(*) Note that all ACAM2000 NDCs have been relabeled to indicate it is for both smallpox and monkeypox. There has been no change to the formulation. Only the NDCs indicated for National Stockpile above are labeled as such.

(***) The short and long description fields for CVX code 75 have been modified to indicate that this CVX formulation applies to both smallpox and monkeypox.

2. New product: CVX, NDCs, and crosswalks added for 2025 FLUZONE TRIVALENT SOUTHERN HEMISPHERE

One single-dose presentation for the influenza Southern hemisphere 2025 season will be provided by Sanofi. The new formulation is trivalent. A new CVX code has been added to reflect this update. A new product table entry has also been added, “FLUZONE Trivalent Southern Hemisphere.” Note that Southern hemisphere influenza vaccines are not associated to CPT codes in the vaccine code set.

3. New Unspecified CVX codes 330 and 325 added for unspecified formulations of dengue fever and vaccinia

Non-US dengue vaccine products are now available that do not match the existing US formulation and CVX code for dengue fever. This necessitates the addition of a new unspecified CVX code for dengue to allow for historic vaccine administration to be recorded when the formula/product administered is not known or to record a non-US product dengue vaccine administration.

Two formulations for vaccinia (smallpox or monkeypox) are available. This necessitates the addition of a new unspecified CVX code for vaccinia to allow for historic vaccine administration to be recorded when the formula/product administered is not known or to record a non-US product vaccinia vaccine administration.

Related CVX to vaccine group changes: The DENGUE and Orthopoxvirus vaccine group field in each record “Uncertain Formulation CVX” is now populated with the new unspecified CVX codes as shown below.

330	Dengue fever, unspecified	Dengue fever, unspecified formulation	Inactive	DENGUE
