Vaccine Code Set Updates – Details

1. Influenza Season 2025/2026 New Codes and Crosswalks

New NDCs for FLUARIX, FLUBLOK, and FluMist have been added to the vaccine code sets and the associated crosswalks have been updated. The table below includes only those vaccines added to the code sets in this release. The added NDCs included in this release complete the list of influenza vaccine products expected for the 2025/2026 Influenza Season. NDCs are added to the code sets once the NDCs have been approved by the FDA and are listed in both the FDA drug files and in NIH DailyMed.

Separately, CDC has updated the 2025/2026 Seasonal Influenza Codes and Crosswalk table. The full table can be found here [Fall Season Respiratory Vaccine Codes | Immunization Information Systems \(IIS\) | CDC](#).

CDC Immunization Information Systems (IIS) Vaccine Code Set Release Notes

(*) The UoU for FluMist self or caregiver administered vaccine is listed with the same NDC code as the UoS NDC. This allows mapping to a different CVX code for self or caregiver administered FluMist vaccine versus the HCP administered vaccine. A CPT code is not applicable for the self or caregiver NDC billing.

2. Shingrix New Codes and Crosswalks

A new single-dose syringe presentation has been added to the codes for Shingrix.
