regularly scheduled program for the preventive inspection of the facility and its equipment, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-124, IV-125, IV-126, and IV-127, and Tables IV-77 and IV-78.

PREVENTIVE MAINTENANCE PROGRAM
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 57
Regularly Scheduled Safety Training Programs for Workers

Item

The intent of this question was to determine if the facility had a regularly scheduled formal safety training program for workers.

This item was displayed on the questionnaire as:

57. Do you have a regularly scheduled formal safety training program for your employees?

1 Yes
2 No

Notes

A safety training program was considered to be one which was devoted to the recognition, evaluation, and control of safety hazards. It might include such subjects as: recognition of hazards presented by unguarded machinery, inadequate fire protection, and procedures to follow in case of an accident.

Programs which are informal, not initiated by management, concerned only with first aid procedures, or voluntary on the part of the employee did not meet the criteria for safety training. After-accident discussions or seminars were also excluded.

Analysis

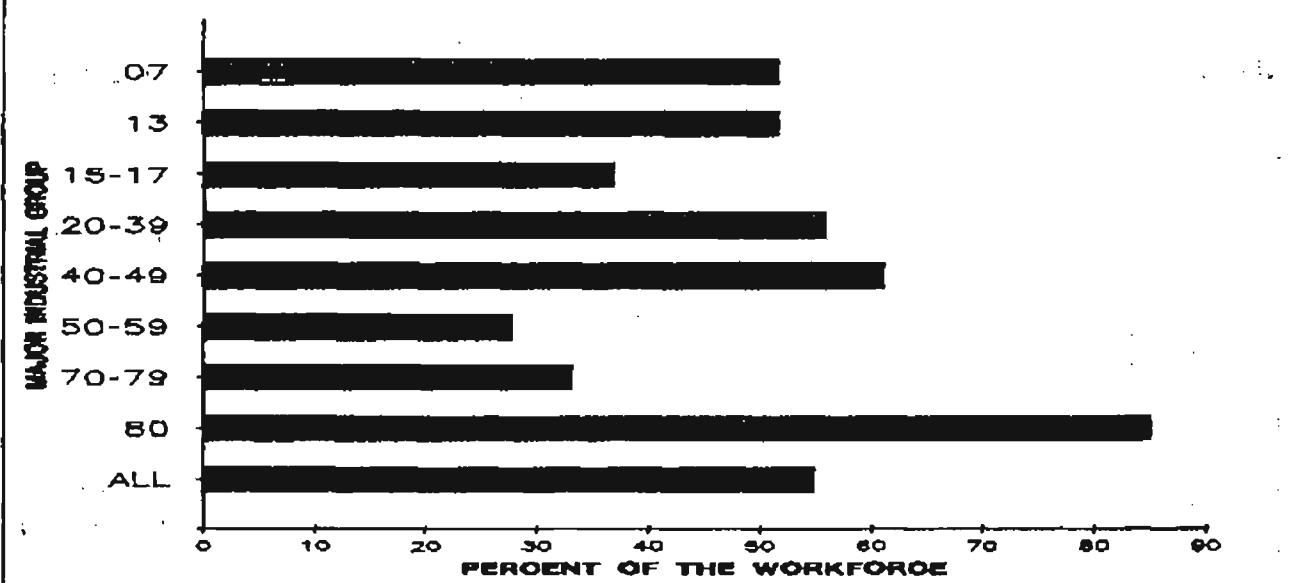

One analysis of the responses to question 57 is presented.

Response 57.1 – Existence of regularly scheduled safety training

The estimates of the plants which have a regularly scheduled formal safety training program, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-128, IV-129, IV-130, IV-131, IV-132, and IV-133, and Tables IV-79 and IV-80.

PLANTS WHICH HAVE A FORMAL
SAFETY TRAINING PROGRAM
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 58
Existence of a Program to Regularly Assess Worker Awareness of Safety Rules

Intent

The intent of this question was to determine if management makes periodic assessments of employee awareness of the safety rules established for the facility.

This item was displayed on the questionnaire as:

58. Do you have a program under which you regularly or routinely assess the employee's awareness of safety rules?

1 Yes
2 No

Notes

Continual, informal assessments by management representatives met the intent of this question if there was evidence that management initiated the assessment and received reports.

Voluntary or employee-suggestion input by workers to management concerning job safety were not an acceptable alternative program.

Analysis

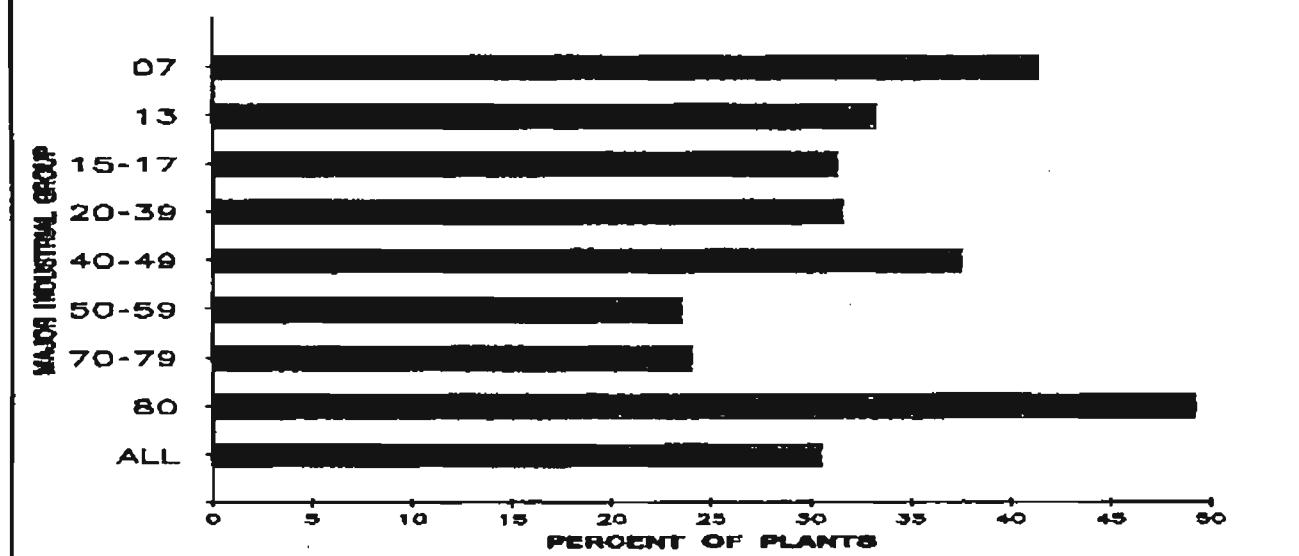

One analysis of the responses to question 58 is presented.

Response 58.1 - Employee awareness of safety rules regularly assessed.

Number and percent of plants and employees in plants which had a management-initiated and regularly scheduled (or continuous) program to assess employee awareness of facility safety rules, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-134, IV-135, IV-136, and IV-137, and Tables IV-81 and IV-82.

FIGURE IV - 136

**WORKERS IN PLANTS WHICH ASSESS EMPLOYEE
AWARENESS OF SAFETY RULES BY PLANT SIZE
(NOES 1981-1983)**

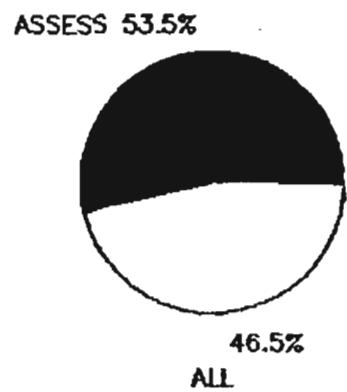

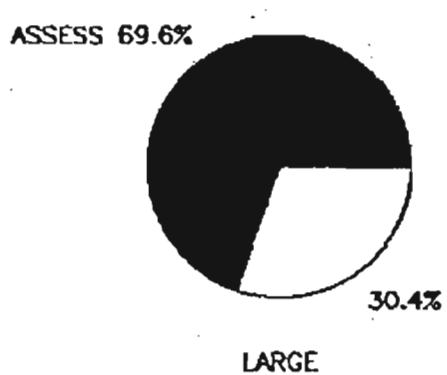

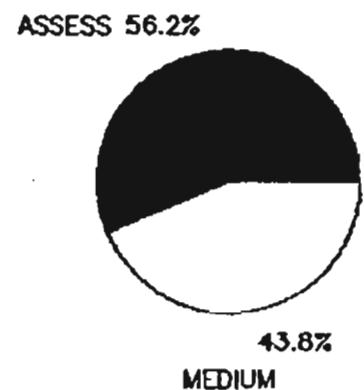

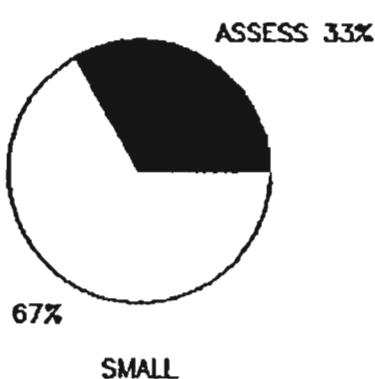

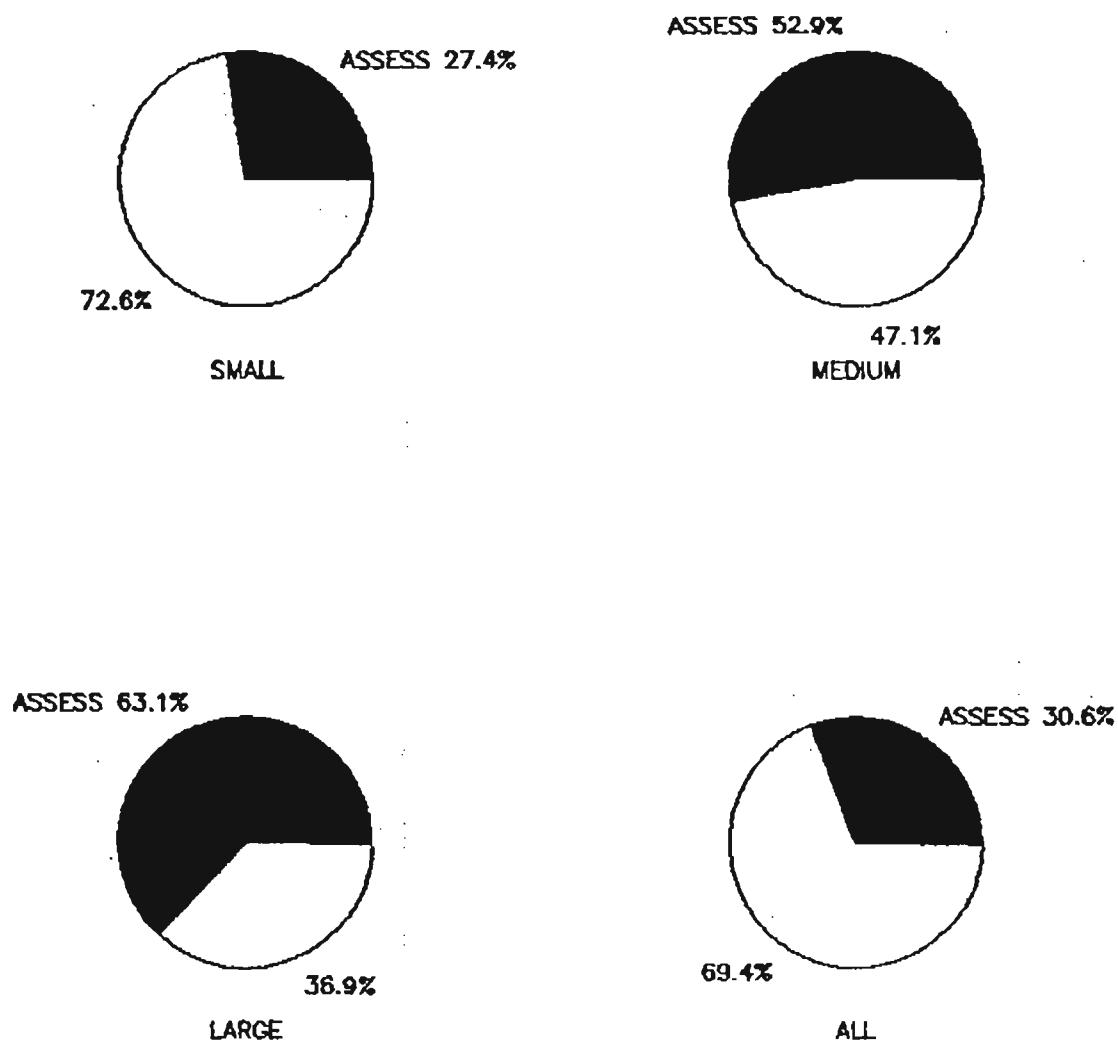

FIGURE IV - 137

**PLANTS WITH PROGRAMS TO ASSESS WORKER
AWARENESS OF SAFETY RULES**
(NOES 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 59
Plants Taking Corrective Measures for Safety Rule Violations

Intent

The intent of this question was to determine if the facility had a functioning program of corrective actions to be used when safety rules were violated.

