

Adding Same Day Outcome Measures in the NHSN Application and Completing Denominators for Same Day Outcome Measures Form (57.403)

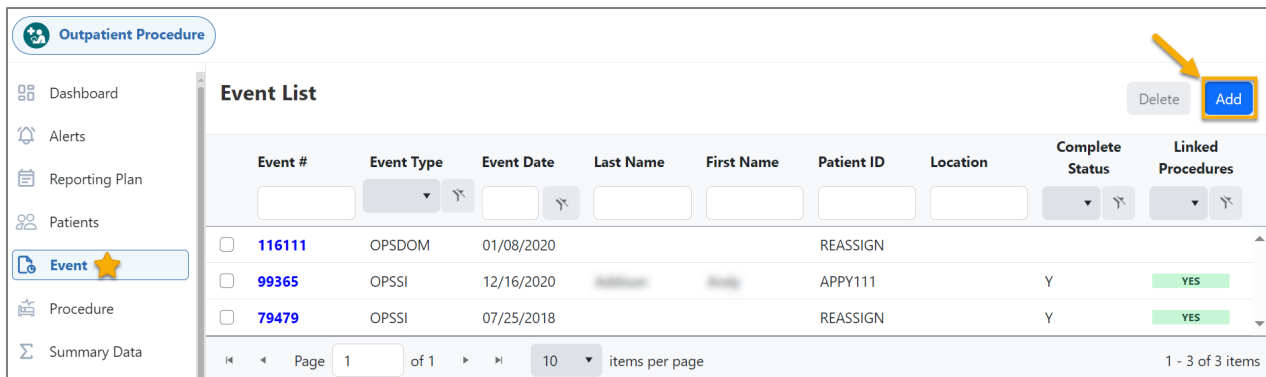

Outpatient Procedure Component

Note: These instructions assume your facility is enrolled with NHSN.

Background: The measures that are included in this grouping of care quality indicators represent a broad range of risks encountered by patients accessing care in various outpatient settings. The four measures reflect the potential outcome resulting from procedures performed in the Ambulatory Surgery Center (ASC) outpatient environment. These potential outcomes can occur on the same day (during or immediately following) a procedure performed in an ASC. Same Day Outcome Measures include four individual measures, which are: 1. Patient Burn 2. Patient Fall 3. Wrong Site, Wrong Side, Wrong Patient, Wrong Procedure, Wrong Implant 4. All-Cause Hospital Transfer/Admission.
