¹ All respondents to the NCHS survey.

² Linkage-eligibility is based on having provided sufficient personal identifying information and/or not refused to provide SSN. Details about linkage-eligibility for each survey are documented in the Analytic Guidelines.

³ This percentage is calculated by dividing the number of linkage-eligible respondents by the total number of respondents.

⁴ Linked respondents are linkage-eligible respondents who linked to the administrative records at any time during the administrative period (HUD administrative records for Multifamily program transactions that occurred between June 30, 1996 and December 31, 2014; and Public Housing and Housing Choice Voucher transactions occurring between December 1, 1999 and December 31, 2014).

⁵ This percentage is calculated by dividing the number of linked respondents by the total number of respondents.

⁶ This percentage is calculated by dividing the number of linked respondents by the total number of linkage-eligible respondents.

⁷ SSN, a linkage-eligibility criterion, was not collected from 2002-2003 NHIS respondents aged 0-17 years.