This item was displayed on the questionnaire as:

59. In those instances where employees are found to be in violation of the safety rules, are correcting measures taken?

- 1 Yes
2 No (Skip to Question 62)

Notes

A corrective measure was considered to be a formal action by management personnel against a worker or workers who violated safety rules established for the facility. These actions include, but are not limited to: transfer, removal, dismissal, suspension, or fines imposed by management.

Verbal reprimands by management, or union sanctions against the worker(s) do not meet the intent of the question.

Analysis

One analysis of the responses to question 59 is presented.

Response 59.1 - Corrective measures taken for safety rule violations

The estimates of the plants which have a management-directed policy to take corrective measures against employees who violate safety rules, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-138, IV-139, IV-140, IV-141, IV-142, and IV-143, and Tables IV-83 and IV-84.

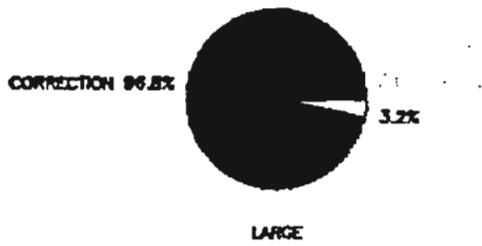

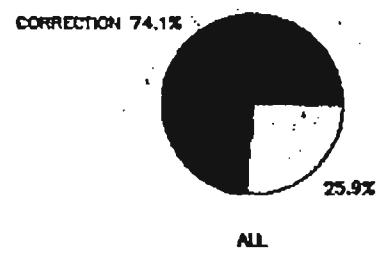

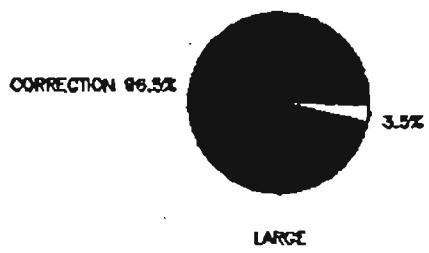

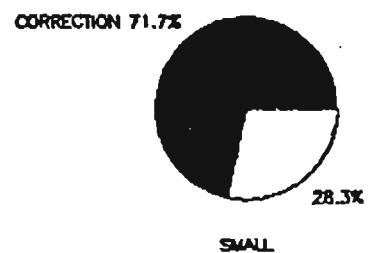

FIGURE IV – 143

**PLANTS WHICH TAKE CORRECTIVE MEASURES
IF EMPLOYEES VIOLATE SAFETY RULES**

(NOEs 1981-1983)

NOES QUESTIONNAIRE ITEM NO. 60
Corrective Measures for Safety Rule Violations Which Involve Economic Penalties

Intent

The intent of this question was to determine if the facility used economic penalties as part of the corrective measures policy for safety rule violations.

This item was displayed on the questionnaire as:

60. Do those corrective measures involve economic penalties?

- 1 Yes
2 No (Skip to Question 62)

Notes

This question was asked only of those respondents that indicated that corrective measures were taken by management for safety rule violations.

Economic penalties imposed by management were considered to be those which resulted in a financial loss to the penalized worker. Examples of such action include fines, dismissal, work hour reduction, suspension, or loss of seniority.

Actions not undertaken by management, such as labor union sanctions against the offending worker(s), were not considered to meet the intent of this question.

Analysis

One analysis of the responses to question 60 is presented.

Response 60.1 - Corrective measures include economic penalties

The estimates of the plants which include economic penalties in their corrective measures to enforce work safety rules, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-144, IV-145, IV-146, and IV-147, and Tables IV-85 and IV-86.

NOES QUESTIONNAIRE ITEM NO. 61
Assessment of Economic Penalties in the Past Year as a
Result of a Safety Rule Enforcement Policy

Intent

The intent of this question was to determine if management-directed actions which involved economic loss to the worker(s) concerned had been taken in the past year for safety rule violations.

This item was displayed on the questionnaire as:

61. Have any economic penalties been assessed in the past 12 months?

- 1 Yes
- 2 No, we know of no instances where violations of company policy have occurred withing the last 12 months.
- 3 No, although we know that there was a minimum of one violation of company policy withing the last 12 months.

Notes

This question was asked only of those who responded that their corrective measures for safety rule violations involved economic penalties.

As in question 60, economic penalties imposed by management resulted in an economic loss to the worker(s) involved. Examples included fines, dismissal, work hour reduction, suspension, or loss of seniority.

Corrective actions initiated by sources other than facility management were not considered affirmative responses to this question.

Analysis

Two analyses of the responses to question 61 are presented.

(1) Response 61.1 - Economic penalties assessed in the last year for safety rule violations

The estimated proportions of plants and workers in plants which imposed economic penalties (fines) on workers in the past year for safety rule violations are displayed in Figures IV-148, IV-149, IV-150, and IV-151.

Figure IV-148. Workers in plants which fined employees for safety rule violations in the past year
(by major industrial group)

Figure IV-149 Workers in plants which fined employees for safety rule violations in the past year
(by 2-digit SIC)

Figure IV-150 Plants which fined employees for safety rule violations in the past year
(by major industrial group)

Figure IV-151 Plants which fined workers for safety rule violations in the past year
(by 2-digit SIC)

- (2) Response 61.1, 61.2, or 61.3 - Categories of economic penalties imposed in the last year

The estimates of the plants which have a policy of assessing economic penalties as part of their corrective measures for safety rule violations, by category of penalty assessment, and workers in those plants (by number and proportion of the total) are displayed in Figures IV-152 and IV-153, and Tables IV-87 and IV-88.

- Figure IV-152** Workers in plants by plant size and category of economic penalty for safety rule violations
- Figure IV-153** Plants by size and category of economic penalty for safety rule violations
- Table IV-87** Number and percent of plants and workers in plants by category of economic penalty for safety rule violations (by major industrial group)
- Table IV-88** Number and percent of plants and workers in plants by category of economic penalty for safety rule violations (by 2-digit SIC)

 PENALTY FOR SAFETY RULE VIOLATIONS**
(NOES 1981-1983)

**NATIONAL OCCUPATIONAL EXPOSURE SURVEY
(1981-1983)
Analyses of Management Interview Responses**

Section V - General Recordkeeping

- retention of personnel records
- employee absenteeism records
- unscheduled absenteeism

turnover rates for permanent employees

**maintenance of Occupational Injuries and
Illnesses records**

NOES QUESTIONNAIRE ITEM NO. 62
Retention of Personnel Records on Terminated Employees

Intent

The intent of this question was to determine the length of time that facilities retained personnel records on workers whose employment had been terminated.

This item was displayed on the questionnaire as:

62. How long are personnel records on terminated employees retained?

— — — Years (If "forever" code "999")
(If "unknown" code "U K _")

Notes

Any recordkeeping system which identified an individual and provided personal data on that individual was considered.

Recordkeeping systems which identified only worker groups or which were regarded only as medical recordkeeping systems were not considered in this response.

As previously discussed in the Notes text on question 33, three classes of responses to this question were possible. "Unknown" (UK) responses were discarded as not containing useful information, "forever" responses are presented in terms of the number of plants (and workers in those plants) which maintained records "forever" and discrete value responses ("non-forever") were averaged across industry and facility strata.

Analysis

Two analyses of the responses to question 62 are presented.

- (1) Response 62 - Average "non-forever" years that facilities retain the personnel records on terminated employees

The estimates of the average number of years (to the nearest year) that facilities retain the personnel records of terminated employees are presented in Figures V-1 and V-2, and Tables V-1 and V-2.

Figure V-1 Average number of "non-forever" years plants keep personnel records on terminated workers
(by major industrial group)

Figure V-2 Average number of "non-forever" years plants keep personnel records on terminated workers
(by 2-digit SIC)

Table V-1 Average number of years facilities keep personnel records on terminated employees among plants not reporting "forever" (by major industrial group)

Table V-2

Average number of years facilities keep personnel records on terminated employees among plants not reporting "forever" (by 2-digit SIC)

(2) Response 62 - Retention of personnel records "forever"

The estimates of the plants which retain personnel records on terminated employees "forever", and workers in those plants (by number and proportion of the totals) are displayed in Figures V-3 and V-4, and Tables V-3 and V-4.

Figure V-3

Proportion of plants which keep personnel records on terminated employees "forever"
(by major industrial group)

Figure V-4

Plants which keep personnel records on terminated employees "forever"
(by 2-digit SIC)

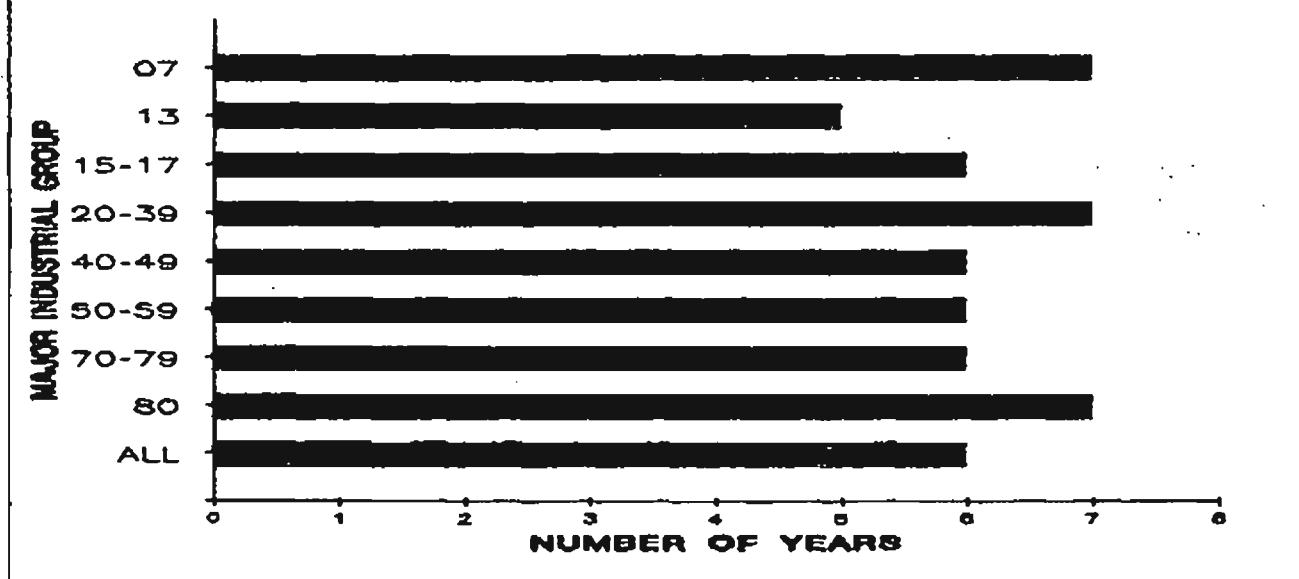

Table V-3

Number and percent of plants and employees in plants which keep personnel records on terminated workers "forever" (by major industrial group)

Table V-4

Number and percent of plants and employees in plants which keep personnel records on terminated workers "forever" (by 2-digit SIC)

Recordkeeping on Employee Absenteeism

Intent

The intent of this question was to determine if facility management kept records on employee absenteeism.

