

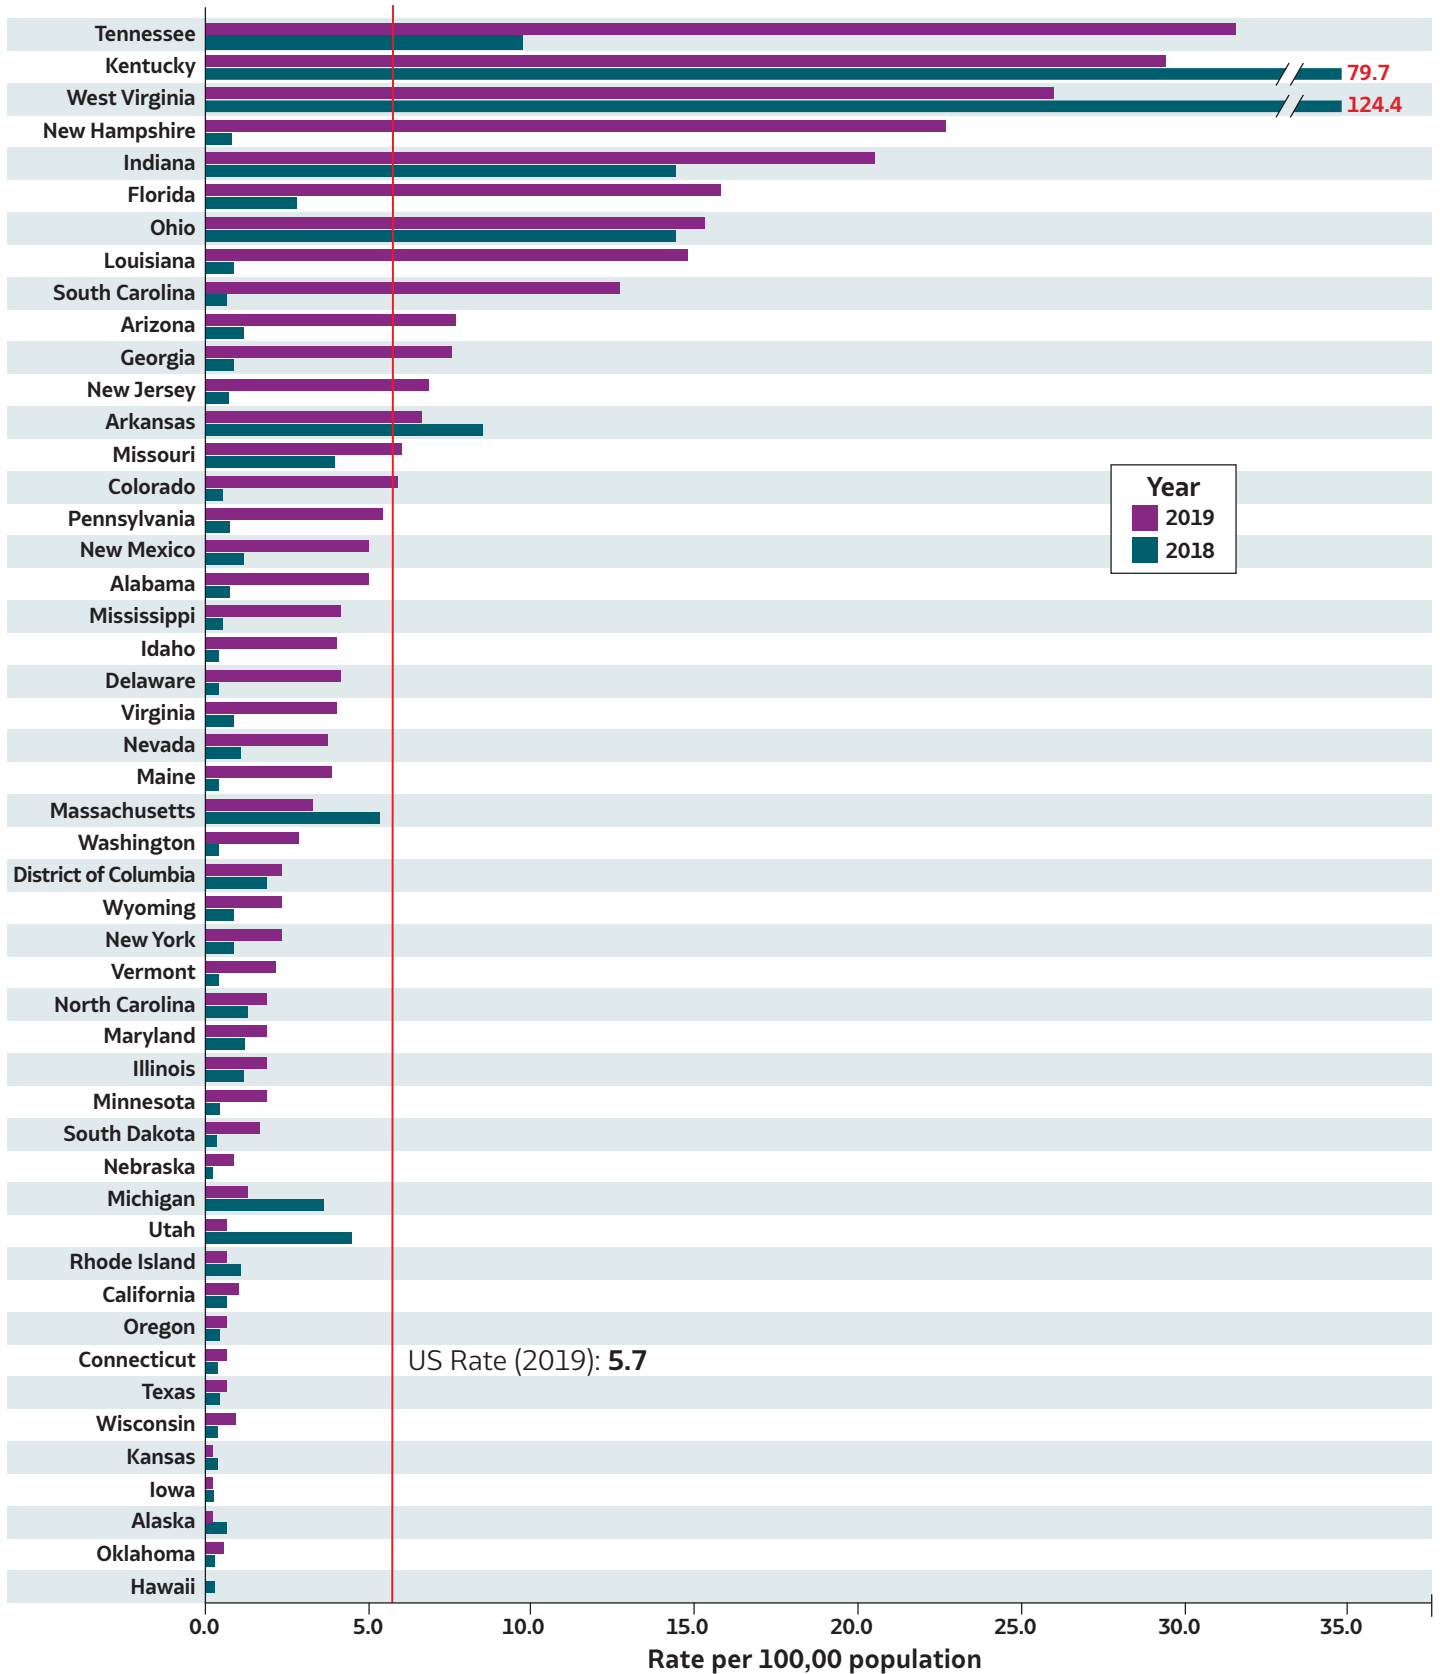

**Figure 1.2. Rates\* of reported hepatitis A+ virus infection, by state or jurisdiction – United States, 2018–2019**

Source: CDC, National Notifiable Diseases Surveillance System.

\* Rates per 100,000 population.

† Reported cases that met the classification criteria for a confirmed case. For the case definition, see <https://ndc.services.cdc.gov/conditions/hepatitis-a-acute/>.

Only states with rates for 2018 and 2019 are shown. No hepatitis A cases were reported from Montana and North Dakota in 2018.
