

An illustration showing various at-home test kits. On the left is a dark grey box. In the center is a white cylindrical kit with a black cap and three vertical lines. Below it is a white rectangular kit with a circular window. To the right are two white swabs with long handles, one of which is partially inserted into a grey rectangular kit. The background is a light grey with a subtle geometric pattern.

Q

Are at-home tests available for respiratory virus infections?

A

Yes, tests are available for COVID-19, flu, or both. Results can help guide your next steps.

If you test positive, talk to your doctor, especially if you are high risk for serious illness and could benefit from treatment.