This item was displayed on the questionnaire as:

63. Do you keep employee absenteeism records?

- 1 Yes, showing specific nature of illness where appropriate
- 2 Yes, showing only the type of absence
- 3 Yes, without showing the type of absence
- 4 No

Notes

Employee absenteeism record refers to that information kept by management concerning the failure of employees to report for work as scheduled.

Recordkeeping by management intended only to satisfy federal, state, or local regulations were not considered an affirmative response.

Simply recording the presence or absence of an employee (exemplified by industries which pay only for days worked) was coded "3". Additional recordkeeping which specified at least absence type (such as illness or personal leave) was coded "2", and recordkeeping which provided specifics on type of illness where appropriate was coded "1".

Analysis

Two analyses of the responses to question 63 are presented.

(1) Responses 63.1, 63.2, and 63.3 - Maintenance of any record keeping system for employee absenteeism.

The estimates of the plants which keep any type of absenteeism records, and workers in those plants (by number and proportion of the total) are displayed in Figures V-5 and V-6, and Tables V-5 and V-6.

- | | |
|------------|---|
| Figure V-5 | Plants which keep absenteeism records
(by major industrial group) |
| Figure V-6 | Plants which keep absenteeism records
(by 2-digit SIC) |
| Table V-5 | Number and percent of plants and employees in plants
which keep any type of absenteeism records (by major
industrial group) |
| Table V-6 | Number and percent of plants and employees in plants
which keep any type of absenteeism records (by 2-digit
SIC) |

- 2) Responses 63.1, 63.2, 63.3, or 63.4 - Maintenance of recordkeeping systems for employee absenteeism by type of record

Estimates of the proportion of plants, and workers in those plants, which keep specific types of absenteeism records are displayed in Figures V-7 and V-8.

Figure V-7 Workers in plants which keep absenteeism records by plant size and records type

Figure V-8 Plants which maintain absenteeism records by plant size and record type

Note: As displayed in Figure V-7 and V-8;

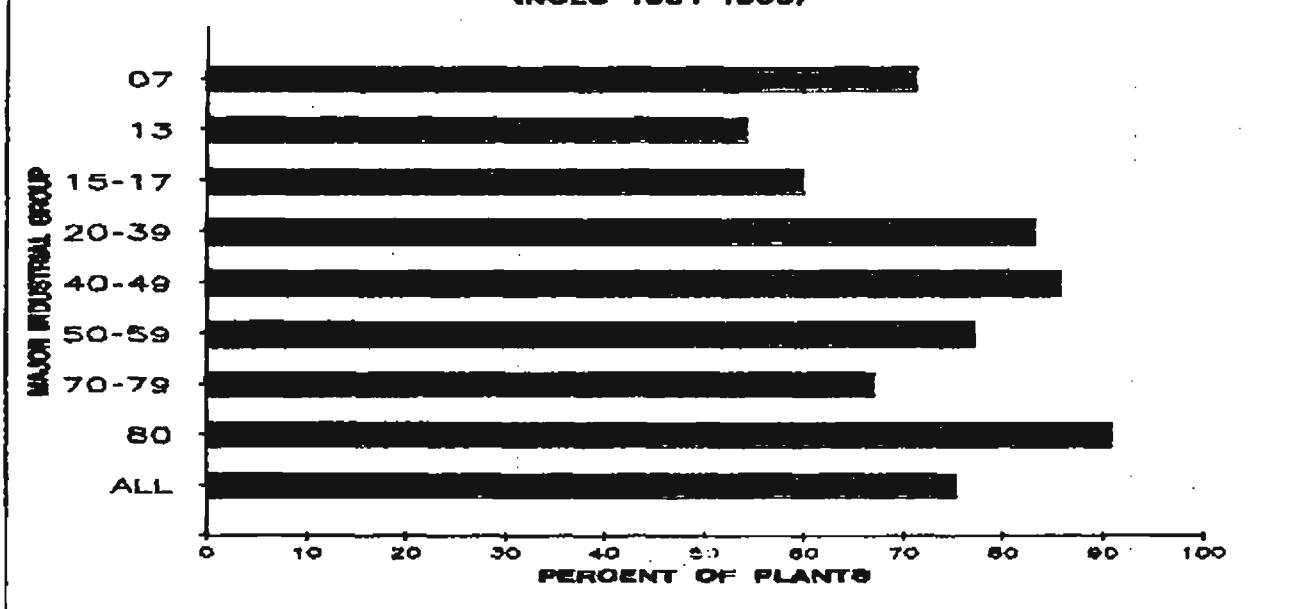

"illness" is equivalent to response 63.1 (showing specific nature of illness).

"kind" is equivalent to response 63.2 (showing only type of absence).

"general" is equivalent to response 63.3 (without showing the type of absence).

"none" is equivalent to response 63.4 (no).

NOES QUESTIONNAIRE ITEM NO. 64
Unscheduled Absenteeism Rate

Intent

The intent of this question was to determine the unscheduled absenteeism rate due to illness or injury.

This item was displayed on the questionnaire as:

64. What is your rate of unscheduled absenteeism?

— — — days per employee per year (If unknown, code "U X")

Notes

"Unscheduled absenteeism" was defined as the failure of an employee to report for work when scheduled. "Rate" was defined as the number of days per year per employee.

Employee absenteeism due to vacations, jury duty, pre-arranged personal leave, maternity leave, strikes, layoffs, or weather-related work cancellations was not considered unscheduled absenteeism.

A work year was considered to be 240 days per year, in those cases where calculations were performed by survey personnel.

Response coded "999", or unknown, were discarded in calculating the average unscheduled absenteeism rates displayed in the accompanying Figures and Tables.

Analysis

One analysis of the responses to question 64 is presented.

Response 64 - Average unscheduled absenteeism rate

Estimates of the average unscheduled absenteeism rate (days per employee per year) is displayed in Figures V-9 and V-10, and Tables V-7 and V-8.

Figure V-9 Average days of annual unscheduled absenteeism per worker

NOES QUESTIONNAIRE ITEM NO. 65
Turnover Rate Among Non-Administrative Permanent Employees

Intent

The intent of this question was to determine an overall turnover rate for permanent employees in non-administrative positions.

This item was displayed on the questionnaire as:

65. What is your turnover rate among permanent employees in the nonadministrative areas?

— — % per year

Notes

Permanent employees are those workers expected to retain their positions on a long-term basis (more than one year). A non-administrative position is one which is directly involved with the production, packaging, inspecting, or shipping of the company product(s).

Any permanent employee who worked directly in the production, packaging, or shipping/receiving areas of the facility at least 50% of their work day was included in calculations of the turnover rate.

Temporary or seasonal employees were excluded from the calculations of turnover rate.

Analysis

One analysis of the responses to question 65 is presented.

Response 65 – Average turnover rate among non-administrative permanent employees

Estimates of the average turnover rate among non-administrative permanent employees (percent of the workforce per year) are displayed in Figures V-11 and V-12, and Tables V-9 and V-10.

FIGURE V - 12
AVERAGE TURNOVER RATE AMONG
NON-ADMINISTRATIVE WORKERS
(MOES 1981-1983)

HOES QUESTIONNAIRE ITEM NO. 66
Industry Maintenance of the OSHA 200 Form

Intent

The intent of this question was to determine if facilities were maintaining the Summary of Occupational Injuries and Illnesses Form (OSHA 200) and to extract data from it.

This item was displayed on the questionnaire as:

66. May I see the latest Summary of Occupational Injuries and Illnesses Form (OSHA Form 200)? (OSHA regulations provide for inspection by NIOSH).

- 1 Yes
2 No (or company does not keep one)

SURVEYOR: COPY THE FOLLOWING INFORMATION FROM THE OSHA FORM 200

Occupational Injuries

- a. Number of deaths (column 1) _____
b. Number of injuries with lost workdays (column 3) _____
c. Number of injuries without lost workdays (column 6) _____

Occupational Illnesses

- a. Skin diseases or disorders (column 7a) _____
b. Dust diseases of the lungs (column 7b) _____
c. Respiratory conditions due to toxic agents (column 7c) _____
d. Poisoning (systematic effects of toxic material) (column 7d) _____
e. Disorders due to physical agents (column 7e) _____
f. Disorders associated with repeated trauma (column 7g) _____
g. Deaths (column 8) _____
h. Number of illnesses with lost workdays (column 10) _____
i. Number of illnesses without lost workdays (column 13) _____

Notes

If the surveyed facility kept, and allowed access to the OSHA 200 form, a "yes" response was encoded, crediting the facility with maintaining the OSHA 200 form. If the facility refused access, or did not maintain the form, a "no" response was encoded.

In the case of access to the OSHA 200 form, field surveyors recorded the data as it existed on the copy maintained by the facility.

Examination of the question 66 information gathered during the survey changed the original intentions for data publication. First, approximately 28% of all the facilities surveyed did not maintain the OSHA 200 form. Second, viewing the data collected from the facilities which did maintain the form yielded less data than had been anticipated. For example, of the 3,219 OSHA 200 forms reviewed, 52 had data for number of deaths. The combination of these factors, in the view of the authors, created a situation where the data formats seen in this volume could not be created with a reasonable expectation of confidence in the accuracy of the published data. While the authors would be happy to share the accumulated injury/illness data with interested persons, we would suggest that access to the files maintained by the Bureau of Labor Statistics in their much larger inventory of OSHA 200 data would prove to be far more fruitful.

Accordingly, the authors elected to simply present an analysis of facility compliance with requirements to maintain an OSHA 200 log as observed in the survey sample frame.

Analysis

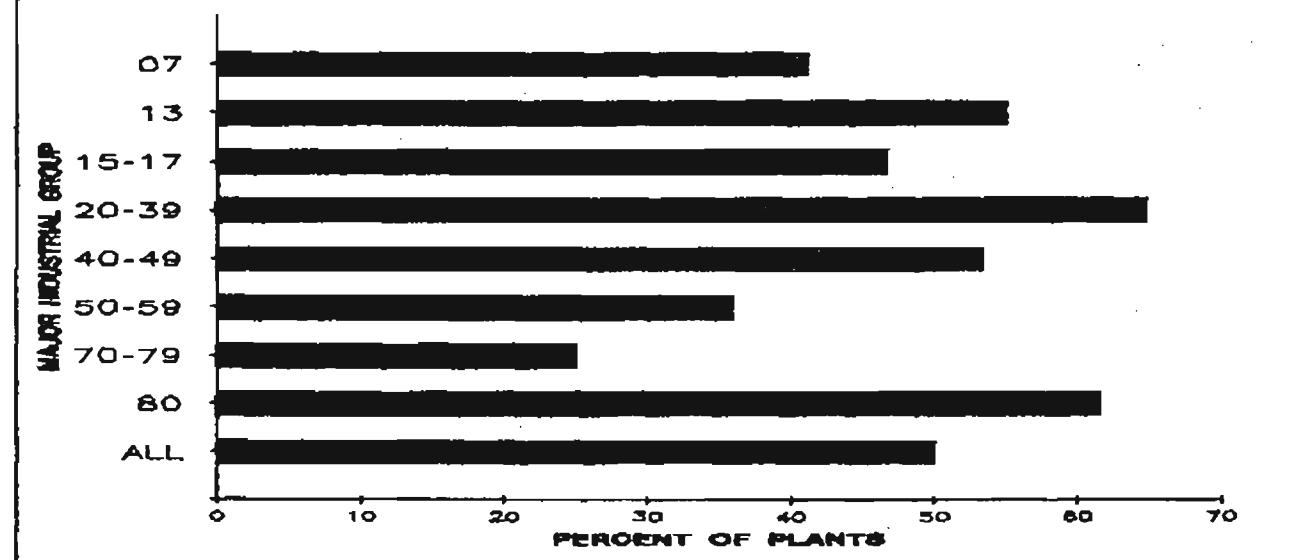

One analysis of the responses to question 66 is presented.

