Distribution of deaths, by age: 2016

Age	Number	Percent
Total ²	2,744,248	100.0
Under 1 years	23,161	0.8
1–14 years	9,548	0.3
15–24 years	32,575	1.2
25–44 years	135,408	4.9
45–64 years	539,961	19.7
65 years and over	2,003,458	73.0

¹ Estimates are age-adjusted to the year 2000 standard population with unrounded population numbers. See [Appendix II](#), Age adjustment.

² Deaths of persons with age "Not Stated" are included in Total counts but are not distributed among age groups. Deaths of persons with age "Not Stated" are less than 0.1% of all deaths.

NOTES: Death rates for those under 1 year were included in the overall death rates. However, because infant mortality (the number of deaths per live births in the same year) is the preferred measure for deaths among infants, death rates for this age group are not presented separately here. For more information on the population used for rates, see [Appendix I](#), Population Census and Population Estimates.
