## 2022-2023 National Survey of Family Growth (NSFG)

Public-Use File Index for Female Respondent File

Abbreviations:	
R	Respondent
FC	Flow Check. Numbered Flow Checks are contained within the detailed questionnaire specifications (known as CAPI Reference Questionnaires or CRQs) and indicate how each computed variable is defined within the survey instrument to assist with routing. The CRQs are posted on the NSFG webpage as part of the PUF release.
H/P	Husband or cohabiting partner
CM	Century Month (see Century Month Coding for Dates in User's Guide for further details)
DK	Don't Know
RF	Refused
DRR	Disclosure Risk Reduction. Variables flagged with * in this column have had some DRR action taken for inclusion on the public-use files. Those that have yellow highlighting with the * are new DRR actions taken for 2022-2023. See Codebooks or Recode Specifications for further details. Also see the list of restricted-use analytic variables for further information on variables suppressed altogether from this PUF.

## For further information on Variable Type, please see User's Guide section on "Description of Codebooks" where all variable types are defined. Variable labels for "raw" variables on asked questions start with the question number. Further details on each recode can be found in the codebook entry for the variable or in the questionnnaires. Further details on each recode can be found in the codebook entry for the variable or in the Recode Specifications.