Response 66.1 - An OSHA form 200 is maintained

Estimates of the plants which maintain the OSHA 200 form, and workers in those plants (by number and proportion of the total) are displayed in Figures V-13 and V-14, and Tables V-11 and V-12.

Appendix A

**Descriptions of Major Industrial Groups Included In
the National Occupational Exposure Survey**

Appendix A
Descriptions of Major Industrial Groups Surveyed During the NOES
(See Standard Industrial Classification Manual - 1972)
Executive Office of the President, Office of Management and Budget)

MAJOR GROUP	TITLE	ACTIVITY
07	Agricultural Services	Crop preparation services, veterinary services, lawn and garden services, and shrub and tree services
13	Oil and Gas Extraction	Operation of oil and gas field properties; drilling of oil and gas wells; oil and gas exploration services; and general oil and gas field services
15-17	Construction	Contract construction of residential and commercial buildings; construction of roads, bridges, and other heavy projects; and special trade contract construction
20-39	Manufacturing	Mechanical or chemical transformation of materials into new products, usually for resale or transfer to industrial users rather than for domestic consumption
40-49	Transportation, Communications and Utilities	Railroad and local transportation hauling, and warehousing; water and air transportation; communications; transmission and distribution of natural gas and electric energy; operation of water and sanitary services
50-59	Wholesale and Retail Trade	Wholesale distribution of automobiles, and automobile parts; distribution of construction materials, metals and ores; distribution of chemicals and petroleum; automobile dealers and repair, including gas stations

MAJOR GROUP	TITLE	ACTIVITY
70-79	Services	Laundries and dry cleaning; photographic services; beauty shops, funeral services; mailing, art, and reproduction services; cleaning, disinfecting and extermination services; research and development; automotive repair and service; miscellaneous machinery repair
80	Health Services	Medical, surgical, and other health services including hospitals and medical or dental laboratories

Appendix B

**Descriptions of Standard Industrial Classifications
Included In the National Occupational Exposure Survey**

Appendix B
Descriptions of Standard Industrial Classifications Surveyed in NOES
(See Standard Industrial Classification Manual - 1972)
Executive Office of the President, Office of Management and Budget)

SIC CODE	TITLE	ACTIVITY
07	Agricultural Services	Crop preparation, veterinary, lawn, garden and tree services
13	Oil and Gas Extraction	Operation of oil and gas field properties; drilling of oil and gas wells; exploration and general oil and gas field services
15	General Building Contractors	Contract construction of residential and non-residential buildings; general contractors
16	Construction Other than Building	Highway, street, bridge and tunnel construction; water, sewer, pipeline, communication, and miscellaneous heavy construction
17	Special Trade Contractors	Plumbing, heating, air conditioning, painting and paperhanging, electrical, concrete, plastering and carpentry work; roofing and sheet metal, excavation, and installation of building equipment.
20	Food and Kindred Products	Meat packing, poultry processing, dairy production, canning, grain milling, baking and confectioneries; fats, oils, liquors, and miscellaneous food products.
21	Tobacco Manufacturers	Manufacture of cigars and cigarettes
22	Textile Mill Products	Broad woven fabric milling, cotton and man-made fiber; narrow fabric milling; knitting mills; textile dyeing and finishing, floor covering mills, yarn and thread mills; miscellaneous textiles

