CDC'S IMPACT

CDC is working with partners to identify new approaches to improve TB prevention and care worldwide.

Developing new strategies to find and cure TB, MDR-TB and TB/HIV.

Informed the global roadmap to find, cure and prevent TB in children.

Strengthening surveillance systems to identify and target hot spots.

Developing interventions to end TB transmission in health facilities.

Transforming the World's Approach to diagnosing TB among those with HIV.

Establishing best practices for treatment of drug-resistant TB.
