

CDC Immunizations Information Systems (IIS) Vaccine Information Statements (VIS) Code Set Release Notes

VIS Document Code Set Updates Published February 27, 2025

Release Notes: Release notes provide a technical summary of the updates made to vaccine code sets and crosswalks. This release covers code set updates for Vaccine Information Statement (VIS) codes and maps effective 01/31/2025.

Release Summary

VIS documents have been updated for compliance with Executive Orders.

1. Seventeen (17) New VIS Editions Added with Edition Date of 01/31/2025
2. Seventeen (17) Prior VIS Editions Retired
3. Correction to VIS URL

VIS Code Update Details

VIS codes are created to enable provider systems to implement VIS 2D barcode scanning and to help automate capture of the specific VIS document edition given to the recipient or caregiver. VIS codes may be published in advance of the actual VIS document publication, but they are only in effect and useable starting on the edition date of the VIS. The URLs included in the vaccine code set will not point to the new edition until the VIS document edition date.

This release includes the following specific VIS related code updates. Note that the following three files have been updated in the code sets:

- VIS Lookup [Vaccine Information Statement \(VIS\) Lookup Table | Immunization Information Systems \(IIS\) | CDC](#)
- CVX to VIS Mapping [IIS | Code Sets | CVX VIS | Vaccines | CDC](#)
- VIS URL [VIS to URL Table | Immunization Information Systems \(IIS\) | CDC](#)

1. Seventeen (17) New VIS Editions Added with Edition Date of 01/31/2025