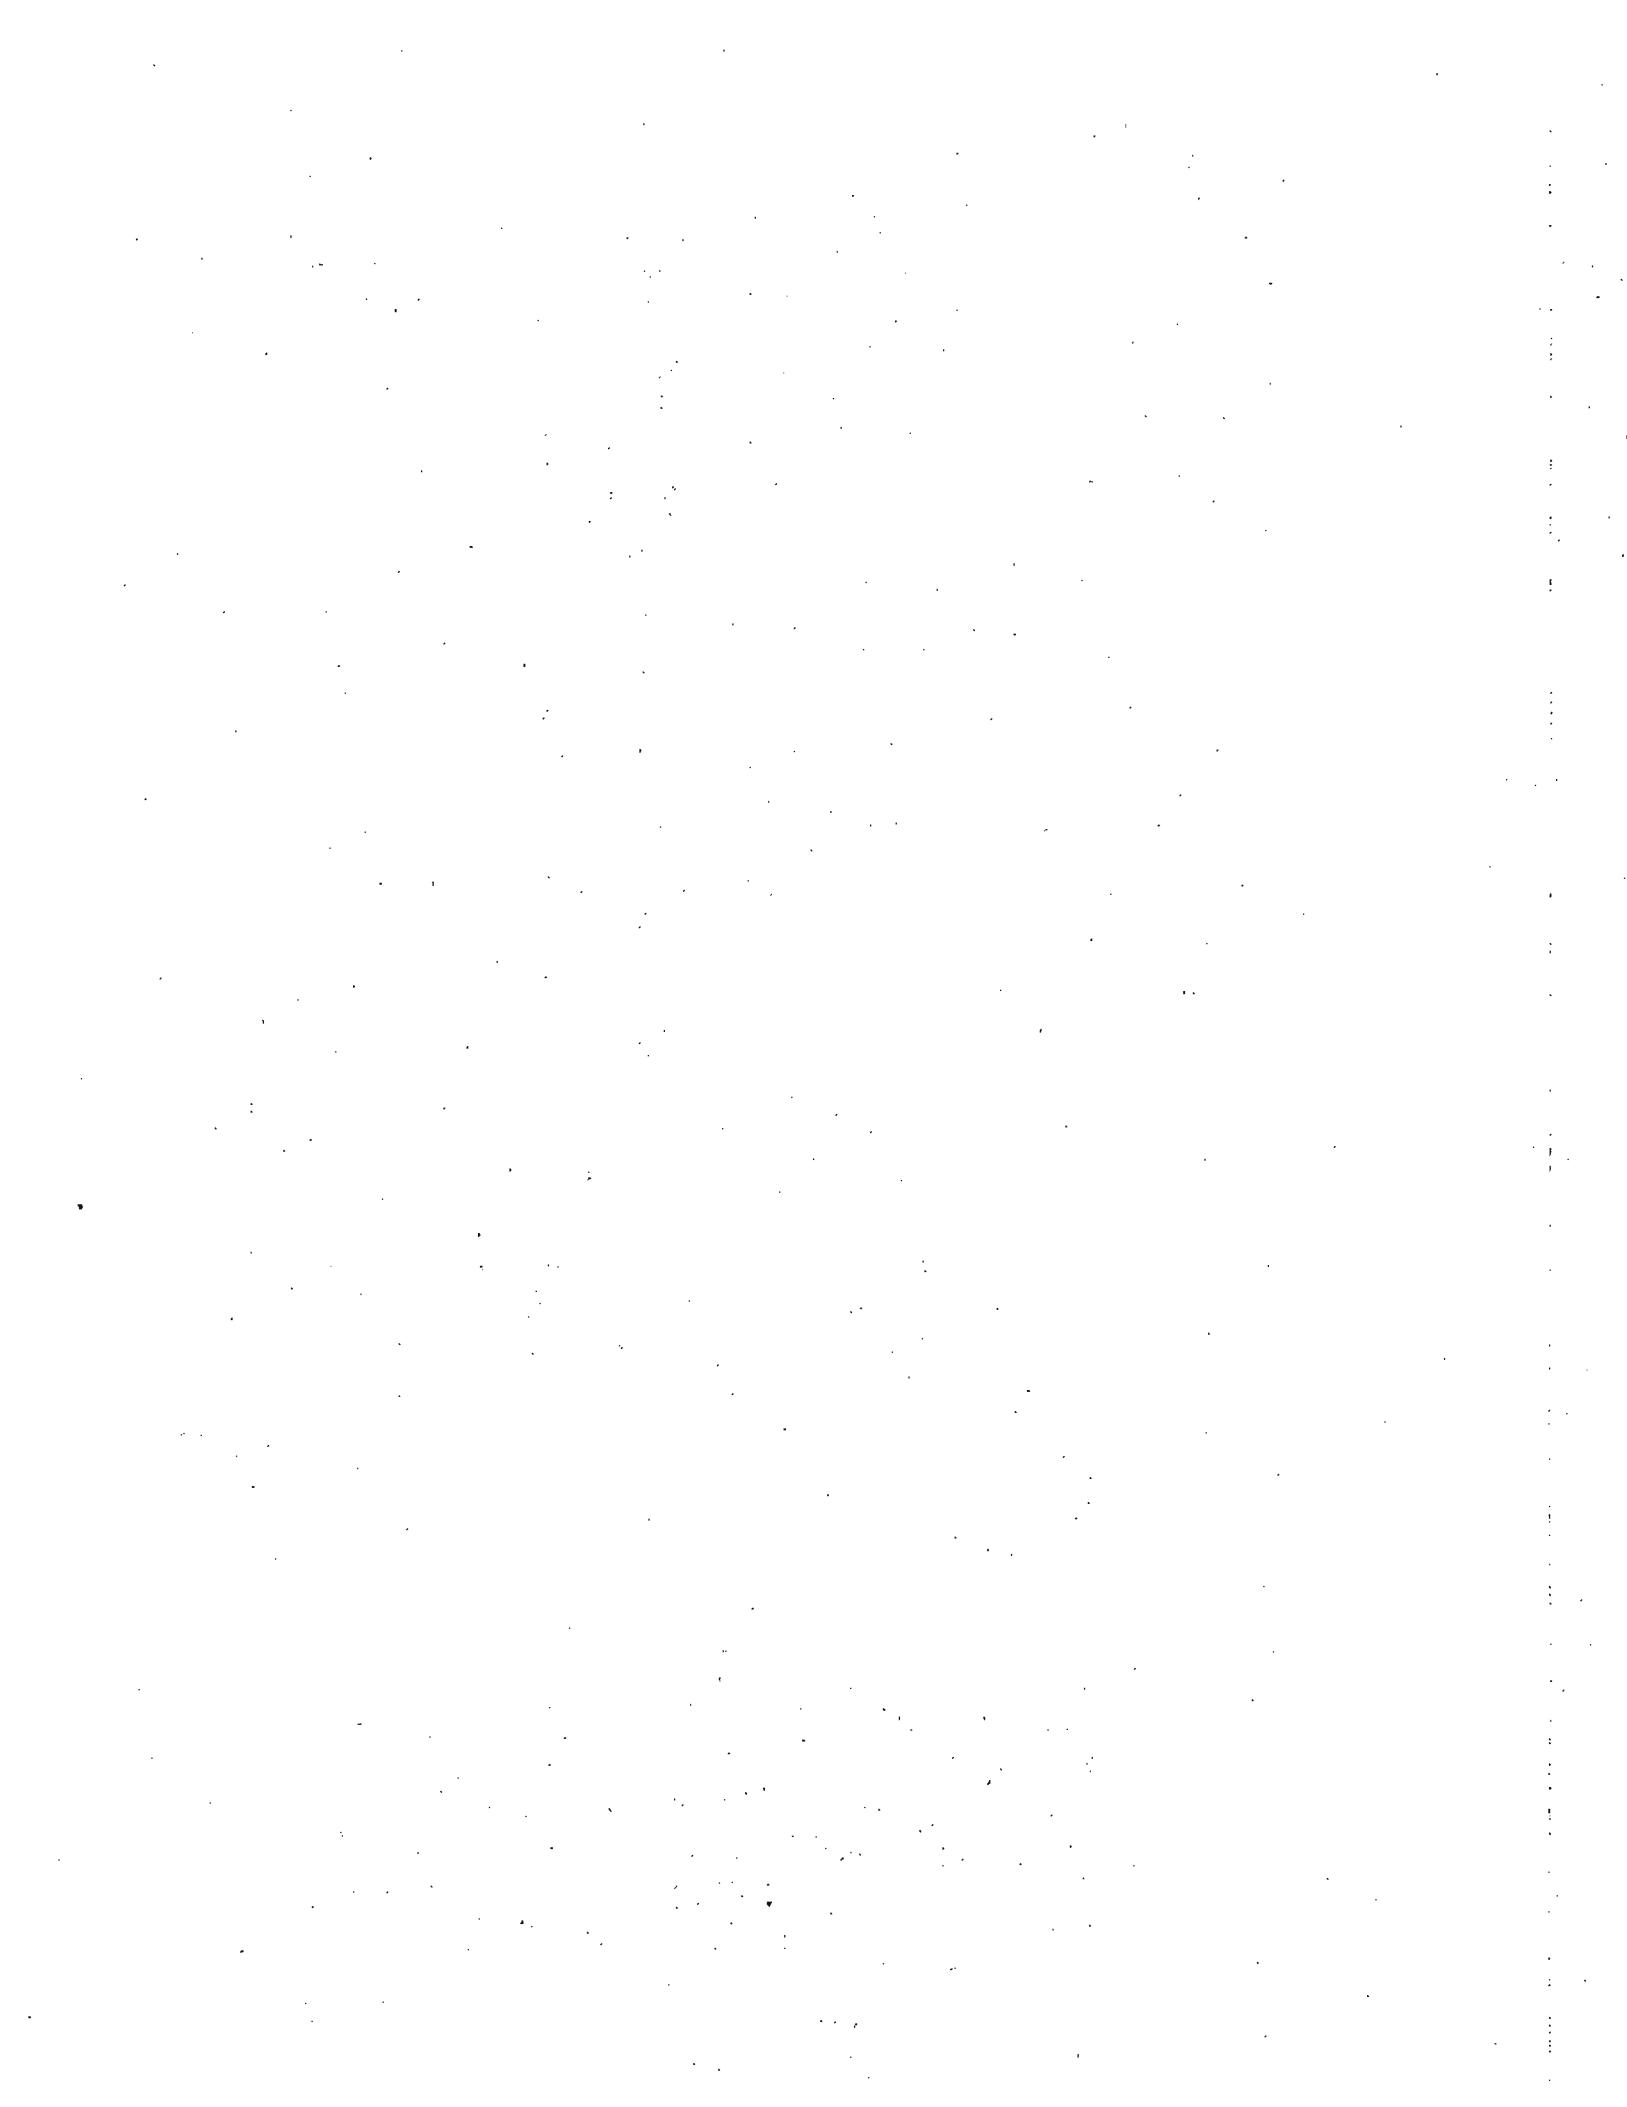

SIC CODE	TITLE	ACTIVITY
23	Apparel and Other Finished Products	Manufacture of mens and boys clothing, women's and girls outer wear and under garments/ hats and caps; fur and leather goods and waterproof out garments; miscellaneous fabricated textile products
24	Lumber and Wood Products Except Furniture	Logging camps and contractors; sawmills and planning mills; mill work, veneer and plywood production; wood containers, buildings, and mobile homes; miscellaneous wood products
25	Furniture and Fixtures	Manufacture of wood household furniture, upholstered furniture, and metal furniture; manufacture of office and public building furniture; partitions and office fixtures; miscellaneous furniture and fixtures
26	Paper and Allied Products	Operation of pulp, paper, and paperboard mills; manufacture of paperboard products, building paper, and building boards.
27	Printing and Publishing	Publishing newspapers, periodicals, and books; commercial printing and engraving; manufacture of greeting cards and blank books; printing trade services
28	Chemicals and Allied Products	Production of industrial inorganic chemicals, plastics, and synthetic rubbers and resins; biological products and medicinals; manufacture of soaps, cleaning preparations, and perfumes; paints, varnishes, and lawyers; production of industrial organic and agricultural chemicals and pesticides; inks, adhesives and miscellaneous chemical products

<u>CODE</u>	<u>TITLE</u>	<u>ACTIVITY</u>
29	Petroleum Refining	Petroleum refining; production of paving and roofing materials and miscellaneous products of petroleum and coal
30	Rubber and Miscellaneous Plastic Products	Manufacture of tires and inner tubes; rubber and plastic hose, belting, and miscellaneous products
31	Leather and Leather Products	Leather tanning and finishing; boot, shoe, handbag and miscellaneous leather good manufacture.
32	Stone, Clay, Glass and Concrete Products	Manufacture of flat glass, glassware, glass containers, and glass products; manufacture of hydraulic cement; production brick, clay tile, pottery, and porcelain; manufacture of concrete, gypsum, plaster, ready-mix concrete; asbestos and miscellaneous non-metallic products.
33	Primary Metal Industries	Smelting refining, rolling, drawing, and alloying of ferrous and non-ferrous metals
34	Fabricated Metal Products, Except Machinery and Transportation Equipment	Fabrication of such products as cans, tinware, cutlery, metal stampings, and ordinance; manufacture of enameled iron, cast iron, and metal sanitary ware; plumbing fixtures, heating equipment, structural metal products; screw machine products; nuts and bolts; forging and electroplating services

<u>CODE</u>	<u>TITLE</u>	<u>ACTIVITY</u>
35	Machinery, Except Electrical	Manufacture of steam and gas turbines, internal combustion engines, farm machinery, construction and mining machinery; production of machine tools, industrial trucks, metalworking, and special industry machinery; office, computing, refrigeration, and laundry machinery.
36	Electrical and Electronic Machinery	Production of electric transmission and distribution equipment, switch gear, control apparatus; and welding apparatus; manufacture of household appliances and electric lighting and wiring equipment for residential industrial use; radio, TV, and other electronic components
37	Transportation Equipment	Manufacture of motor vehicles, truck trailers, aircraft, ships, and boats; production of railroad equipment, missiles, travel trailers, and recreational vehicles.
38	Measuring, Analyzing, and Controlling Instruments	Manufacture of engineering and laboratory instrumentation and environmental controls for heating and cooling applications; production of industrial process controls, and measuring instruments; optical and medical instruments and photographic equipment
39	Miscellaneous Manufacturing	Production of jewelry, silverware, stainless steel ware, toys, athletic goods, artists materials, and novelty and miscellaneous items.
41	Local and Suburban Transit	Furnishing local transportation over regular routes on a regular schedule, taxicab and school buses, and terminal maintenance of passenger terminals

CODE	TITLE	ACTIVITY
42	Freight Transportation and Warehousing	Operation of local and "over the road" trucking services; warehousing of agricultural, refrigerated, and general warehousing, and freight terminal operation
44	Water Transportation	Operation of towing and tugboat services, marine cargo handling, and water transport services such as boat hiring, ship cleaning, and cargo salvage
45	Transportation by Air	Operation of passenger or freight airlines, flying fields, and airport terminal services
48	Communication	Furnishing telephone or telegraph services to the public, operation of radio and television broadcast facilities, and miscellaneous services such as cablevision and telecommunication operations
49	Electric, Gas, and Sanitary Services	Provision and distribution of electrical and natural gas service, water supplies, and sanitary or sewage systems
50	Wholesale Trade Durable Goods	Wholesale distribution of new and used vehicles, parts, and tires; lumber, plywood, and millwork; operation of metal and coal marketing and distribution facilities; and miscellaneous scrap and waste salvage facilities
51	Wholesale Trade- Non-Durable Goods	Wholesale distribution of chemicals and allied products, petroleum, and petroleum products such as butane and naptha
55	Automotive Dealers and Gasoline Service Stations	Operation of facilities for the retail sale of automobiles, auto and home supply stores, and gasoline service stations

CODE	TITLE	ACTIVITY
72	Personal Services	Provision of laundry services, including dry cleaning and carpet or upholstery cleaning; operation of photography studios, beauty shops, and miscellaneous personal services such as health clubs
73	Business Services	Provision of services to business, including; direct mail, photocopying, photography and graphics services; building services such as cleaning, disinfecting and exterminating; the operation of research and development laboratories, photofinishing services, and commercial testing
75	Automotive Services	Operation of vehicle rental facilities; automotive repair shops, including engine and body work, and car washer
76	Miscellaneous Repair Services	Operation of facilities for the repair of: radios, televisions, refrigeration, and electrical or electronic equipment; clock and jewelry repair, specialized repair services, and welding and armature wending services
80	Health Services	Operation of general medical and surgical hospitals, medical laboratories, and other services such as blood banks and medical photography

Appendix C

**4-Digit Standard Industrial Classifications Surveyed
In the National Occupational Exposure Survey**

**APPENDIX D. 4-DIGIT STANDARD INDUSTRIAL CLASSIFICATIONS
SURVEYED IN DURING THE NOES**

<u>SIC Code</u>	<u>Description</u>
0723	Crop Preparation Services for Market, Except Cotton Ginning
0742	Veterinary Services for Animal Specialties
0782	Lawn and Garden Services
0783	Ornamental Shrub and Tree Services
1311	Crude Petroleum and Natural Gas Extraction
1381	Drilling Oil and Gas Wells
1382	Oil and Gas Field Exploration Services
1389	Oil and Gas Field Services, Not Elsewhere Classified
1521	General Contractors-Single Family Houses
1522	General Contractors-Residential Buildings, Other Than Single Family
1541	General Contractors-Industrial Buildings and Warehouses
1542	General Contractors-Nonresidential Buildings, Other than Industrial Buildings and Warehouses
1611	Highway and Street Construction, Except Elevated Highways
1622	Bridge, Tunnel, and Elevated Highway Construction
1623	Water, Sewer, Pipe Line, Communication and Power Line Construction
1629	Heavy Construction, Not Elsewhere Classified
1711	Plumbing, Heating (Except Electric), and Air Conditioning
1721	Painting, Paper Hanging, and Decorating
1731	Electrical Work
1741	Masonry, Stone Setting, and Other Stonework
1742	Plastering, Drywall, Acoustical and Insulation Work
1743	Terrazzo, Tile, Marble and Mosaic Work
1751	Carpentering
1752	Floor Laying and Other Floorwork, Not Elsewhere Classified
1761	Roofing and Sheet Metal Work
1771	Concrete Work
1781	Water Well Drilling
1791	Structural Steel Erection
1793	Glass and Glazing Work
1794	Excavating and Foundation Work
1796	Installation or Erection of Building Equipment, Not Elsewhere Classified
1799	Special Trade Contractors, Not Elsewhere Classified
2011	Meat Packing Plants

A. The Sampling Frame and Sources of Data

Listings from the Bureau of the Census publication County Business Patterns - 1979 (CBP)⁷ provided data needed to establish sampling rates in the NOES while listings from the 1980 Dun and Bradstreet Market Inventory (DMI)⁸ were used to select individual establishments to be surveyed. Supplementing these lists for completeness was considered, but was not done because of the costs involved and extensive coverage of the DMI. Coverage of construction and manufacturing establishments was emphasized in the NOES by defining these categories to include a broad range of SICs. Conversely, finance, mining, and mineral processing establishments were excluded. Mining and mineral processing establishments were excluded because they are the subject of a separate NIOSH survey.

An initial screening operation was done to select a sample of establishments employing eight or more employees and operating in one of the target SIC's of the NOES (See Appendix B). This screening was carried out as a telephone survey which identified establishments still in business and eligible for the survey during the 1981-1983 data collection period.

B. The Sampling Plan

The sample design developed for NOES maximized the reliability of estimates of numbers of employees. Although estimates of facilities are available using the methodology developed in NOES, breakdown by industry or data on the number of firms with specific characteristics was assigned lower priority in developing the sample design.

The design of NOES made use of prior experience from the 1972-1974 NOHS. The sampling plan attempted to produce estimates with minimum variance for a fixed cost by considering strata determined by number of employees at the worksite. The NOHS data provided guidance as to the method of stratification and most efficient sampling rates in strata. Eleven strata were defined as follows: 8-19, 20-49, 50-99, 100-249, 250-499, 500-999, 1000-1499, 1500-2499, 2500-4999, 5000 + employees, and those for which employment totals were not available. The two largest categories (2500-4999, and 5000 + employees) were treated separately from the others, since they represented a substantial expenditure of time for the surveyor teams and would affect calculation of variances of the survey results.

The NOES used a stratified two-stage sampling strategy for most of the sample. The first stage of sampling involved selection of a sample of 98 PSUs. With the exception of samples of very large establishments drawn irrespective of geographic location, the interviewed sample was confined to these 98 PSUs. The second stage (within PSU) selection for establishments was done using a systematic selection procedure. Very large establishments (2,500 or more employees) were treated separately in order to maintain more nearly equal probabilities of selection across establishments.

Figure D-1 is an outline of the sampling strategy followed in the NOES. A total of 604 PSUs were defined for the sampling process. PSUs were defined geographically with the county as the primary unit. Some PSUs consisted of a single county, e.g., Orange County, California. Other PSUs were made up of counties that constituted a SMSA in 1980, which in a few cases crossed state boundaries: e.g., Cincinnati SMSA consisting of Dearborn County, Indiana; Boone, Campbell, and Kenton Counties in Kentucky; and Brown, Clermont, Hamilton, and Warren Counties in Ohio. The 604 PSUs included 446,125 establishments eligible for the survey.

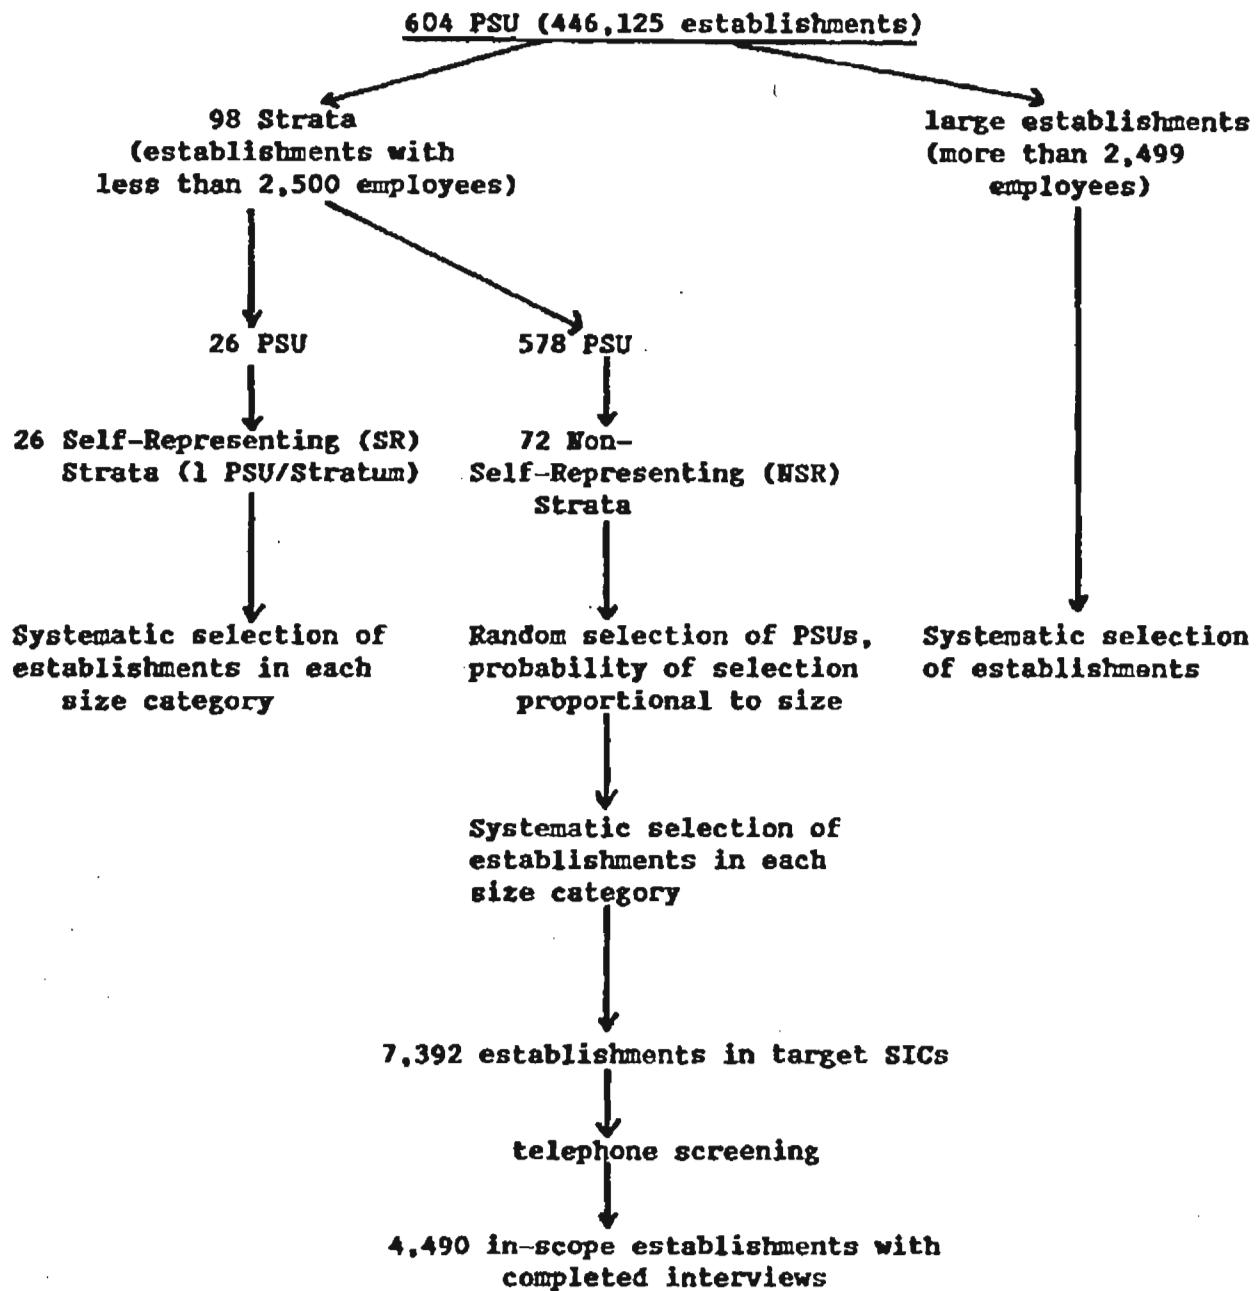

The 604 PSUs were stratified into 98 strata. The purpose of stratification was to obtain groups of PSUs which were of equal size and were homogeneous with respect to variables of interest in the NOES. Some of the criteria used for designing strata included: proportion of employees in firms where high potential exposure to health hazards might be found (e.g., chemical, rubber, or leather industries), geography (census region), and SMSA or non-SMSA. The 98 strata consisted of 26 self-representing (SR) strata, made up of 1 large PSU each, and 72 non-self-representing (NSR) strata made up of the remaining 578 PSUs.

The selection of establishments with less than 2,500 employees was done from 98 PSUs, one from each of the 26 SR and 72 NSR strata. A systematic sample of establishments in each of the 26 PSUs making up the SR strata was designated to be interviewed. Samples were selected independently across establishment size classes, where size was defined as the size of the workforce at that work site. PSUs in the 72 NSR strata from which establishments were to be selected were chosen as a random sample with probability of selection proportional to the number of establishments contributed by that PSU to that stratum, i.e., the measure of size of that PSU. One PSU was chosen from each NSR stratum. Systematic selection of establishments in each NSR PSU was then done using methods identical to those for selecting establishments from SR PSUs.

The sample of establishments employing 2,500 or more employees was designated without regard to sampling from PSUs. Samples in each of the size categories with these employee levels were determined using systematic selection of all firms nationwide with 2,500 or more employees.

Sample establishments were contacted by telephone to confirm that those establishments had enough employees and operated in an appropriate SIC to be included in the survey, and would participate in it. This sample was known as the 'screening' sample and consisted of 7,392 establishments. After screening, 4,504 establishments were designated for field interview, and all but 125 of these establishments were interviewed. Substitutes were found for 111 of the 125, making the total number of completed interviews 4,490. The effective refusal rate of establishments for participation in the NOES was .3 percent.

**FIGURE D-1. OUTLINE OF SAMPLING STRATEGY
(NOES 1981-1983)**

C. Estimation Procedures

National estimates of the number of employees and number of establishments conducting business in the SIC ranges covered by the NOES were obtained by assigning appropriate weighting factors to sample establishments and using these factors to project figures found in the NOES sample to the national level. A probability of selection was associated with each of the steps followed in determining the sample establishments which were interviewed. Inverses of these probabilities define sample weights which indicate how much each establishment's results contribute to national totals.

Inflation estimates of totals were obtained by multiplying each establishment's totals by its sample weight and summing across establishments. Ratio estimation was also used to improve the precision of the estimates. The inflation estimates were followed by two stages of ratio estimation before the final publication estimate was determined. The first stage ratio estimation factor was based on establishment counts by employee size class as reported from the Dun and Bradstreet list⁸. The second stage ratio estimation factor was based on employee counts (establishment counts for establishments with greater than 1,000 employees) by employee size class by SIC as reported in the County Business Patterns (CBP)⁷.

Each estimate had a sample error associated with it. Furthermore, the complex survey design and estimation procedures used in the NOES lead to approximate and complicated expressions for estimation of the sampling error. Calculation of the sampling errors was handled using the method of replications. The method required that the estimation procedures be independently carried out several times (replicated) using subsamples of the original sample, and that the variance of the replicate estimates be used to measure the variance of the full sample. Sampling error was taken as the square root of the variance. This system was flexible enough to provide measures reliable for all tabulations planned for the NOES data. Use of ratio estimation and the method of replications to make national projections from the NOES sample data is detailed in Volume II of this series, Sampling Methodology³. The methods are summarized here.

Estimation of Totals

The inflation estimate is an initial estimate of industrial characteristics on the national level. Inflation weights, defined as the inverse of the probability of selecting the sample establishments from which characteristics are to be estimated, are used in determining the estimate. If Y is a characteristic of all establishments, with y the value of that characteristic found in the sample, the simple inflation estimate Y_1 would be:

$$Y_1 = W \times y$$

where W is the inflation weight. For example, suppose $y = 100$ employees reported working in a sample of establishments with probability of selection $f = .05$. The simple inflation estimate Y_1 of all employees working in the category from which the sample was selected would be $Y_1 = (1/.05) \times 100 = 2,000$ employees.

The simple inflation estimate involves only characteristics of the sample. When more information about the target population is available, more precise estimates for totals can be obtained through the use of ratio estimation. Ratio estimation uses independent sources of information about sample characteristics to determine an estimate which is often more precise than one determined from inflation estimates.

As an example, consider a characteristic x estimated from the sample, such as the number of employees in an industry surveyed in the NOES. Suppose X is a measure of the same characteristic but obtained from an independent source. Then the ratio $r = X/x$ may be used to alter the inflation estimate Y_1 described above. If Y_1 is an inflation estimate of a NOES item, the ratio estimate $Y_2 = Y_1 * r = W * y * r$ may be more precise than Y_1 alone. In ratio estimation the ratio (X/x) should vary in the same proportion as (Y/Y_1). In the NOES, two stages of ratio estimation were used, first using number of establishments and then using number of employees. The Dun and Bradstreet⁸ and County Business Pattern⁷ listings of all establishments were used as outside sources in calculating the ratios. These ratios were then used to correct the initial inflation estimates (Y_1). These corrected estimates are presented in this volume.

Estimation of Sampling Error

Sampling error (also called standard error or standard deviation) refers to the deviation of actual values of the characteristic being studied from values of that characteristic estimated from the survey results. In the NOES, sampling errors were the result of estimates being based on a sample of plants. The sampling error is a measure of the precision of the estimate of total numbers of employees (or plants). Statistically, sampling error is defined as the square root of the variance, where the variance for a group of independent observations $x_1 \dots x_n$ with mean \bar{x} is defined as:

$$\sum_{i=1}^n (x_i - \bar{x})^2 / (n-1).$$

The chances are about 68 out of 100 that an estimate calculated from the NOES sample would differ from results of a survey of all plants eligible to be included in the NOES by more than one standard error. The chances are 95 out of 100 that the difference would be less than twice the standard error and 99 out of 100 that it would be less than 2 1/2 times as large.

The method of Balanced Repeated Replications (BRR)⁵ was used to estimate NOES variances. This method is one of a class of methods of calculating variances by resampling from the sample many times. BRR in the NOES uses random subsamples generated by combinations of data from pairs defined by PSUs in each of the SR and NSR strata. Sixty-four pairs (half-samples) and 32 replicates were formed. The half-samples are the repeated replications of BRR. They are "balanced" because the replicates were determined from pairs.

Thirty-two replicates for BRR were defined. Each replicate included one member from each of the 64 pairs. Which member to choose from each pair ('first' or 'second') was determined using a random number table.

To use the technique, estimates of characteristics in each of the replicates were found using the ratio estimation procedures described for the full sample estimation process. Variances in each replicate were then found, and summed. Variances were found using the standard formula:

$$\text{Var } (x') = \left(\sum_{r=1}^n (x_r - x_0)^2 \right) / r, \text{ where}$$

x' = variance of characteristic x

x_r = estimate of the characteristic x made from the r^{th} replicate,

x_0 = estimate of characteristic x made from the full sample.

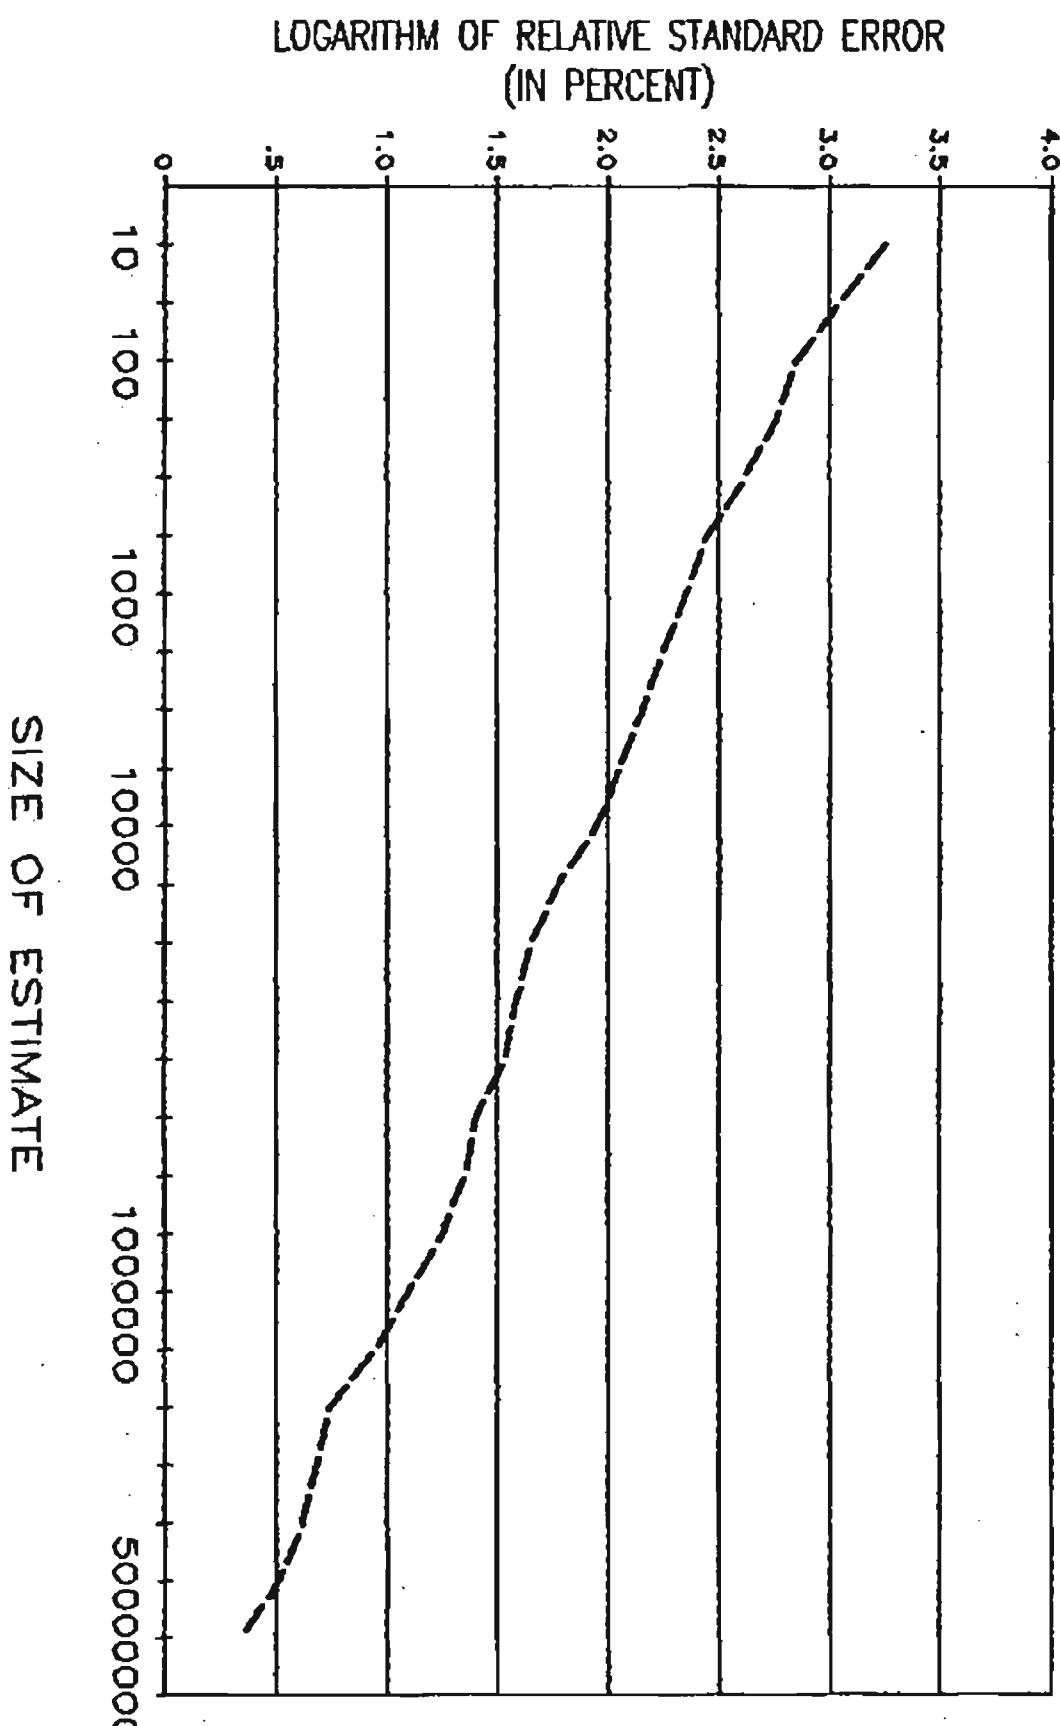

Estimates x_0 of characteristic x were calculated for each replicate using the same methodologies to calculate weights and ratio estimates as were used for the full sample. Since each replicate was a 50 percent subsample of the total sample, numerical values for the inflation weights used in the estimation procedures varied from those used for calculations with the entire sample. Half of the 32 weights (1 for each of the 32 replicates) were zero if the establishment was not in the replicate, and half were about twice as large as for the entire sample.

Sampling error in the NOES was taken as the square root of the variance:

$$\text{S.E. } (x') = \sqrt{\text{Var } (x')}$$

A graph relating relative standard error of the estimate of numbers of employees to the magnitude of the estimate is shown in Figure D-2. This graph may be used to determine standard errors for estimates of numbers of employees which are not presented in this volume. An example of the use of the graph is also given.

FIGURE D-2
RELATIVE STANDARD ERRORS FOR ESTIMATES
OF NUMBER OF EMPLOYEES

Example of chart use: An estimate of 1,000,000 employees (on scale at bottom of chart) has a relative standard error of 1.1% (on scale at the left of the chart), or a standard error of 11,000 (1.1% of 1,000,000).

D. Sampling Error

Much of the analysis in the NOES was to be industry-by-industry breakdowns. For these kinds of analyses, the samples of industries should have had approximately equal reliability. This would have lead to a sample design with roughly equal sample sizes by industry. On the other hand, an efficient sample for analysis of statistics for all industries combined would require that the sample size in each industrial sector be proportional to that sector's contribution to the total number of establishments eligible for the survey. Data from the NOES on the distributions of both establishments and employees was also important. An efficient sample design for statistics on employees would use higher sampling rates for larger establishments than for smaller ones. For statistics on establishments, however, the number of plants, rather than their size, would be important.

The sample design ultimately developed for the NOES maximized the reliability of estimates of numbers of employees. Sampling errors resulted from the use of this one sampling design. For example, the probability of selection of certain establishments in some primary sampling units was so large that all establishments in certain size classes would have been included in the sample. This sampling with certainty in some primary sampling units occurred either because of few establishments in that size class in the sampling unit or because of the required sample size. Operational constraints also affected sampling error.

Sampling error is also reflected in the calculation of standard errors. The calculation of variances using standard statistical formulas assumes that sample observations are collected independently of one another, and that a uniform sampling rate is used for the entire sample. In the NOES sampling scheme, however, this assumption does not apply.

The sample selection methods used for NOES result in variance estimates that are slightly biased (usually overestimates), regardless of the type of variance estimation used. In this sense estimation of the variance is a conservative estimate. These biases arise because only one PSU was selected from each of the size strata considered, so some strata had to be combined in the variance estimation procedure to obtain meaningful results. Combining PSU's from different strata introduced an extra element of variance for the estimation procedure; two sample PSU's could have been selected from each stratum at, however, the cost of a decrease in efficiency of the sampling scheme. Also, systematic sampling of establishments within each sample PSU was used to select establishments. Defining half-samples for BRR from samples already determined by a systematic selection procedure also tends to yield slight overestimates of the variance.

E. Undersampling in the NOES

Valid use of the ratio means in the estimation process requires low standard errors and consequently, appropriate sample sizes. This requirement is especially important in the NOES, since estimates from several subgroups (the individual industrial groups) are needed. The coefficient of variation of size⁵ was used as a screening mechanism to determine if enough establishments in the target SICs had been surveyed to give useful results. The coefficient of variation of size is defined as (coefficient of variation)/(size of sample). Since establishments surveyed in a given target SIC varied widely as to the number of employees a Poisson approximation was used, making the coefficient of variation of size:

$$C_x = \frac{1}{\sqrt{Mn}}$$

where M = mean number of establishments surveyed per employee size group

n = total number of establishments surveyed in the target SIC.

A value of $C_x = .25$ was used as a cutoff value for results from individual SICs to be included in the results presented in this volume.

12 — — 17

*** GENERAL FACILITY INFORMATION ***

5. What is your major activity? _____
18
_____ **19**

CARD **[2]**

6. What are your chief products, services, lines of trade, etc? _____
18
_____ **19**

CARD **[3]**

7. SIC codes (observed) **— — —**
18 — — 21

— — — 25

— — — 29

8. Approximately how many years has this facility been involved in this activity?

— — — 32 Years (If "unknown" code "UK")

9. How many shifts do you have at present? **—**
18

709

10. How many hours per shift?

34 35 (If irregular, code "99").

11. How many people are on your payroll for all shifts at the present time?

Males 36 - - - 40

Females 41 - - - 45

Total 46 - - - 50

12. Of this total number, how many are normally in the work areas as opposed to the administrative or other areas?

51 - - - 55

13. Are there any labor unions operating in this facility?

56

1 No

2 Yes; list complete union names and acronyms (initials)

CARD **[4]**

Union Names

Acronym

 - - - 18 - - - 24

 - - - 25 - - - 31

 - - - 32 - - - 38

 - - - 39 - - - 45

 - - - 46 - - - 52

 - - - 53 - - - 59

 - - - 60 - - - 66

14. Is there a formally established health unit at this facility? ¹⁸

- 1 Yes, physician in charge
- 2 Yes, registered nurse in charge
- 3 Yes, licensed practical nurse in charge
- 4 Yes, other in charge
- 5 No

15. Do you have an employee at this facility with formal first-aid training, who has been formally designated to provide emergency medical treatment? ¹⁹

- 1 Yes, full-time
- 2 Yes, part-time
- 3 No

16. Do you have on your payroll one or more on-site physicians to give your employees medical care? ²⁰

- 1 Yes, full-time
- 2 Yes, part-time
- 3 No

17. Do you have a formal arrangement with any outside source (physicians or clinics) to give your employees access to the care of a physician? ²¹

- 1 Yes, physician will travel to this facility on call
- 2 Yes, at clinic (not at this facility)
- 3 Yes, physician is based at this facility either full or part-time
- 4 No

18. Estimate the average number of physician hours that are devoted to your facility per week.

RN 22 — 25 hours per week

19. Does this facility have one or more nurses on the payroll to provide care for employees? ²⁶

- 1 Yes
- 2 No (Skip to Question 21)

20. How many registered nurses and licensed practical nurses are on the payroll at this facility?

RN 27 — 29

LPN 30 — 32

21. Estimate the average number of nursing hours that are devoted to your facility per week.

23 — 26 hours

22. Do you provide the following examinations or tests to all or to selected groups of employees on a periodic basis?

	No	Yes, <u>All</u>	Yes, Exec. & Mgmt <u>Only</u>	Yes, <u>All</u> Production Workers <u>Only</u>	Yes, for Selected Mgmt and/or Production Workers
Ophthalmology ₃₇	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Audiometric ₃₈	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Blood tests ₃₉	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Urine tests ₄₀	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Pulmonary function ₄₁	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Chest X-rays ₄₂	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Allergy/Sensitization ₄₃	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
Immunizations (flu, etc.) ₄₄	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
23. Before new employees are hired or placed, are they required to take a medical examination? ₄₅	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
24. Do you record health information about a new employee on some regular form? ₄₆	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
25. Do you require medical examinations of your employees who return to work after an illness? ₄₇	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>
26. Do you require medical examinations of your employees when their employment is terminated? (Exit examination) ₄₈	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>

27. How long are medical records and other health information records retained?

49 — 51 Years (If "forever" code "999")
(If "unknown" code "UK")

***** INDUSTRIAL HYGIENE AND SAFETY PRACTICES *****

28. Do you employ full-time individuals at this facility whose major responsibilities are in the area of prevention of occupational injuries or illnesses?⁵²

- 1 Yes, injury prevention
- 2 Yes, illness prevention
- 3 Yes, both injuries and illnesses
- 4 No (Skip to Question 30).

29. How many full-time occupational health and safety specialists are employed at this facility?

53 54 Safety (injuries)

55 56 Health (illnesses)

For each of those individuals, please write in the appropriate activity number from the activity clusters listed below:

CLUSTER NO.

Individual #1 ₅₇ —	1: Administers (directs, manages) Plans and develops programs, Advises top level management.
Individual #2 ₅₈ —	#2: Inspects work place to identify hazards. Investigates to determine the cause of injuries/illnesses.
Individual #3 ₅₉ —	#3: Analyzes plans or specs. to identify hazards, develops operating procedures to control hazards.
Individual #4 ₆₀ —	#4: Provides education and training.
Individual #5 ₆₁ —	#5: Performs and analyzes tests to monitor for the presence of dusts, gases, etc.
Individual #6 ₆₂ —	#6: Performs engineering design to control hazards.
Individual #7 ₆₃ —	
Individual #8 ₆₄ —	
Individual #9 ₆₅ —	
Individual #10 ₆₆ —	
Individual #11 ₆₇ —	
Individual #12 ₆₈ —	

30. Has your facility received industrial hygiene services on a consulting basis during the past 12 months?⁵⁹

- 1 Yes, from government sources
- 2 Yes, from non-government sources
- 3 No

31. Has your facility received occupational safety services on a consulting basis during the past 12 months? ₇₀

- 1 Yes, from government sources
- 2 Yes, from non-government sources
- 3 No

32. Do you have a program under which you regularly or periodically monitor the presence of physical agents such as heat, vibration, radiation, noise, and magnetic fields? ₇₁

- 1 No (Skip to Question 34)
- 2 Yes (Circle yes or no for each physical agent listed below:)

	<u>Yes</u>	<u>No</u>
1. Heat ₇₂	1	2
2. Vibration ₇₃	1	2
3. Radiation ₇₄	1	2
4. Noise ₇₅	1	2
5. Magnetic fields ₇₆	1	2
6. Other ₇₇	1	2

33. How long do you retain the records of the monitoring program?

78 79 Years (If "forever" code "99")
(If "unknown" code "UK")

CARD **[6]**

34. Do you have a program under which you regularly or periodically monitor the presence of fumes, gases, mists, dusts, or vapors? ₁₈

- 1 Yes
- 2 No (Skip to Questions 38)

35. How is this monitoring conducted? ₁₉

- 1 Sample collection with laboratory analysis (Skip to Question 37)
- 2 Direct reading instruments
- 3 Both

36. Which types of direct reading instruments are used in the monitoring program? Circle "yes" or "no" for each type listed below:

	<u>Yes</u>	<u>No</u>
1. Direct mass measurement tests ₂₀	1	2
2. Fibrous aerosol monitors ₂₁	1	2
3. Detector tubes ₂₂	1	2
4. Infrared (I.R.) gas monitors ₂₃	1	2
5. Ultraviolet (U.V.) gas monitors ₂₄	1	2
6. Gas chromatograph monitors ₂₅	1	2
7. Electrochemical monitors ₂₆	1	2
8. Other "wet" chemical methods ₂₇	1	2

37. How long do you retain the records of the monitoring program?

28 29 Years (If "forever" code "99")
(If "unknown" code "UK")

38. Have any substitutions of chemical materials been made within the last 5 years?₃₀

- 1 Yes
2 No (Skip to Question 41)

39. Were any of these substitutions made for the primary purpose of reducing employee exposures?₃₁

- 1 Yes
2 No

40. Were any of these substitutions made as a result of inspections of this facility by federal, state, or local authorities?₃₂

- 1 Yes
2 No

41. Have any major equipment or process modifications been made within the last 5 years?₃₃

- 1 Yes
2 No (Skip to Question 45)

42. Were any of these modifications made for the primary purpose of reducing employee exposures?₃₄

- 1 Yes
2 No

43. Were any of these modifications made as a result of inspections of this facility by federal, state, or local authorities?³⁵

- 1 Yes
- 2 No

44. What was the nature of the modification?³⁶

- 1 A redesign of the process
- 2 Enclosing the process
- 3 Equipment substitution
- 4 A redesign of the equipment
- 5 Combination of the above
- 6 Not listed here

45. Does this facility recirculate exhaust air from any process or plant area?³⁷

- 1 Yes
- 2 No (Skip to Question 47)

46. What processes or areas are involved?

47. Are there areas in this facility in which personal protective devices or equipment are required or recommended?³⁸

- 1 Yes, required
- 2 Yes, recommended
- 3 Yes, both
- 4 No (Skip to Question 53)

48. Who provides personal protective devices?³⁹

- 1 individual employees
- 2 employer
- 3 both
- 4 other (specify) _____

49. Who has been designated to see to it that personal protective devices and equipment are serviced and maintained?⁴⁰

- 1 individual employees
- 2 employer representative
- 3 both
- 4 no one
- 5 other Specify _____

50. In those instances where employees refuse to wear protective devices or fail to wear them properly, are corrective measures taken? ⁴¹

- 1 Yes
- 2 No (Skip to Question 53)

51. Do those corrective measures involve economic penalties? ⁴²

- 1 Yes
- 2 No (Skip to Question 53)

52. Have any economic penalties been assessed in the past 12 months? ⁴³

- 1 Yes
- 2 No, we know of no instances where violations of company policy have occurred within the last 12 months.
- 3 No, although we know that there was a minimum of one violation of company policy within the last 12 months.

53. Do you have a program under which you regularly or periodically conduct safety inspections of this facility? ⁴⁴

- 1 Yes
- 2 No (Skip to Question 56)

54. Are written results of these safety inspections required? ⁴⁵

- 1 Yes
- 2 No

55. Are the results of the safety inspections posted or otherwise made routinely available to affected employees? ⁴⁶

- 1 Yes
- 2 No

56. Do you have a regularly scheduled preventive maintenance program? ⁴⁷

- 1 Yes
- 2 No

57. Do you have a regularly scheduled formal safety training program for your employees? ⁴⁸

- 1 Yes
- 2 No

58. Do you have a program under which you regularly or routinely assess the employee's awareness of safety rules? ⁴⁹

- 1 Yes
- 2 No

59. In those instances where employees are found to be in violation of the safety rules, are corrective measures taken?₅₀

- 1 Yes
- 2 No (Skip to Question 62)

60. Do those corrective measures involve economic penalties?₅₁

- 1 Yes
- 2 No (Skip to Question 62)

61. Have any economic penalties been assessed in the past 12 months?₅₂

- 1 Yes
- 2 No, we know of no instances where violations of company policy have occurred within the last 12 months.
- 3 No, although we know that there was a minimum of one violation of company policy within the last 12 months.

*** GENERAL RECORDKEEPING INFORMATION ***

62. How long are personnel records on terminated employees retained?

53 — 55 Years (If "forever", code "999")
(If "unknown", code "UK__")

63. Do you keep employee absenteeism records?₅₆

- 1 Yes, showing specific nature of illness where appropriate
- 2 Yes, showing only the type of absence
- 3 Yes, without showing the type of absence
- 4 No

64. What is your rate of unscheduled absenteeism?

57 — 59 days per employee per year (If unknown, code "UK")

65. What is your turnover rate among permanent employees in the nonadministrative areas?

60 — 62 % per year

66. May I see the latest Summary of Occupational Injuries and Illnesses Form (OSHA Form 200)?
(OSHA regulations provide for inspection by NIOSH).¹⁸

- 1 Yes
2 No (or company does not keep one)
